#### SPECIAL WHOLESALE BULK PRICE LIST OF

NOTICE—All Seeds listed on Pages 2 and 3 of this Catalogue are shipped by Express or Freight at purchaser's expense. No extra charge is made for packing, boxes or bags.

SEDS BY PARCEL POST— If any items are wanted BY PARCEL POST add additional for postage and packing at the rate of 10 cents per pound to Wholesale Prices quoted on Pages 2 and 3 of this Catalogue, in the past season, and we reserve the right to decline orders for scarce items unless included along with a good general order for Vegetable Seeds, as it is our purpose to protect, as usual, our thousands of customers who annually look to us for a general supply of Buckbee's "Full of Life" seeds.

For success and immediate results we recommend plant-ing the 3 and 4 year old roots.

owing to the many and numerous requests of our customers for the largest sized roots we have especially grown a fair supply of selected 3 and 4 year roots to meet this demand. Our price, as long as the supply lasts, on any of the 7 varieties listed on this page, only 50e per doz.; \$8.75 per 100, posipaid. By express or freight, at buyer's expenses, \$1.75 per 100; \$15.00 per 1000.

#### BROCCOLI

Similar to Cauliflower, of less delicate flavor but hardier; of value in the Northern States.

EARLY PURPLE CAPE—This is the best variety for our climate. It produces large heads of a purple-brownish climate.

cumate. It produces large heads of a purple-brownish color, very close and compact. Plt., 10c; oz., 90c. EW WHITE CAPE.—Medium sized heads, close and compact, of creamy-white color. A sure header. Pkt., 10c; oz., 75c.

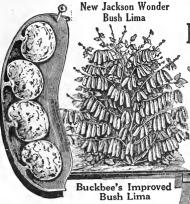

Sprouts Buckbee's Matchless

#### BRUSSELS SPROUTS

Brussels Sprouts are very largely grown in the South, as high as 250,000 barrels being shipped in a single season from Norfolk, Va. They are well worthy of extensive culture anywhere in this country. The plants resemble Cabbage in growth, but you have been supported by the plants presemble Cabbage in growth, but joint on the stalk. These heads are cut off when well formed and marketed in Strawberry Boxes holding one quart. The plants are quite hardy, are not injured but improved by hard frosts and are left in the garden or field during winter until wanted. These miniature Cabbage sike Caulinover. They are the most delicious and delicately flavored variety of the Cabbage family. variety of the Cabbage family.

IMPROVED PARIS MARKET-On this variety the heads grow very closely arranged on a stalk 20 in. to 2 ft. in height. Quality is very fine. Pkt., 5c; oz., 30c; 2 oz., 50c; ¼ lb., 90c.

BUCKDEE'S MATCHLESS—The finest strain of sprouts. The plants are of strong, viscorous electrons to the plants are of strong, viscorous entire height with very large solid, tightly folded sprouts of exquisite quality. Buckbee's Matchless is an early variety; frost will find the sprouts fully developed and the stems thickly set. Pkt., Ide; 0z., 26c: 2 0z., 80c; ½ lb., 3ki,00

Superior Quality, Exquisite Flavor, Fine Color, Good Shipper, Hardy Grower, Enormously Froductive, March Grower, Excellent Keeper.

This is the very "newest" in the Bush Limas lean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till

with pods continuously from early Summer till

Frost.

It Matures Extremely Early & Is Suitable, Therefore, for All

Sections North and South, and is a Continuous

In size the Beans are what might be termed intermediate, not olarge as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit after that the state of all purposes. The bush is sturdy in habit and the first of all purposes. The bush is sturdy in habit and the first of all purposes. The bush is sturdy in habit and the first of all purposes. The bush is sturdy in habit and the first of all purposes. The bush is sturdy in habit and the first of all purposes. The heavy clusters well out from the plant after counted. Each pod contains on an average of four Beans, there are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see the second of the second

30c; lb. 55c.

FORDHOOK BUSH LIMA

Exceptionally Fine Quality. The Leading Bush Lima in the East. An improved Dreer's Bush Lima. The plant is vigorous and erect growing, bearing the pods well above the ground. The pods, which are produced in large clusters, are medium green, about 4% inches long, and each contains three to five large Beans of, exceptionally fine quality. Both pods and Beans are twice the size of Dreer's Bush Lima; in season it is two week earlier. Seed large, irregularity oval in shape, very thick, white the Dwarf Limas and one of the very best. Postpaid, pkt. 8c; ½ lb. 28c; lb. 50c.

#### BURPEE'S BUSH LIMA

Erect, stout bushes, 18 inches high, and with a diameter of to 3 feet. Very productive. Large pods filled with large beans of luscious quality. Postpaid, pkt. 8c; ½ lb. 22c; lb. 40c.

#### BUCKBEE'S IMPROVED EARLY VALENTINE

#### Standard Round Pod Snap Bean.

Standard Round Ped Snap Bean.

Buckbee's Improved Valentine is the earliest, hardiest and finest strain of this popular variety in the country; it is a heavy cropper; true round podded; the pods are very uniform in size and of excellent quality. This strain produces edible pods in less than five weeks from sowing. For snaps there is nothing superior to this variety among the green podded sorts. Vines erect, with coarse dark green leaves and large white blossoms. Pods mack; very fleshy, crisp and mender. Beans medium size, long, irregular, pink marbled with red. Largely grown by market gardeners for an early crop. Postpaid, pkt, 8c; ½ lb. 18c; lb. 34c. early crop. 18c; lb. 34c.

#### EARLY MOHAWK Very Early and Productive.

Very hardy, can be planted early. Pods very long and straight. Beans kidney-shaped, variegated drab, purple brown. Postpaid, pkt. 8c; ½ lb. 17c. ib. 32c.

#### NEW EXTRA EARLY REFUGEE

Splendid Pods of Excellent Quality. A very early green-podded Bean, furnishing fleshy pods of fine quality. About two weeks earlier than the Late Refugee, with pods of same size and shape, except slightly flatter. and shape, except slightly flatter. Postpaid, pkt. 8c; 1/2 lb. 17c; lb. 32c.

#### VARIETIES FOR SHELL BEANS

The following kinds are used exclusively as shelled beans, either green or dried for winter:

#### BOSTON WHITE BAKING BEAN Famous for Baking.

A sure cropper and more prolific than the common white Bean and also of better quality, ripening its crop early and all at once. Pods straight, short, small; Beans small, oval, white. Postpaid, pkt. 8c; 1/2 lb. 18c; lb. 35c.

#### NEW DWARF CRANBERRY OR WREN'S EGG

Quantity Prices

See Pages 2 and 3

Excellent for Soup or Baking,

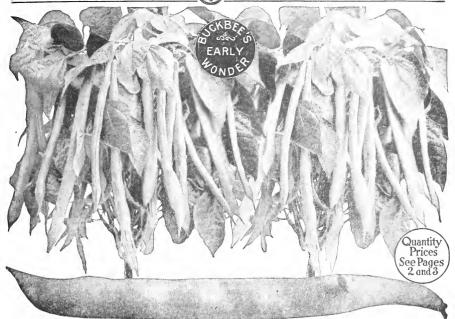

Vines compact, upright and very productive. Pods medium length, cylindrical and curved, with splashes of bright red on a yellowish ground. The ripe Beans are large, plump, oval and nearly covered with splasnes of bright red. Edual to Lima Beans in quality. Postpaid, pkt, 10c; ½ lb. 12c; lb. 34c.

#### Stringless, Tender, Continuous Bearer.

One of the very earliest and largest podded green bush Beans. Pods hand-some, long and straight, of very fine quality. The plants are quite large, grow erect, commence to bear very early grow erect, commence to bear very early and continue for a long time. They are very productive. The pods are from 7 to 7½ inches long, are flat, of light to 7½ inches long, are flat, of light stringless at all stages of grow to dear for delicious flavor. They are also for very uniform size and shape. The dried seeds resemble those of the Yellow Six Weeks, but Bountful is much superior in quality, univery stringless, also earlier in quality, univery stringless, also earlier and more productive. A splendid variety for the home garden. Pkt. 8c; ½ lb. 18c; lb. 35c

Extra Early Bountiful.

#### BEST DWARF GREEN PODDED BEANS

#### Buckbee's Early Wonder The Earliest Bean, an Ideal Snap Bean,

The enormous rich dark green pods The enormous rich aim green pools which are produced in immense clusters often measure from 7 to 9 inches long and contain from 5 to 7 Beans. They are of admirable form, free from coarseness, exceedingly tender and of delicious mild and sweet flavor. The dry Beans

We own the entire stock of Buckbee's Everbearing, and this variety can only be had from us. Postpaid, pkt. 10c; 1/2 lb. 25c; lb. 45c.

Famous Kentucky

#### Famous Kentucky Wonder or Old Homestead

The Old Reliable Standard Green Pod Pole Beans.

Very early and enormously productive, single vines often yielding as much as a peck; entirely stringless. Pods of a silvery green color. Postpaid, pkt. 8c; ½ lb, 18c; lb, 35c.

#### Mammoth Podded Horticultural

The mammoth pods are striped and splashed with brilliant crimson. The Beans are of immense size and of the finest quality, used either green or dry. They are by many preferred to Limas. Best suited for cool climate. Postpaid, ptt. Sci. y 2, 10. 18c; ib. 34c.

#### Early Golden Cluster Wax

A most productive main crop variety of the Wax Fodded Fole Beans, 11 is medium early, and of excellent quality in medium early, and of excellent quality in the control of 
#### White Dutch Caseknife

A medium late variety, very productive, with pods 8 inches long, containing 7 to 8 pure white seeds. This variety is very largely planted all over the country and is mostly used for green or dried shell Beans which are of spiendid quality. Postpaid, pkt, 8et ½ lb. 18e: lb. 34e.

#### Scarlet Runner

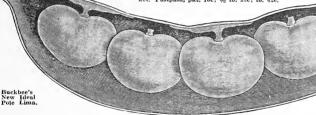

Good for snaps and for green shelled Beans, often used in place of Limas, Mostly used, however, as an ornamental climber, the plants bearing large sprays of brilliant scarlet flowers which are twice the size of common Bean blossoms. Post-paid, ptt. 8c; ½ lb. 22c; lb. 40c.

#### White Creaseback

Valuable for its extreme earliness and its habit of ripening all of its pods within a short time. Very prollific, bearing round, fleshy pods in clusters of 4 to 12. Best quality as snaps. Seed small, oad, white, much used for baked beans. Postpaid, pkt. 8e; ½ lb. I/c; lb. 32e.

#### New Striped Creaseback

An extremely early variety with medium sized vigorous vines which are wonderfully productive and bear round, fleshy pods, about 5 inches long, of light green color which are of best quality as snaps. Much used as baked beans. Postpaid, pkt. 8c; ½ lb. 18c; lb. 35c.

#### BEST POLE OR CLIMBING LIMA BEANS

#### Buckbee's Ideal Pole Lima The Largest Podded and Most Prolific Pole Lima Yet Introduced

Vines unusually vigorous, bearing large clusters of broad pods from 7 to 8 inches in length and containing 4 to 6 large Beans of superb quality and rich flavor. This is a medium late variety, a little later than Seibert's Early, but earlier than King of the Garden, and with much larger pods and more productive than either of them. In quality it is unsurpassed and ought to have a place in every garden. It also is the best main crop variety for market gardeners in the Central States. Postpaid, pkt. 10c; 1/2 lb. 22c; lb. 40c.

#### Buckbee's New King of the Garden This Old Standard Market Sort Is One of the Best for Main Crop

It is vigorous in growth and immensely productive. The vine begins to produce pods near the foot of the pole and the bearing scason continues without interruption until frost. The pods are large, numerous and well filled and the Beans are of mammoth size. The handsome pods often attain a length of 5 to 7 or even 8 inches, with five or six perfectly formed Beans in each pod. Postpaid, pkt. 8c; 1/2 lb. 20c; lb. 38c.

#### Seibert's Early Lima

The vine is exceptionally hardy, vigorous and produces pods very early and continues bearing for a long time. In earliness, ease of shelling, size, beauty and quality of green Beans, this variety takes front rank with the best early sorts. Postpaid, pkt. 8c; ½ lb. 20c; 1b. 37c.

#### Large White Lima

Regular strain; pods and Beans of large size. Too late for the North. Postpaid, pkt. 8c; ½ lb. 20c; lb. 35c.

Early Leviathan This Is the Earliest Variety of the Large Seeded Pole Limas

It is a most productive sort and produces pods which are from 5 to 5½ inches long and contain four to six very large seeds, which are quite white, with a slightly greenish tinge, and are of the finest quality. It is excellent for either home or the market. We especially recommend this variety for the Northern States, where, on account of the short season, it has been hitherto impossible to grow this luscious vegetable. Postpaid, pkt. 8c: 1/2 lb. 22c: lb. 40c.

Levletham.

# TABLE BUCKBEE'S BEETS

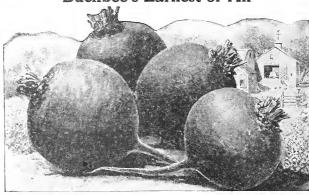

Buckbee's Earliest of All

#### Extremely Early

As early as the earliest; makes good crops in less than seven weeks from sowing.

#### Of Beautiful Appearance

#### THE BEST STOCK CARROTS

Every farmer should plant a few acres of Carrots for stock food; they are very productive, less liable to disease than many other root crops, and being sown earlier do not interfere so much with the labor in the busy time. They can be stored over Winter like Potatoes. Make excellent nutritive feed for all stock. Horses are very fond of them and they increase the flow of milk in cows, improve the quality of butter and give it a beautiful golden color.

#### Buckbee's Champion The World-Beating Stock Carrot

Buckbee's Champion is not, properly speaking, a table Carrot, although the flesh is remarkably firm and sweet. But it is most emphatically a Stock Carrot for the farmer and stock raiser, and once used nothing will take its place. It is the heaviest cropping variety grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. The roots are of medium size, very broad and heavy at the shoulder and are therefore easily harvested. They frequently measure 15 to 20 inches in circumference and 25 to 50 tons per acre is not an extravagant statement as to yield. Our own growth, Choicest Northern Home-Grown Pedigreed Stock Seed. Pkt. 6c; oz. 10c; 2 oz. 15c; 1/4 lb. 25c; 1/2 lb. 40c; lb. 75c.

BICKBEE'S IMPROVED SHORT WHITE—Roots 7 to 9 inches long, smooth, very heavy at the shoulder, having a diameter of 3 to 4 inches, but taper regularly to a point growing almost excellent flavor. Pkt. 5c; ex. 10c; 2 cz. 15c; ½, 1b. 25c; ½ lb. Ada: 1b. 76c.

40c; 1b. 70c.

BUCKBEE'S MAJESTIC—The largest, heaviest cropping and most nutritious yellow variety. The roots are of excellent quality, possessing high feeding qualities. Pkt. 5c; oz. 10c; 26; 13c; 3; 1b. 25c; ½ lb. 40c; lb. 65c.

LANCE WHITE VOSCES—A field Carrot especially suited for soils that are very face. One of the very best for cattle feeding. Pkt. 5c; oz. 10c; 2 oz. 5c; ½ lb. 55c; ½ lb. 40c; lb. 65c.

MAMMOTH WHITE BELGIAN-Splendid variety for fattening stock. The roots are mammoth in size and very productive, often yielding ten tons roots per acre. Pkt. 4c; oz. 8c; 2 oz. 12c; ½ lb. 20c; ½ lb. 35c; lb. 55c.

MAMMOTH YELLOW BELGIAN—Identical to the White Belgian except in color. Pkt. 4c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

**BUCKBEE'S CARROTS** 

Feet Long. Four to Five Pounds Will Sow an Acre. BUCKBEE'S EARLIEST GARDEN

The Earliest Variety in Cultivation and Best for the Table.

Tops small, finely divided. The reddish orange colored ots are nearly round with a groove about the crown and when fully matured they are about two inches in diameter, but they should be used before they are full grown, when they are tender and delicious. Much used for forcing, and pulled when they have only 4 or 5 leaves. Pkt. 6c; 21 log; 2 ez. 18c; ½ lb. 30c; ½ lb. 55c; lb. 51.06. etc.

#### BUCKBEE'S GOLDEN BALL FORCING

Standard Extra Early Forcing Carrot. Nearly round roots of yellowish brown color: smaller than the foregoing, and not quite so early. Best for use when young. Pkt. 6e; oz. 10e; 2 oz. 18e; ½ 1b. 30e; ½ 1b. 50e; young. E

A good variety to grow for the market.

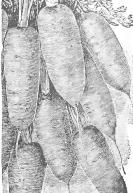

A good variety to grow for the market.

A favorite for early croy; a little later than Early Golden Ball. Color deep beautiful orange; has a short, stump-shaped root about 3 inches long, large at top, therefore easily pulled. Pist. Sc; oz. 10c; 2 oz. 10c; 3 oz. 10c; 3 oz. 5c; 4b. 5cc th. 55cc

This is one of the best early Carrots in existence, one which market garden-

This is one of the best early Carrots in existence, one which marker gardeners should plant for their main early crop; it matures between Ox Heart and Danvers. The Carrots grow about 6 inches long, are stump-rooted, very smooth, deep red, fine grained, sweet and sugary, and not apt to crack open while growing. An excellent table sort and a heavy cropper. open while growing. An excellent table sort a Our seeds most carefully selected. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ 1b. 25c; ½ 1b. 45c; 1b. 85c.

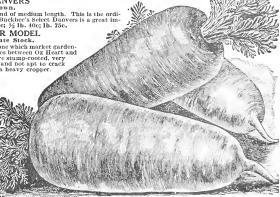

#### BUCKBEE'S PRIDE of the MARKET Early, Long, Rich Golden Yellow, Splendid Quality, Fine Yielder.

A large, handsome, main crop variety. Roots A large, handsome, main crop variety. Roots grow ten to twelve inches in length, very broad at the neck, tapering evenly to the small tap root. Grows smoothly and uniformly; flesh tender, sweet and entirely free from woody coarseness. Unsurpassed for table use and most valuable for market purposes. Pkl. 5c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. 55c; lb. 51.00.

#### IMPROVED LONG ORANGE

The Best Keeper.

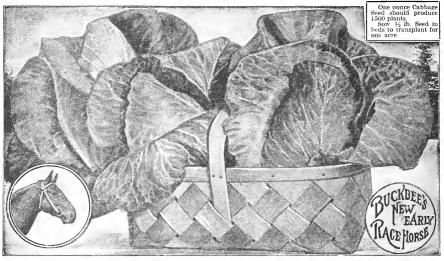

The most popular of the older sorts for farm use on mellow soil. Roots proportionately shorter than the Long Orange and smoother. Fine table quality but also much planted for feeding, being very productive. Pkt. 5c; ož. 10c; 2 oz. 16c; ½ 1b. 25c; ½ 1b. 40c; 1b. 65c.

New Early Chantenay or Model.

#### BUCKBEE'S RELIABLE CABBAGE SEED

EXTRA EARLY POINTED HEADS

#### BUCKBEE'S NEW RACE HORSE

Absolutely the earliest Cabbage in cultivation, Indispensable to the market gardener

tion. Indispensable to the market gardener for his very earliest crop. Buckbee's Race Horse is ready for use in sixty days from the sowing of the seed— that is ten days earlier than Jersey Wakefield or Lightning and other so-

field or Lightning and other so-called earliest sorts of other seedsmen. The plants are very hardy and can be set out very early; they are always sure to head, making good sized, solid and firm pointed heads, which, though a little smaller than Jer-sey Wakefield, are always marketable and being the first in the market bring high prices. There are but few outer leaves and the plants may therefore be set closely together, they will then yield large crops, and as many as 14,000 heads have been many as 14,000 heads have been grown of this variety on one acre, which brought a larger profit per acre than later and heavier varieties. The heads, are very attractive in appearance, of splendid quality, tender, fine grained and of sweet, delicious flavor.

Some space should be given in Some space should be given in every garden to this variety, as coming ahead of every other kind, it is bound to make money for the market gardener, and its sweet, delicate flavor will bring a wel-come change from the coarse winter sorts

Come change from the coalse which are for the table.

We control the entire stock of this earliest of all Cabbage. Pkt. 10c; oz. 40c; 2 oz. 75c; ½ lb, \$1.25; ½ lb. \$2.25; lb. \$4.25.

#### BUCKBEE'S SELECTED TRUE EARLY JERSEY WAKEFIELD

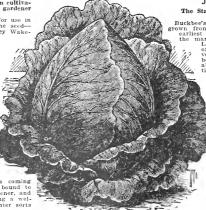

The Standard Extra Early Cabbage in Cultivation.

Cultivation.

Buckbee's stoke of Jersey Wakefield is bwn from selected heads only and is the earliest and finest strain of this variety in the market; it is sold by others also as Lightning. It forms fine solid heads very few outside leaves, and of the best quality. The seed is remarkably pure and always gives satisfaction. Buckbee's Jersey Wakefield is about ten days later than Buckheld is about ten days later than Buck heads and is much more productive. It is the variety mostly planted by market gardeners for the bulk of their extra early 50 feb. 14, 0, 55c; 14, 15, 83.00.

#### CHARLESTON OR LARGE WAKEFIELD

A splendid strain of Jersey Wakefield, about a week later, with heads twice as large, weighing from 8 to 12 pounds each and more, and not so charleston Wakefield, is a good keeper and may be planted as a second ropper or mature in a second ropper or mature to the second second to be a secon splendid strain of Jersey

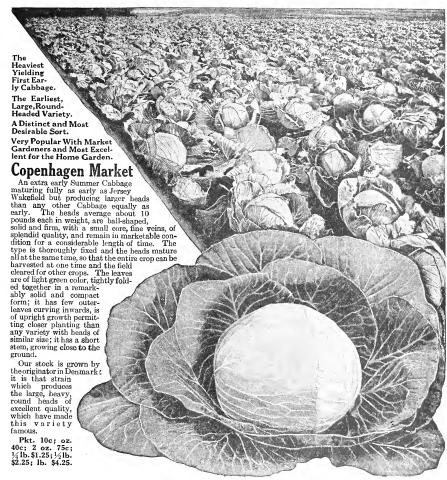

Buckbee's Selected True Early Jersey Wakefield.

#### EXTRA EARLY WINNINGSTADT

A very fine header and will grow a hard head under circumstances where most sorts would fail. It will stand more frost, drought, wet, insects and diseases than any other early Cabbage. Plants very compact, with short thick leaves. Heads regular, conical and very hard. It is the latest of the pointed varieties. Pkt. 5c; oz. 25c; 2 oz. 40c; 1/4 lb. 70c; 1/2 lb. \$1.30; lb. \$2.50.

# BUCKBEE'S "FULL OF LIFE" CABBAGE SEED

EXTRA EARLY FLAT AND ROUND HEADS

#### Early Spring

The Earliest Fig.1-Headed Variety of the same weight but different in shape, being flat, slightly rounded. They are Intensely solid, of vivid green color, with short stems and but few outer leaves. Small heart, fine veins. flavor delicious. Pkt. 5c; oz. 25c; 2oz. 40c; ½ lb. 70c; ½ lb. 8.130; lb. 8.250;

#### Enkhuizen Glory

Very early, 10 days later than Jersey Wakefield but heads twice as heavy, ball-shaped, thin ribbed, very firm, splendid keepers and of excellent quality. The color is a pale green. In appearance the heads are those of a small Danish Balthead. The plants grow very uniform in size and shape, are always sure to head. Pkt. 8c; oz. 35c; 2 oz. 60c; ½ lb. \$1.15; ½ lb. \$2.00; lb. \$3.50.

#### All-Head Early

A sure header Muture at the same time as Bakhuizen Glory. The plant is common at the key of the same time as Bakhuizen Glory. The plant is common at the level outer between stem short Head very large for so carry a variety, very solid, dat, but very deep and uniform in size and shape. Well adapted for krist, by planting late it can be used also as a Winter Cablage. The strain is the threat Pkt, fier oz. 25c; 2 oz. 15c; ½ lb. 80c; ½ lb. \$1.37 lb. \$2.55.

#### Buckbee's Early Greenback

If a gardener will plant but one kind of Cabbage hits is the constant of the c 95c; ½ lb. \$1.70; lb. \$3.00.

Some Cabbage will do, others please, but Buckbee's Early Large New Queen has satisfied and made more money for Cabbage growers throughout the country during the past nearly half a century than any variety ever offered.

Unquestionably it is the finest bred and earliest of the very large (weighs from 17 to 25 pounds) Cabbages and the most solid headed, thoroughbred of this class. It is a dwarf, compact grower, allowing close planting, a sure header, most uniform in growth, beautiful in appearance, free from coarse veining of the leaves, of much better quality than the big ribbed Winter sorts; in fact, it possesses all the fine qualities of the best early varieties, it is unexcelled in flavor and always the leader in every market. Practically every plant will form a very large, solid head and will mature earlier than any variety of equal size. It is suitable for every growing season; in the

South It is considered the best Cabbage for Fall planting, remarkable hardiness and vigor make it the safest Cabbage to plant. It is good for use in Summer, Fall and Winter. The heads become solid and eatable long before they are fully grown, and they will stand well without splitting long after they are fully developed, making them available for use over a longer season than any other kind we know of. It has been proven wherever grown in every way superior to all other Summer Cabbages.

If you want the best early Cabbage, plant Buckbee's New Early Large Queen and you will not be disappointed. We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Queen." Order early.

Pkt, 10e; oz. 40e; 2 oz. 75e; 1/4 lb. \$1.25; 1/2 lb. \$2.25; lb. \$1.25.

#### SECOND EARLY CABBAGES

Buckbee's Rockford Market.

#### BUCKBEE'S ROCKFORD MARKET

A Fine Second Early Cabbage.

A Fine Second Early Cabbage.

It has the peculiarity of heading firmly at an early stage in its growth so that the finest Cabbage can be obtained long before it has attained its natural size. Its uniformity in shape and large yield per acre render compact form and good quality make it also one of the finest of the second early Cabbages for the home garden. It is about a week later than New Queen. Pkt. 10c; oz. 28c; 2 oz. 50c; ½ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

#### BUCKBEE'S EARLY MARVEL

The heads are extremely hard and solid, round, flattened on top and ready to market fully as early as Early Summer, but larger, It is as good for Autumn or Winter as for early Summer, Pkt. 10e; oz. 28e; 2 oz. 50e; ½ lb. 95e; ½ lb. \$1.70; lb. \$3.00

#### GREGORY'S ALL SEASONS

Nearly as early as Early Summer, but considerably larger in size and one of the largest and most desirable of the second early varieties. The heads are large, nearly round, extremely hard and solid, with finely ribbed leaves; the eat-ing quality is not excelled by any other Cabbage and is far better than that of the big-ribbed Winter sorts, and considcred one of the best for kraut. It is suited to all growing seasons, is a sure header under most adverse conditions, header under most adverse conditions, and keeps well even if planted very late. Remarkable for its ability to stand the hot sun and dry weather, remaining an exceptionally long time in condition for use. Our strain is the finest on the market. Pkt. 5c; oz. 25c; 2 oz. 40c; 24 lb. 70; 24 lb. 81,82 lb. 82.80; lb. 82.80.

#### SUCCESSION

A great favorite with market gardeners. About two weeks later than New Queen, a sure cropper and long keeper. The heads are very large, deep, solid and firm, of a beautiful light great color and free of all coarse veining; they run very uniform to the control of the control o 2 oz. 35c; 1/4 lb, 60c; 1/2 lb. \$1.15; lb. \$2.25.

HENDERSON'S EARLY SUMMER Standard Midsummer Variety.

This variety is deservedly popular with the market gardeners. It forms large, solid, round, flattened, compact heads of excelent quality, which average more than double the size of the Jersey Wakcfield, while it matures only ten days later. Pkt. 5c; oz. 20e; 2 oz. 35e; 1/4 lb. 60e; 1/2 lb. \$1.15; lb. \$2.25.

# Buckbee's "Full of Life" Cabbage Seed

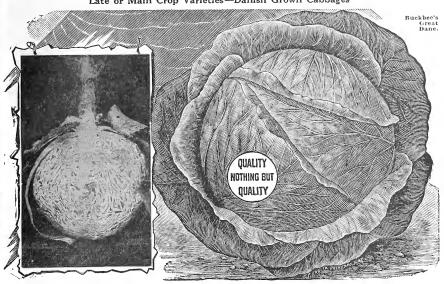

larger crop per acre than most sorts and will then produce a larger crop per acre than any other variety. It is the best Winter keeper; there is no other variety which maintains its fresh appearance so long after it has matured. It is also the best for kraut. Buckbee's Christmas King is the finest late Cabbage Lown today, for the market for shipping autority for many years, but improved it continuously and it is today better than ever.

There is big money in Cabbage, but your harvest depends on the seed you sow. Always remember that the seed is the cheapest thing about your entire crop, therefore buy the best regardless of price, buy reight varieties, and varieties that have been tried out and yield bumper crops in the North, South. East and West. These are Buckbee's Early Queen and Buckbee's Christmas King. We control the complete stock of Christmas King and offer the choest "FULL OF LIFE" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Christmas King."

The leaves are deep fully very wide and overlapping each other forming tight, compact heads which are all very uniform in size and in time of maturity, and are of the most delicious flavor, crisp and sweet. It never bursts has but few outside leaves and can be planted closer than most sorts and will then produce a larger crop per acre than any other variety. It is the best Winter

# BUCKBEE'S "Full of Life" CABBAGE SEED

Late or Main Crop Varieties-Danish Grown Cabbages

#### Buckbee's Great Dane

The Hardest Headed Late Cabbage. The Gardener's Favorite, the Best Shipping and Longest Keeping Cabbage.

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply, and always at a price far above the ruling market rate. To see to the source of this supply I sent an expert to Demmark, who after careful inspection of the Cabbage-growing localities on the Island of Amagar the GREAT DANE Cabbage, which he considered by far the finest and most preductive of all the types a strains of the Ball Head Winter Cabbage grown in Demmark, and he contracted with its originator for all the seed he could supply.

I have handled his stock now for many years, have supplied annually large quantities of it to the Cabbage growers of this country and every year the orders for it show an enormous increase over those of the previous one; proving without doubt the better adaptability to our climate and the great superiority in many other respects of the GREAT DANE to other similar types.

NAME to other similar types.

I give herewith the description of this great Cabbage—by the originator, Mr. Torgeson: "For more than twenty years I have worked in perfecting this variety. The stem is medium sized, heads are almost as rounded as half of good size, perfectly solid, very fine grained, of the best quality. But the stem is not as a size of the size, perfectly solid, very fine grained, of the best quality. But the size of th

We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed (grown by the originator in Donmark), at the following reasonable prices. Send to Buckbee for the true "Great Dane,"

New Dutch or Pickling

Raised extensively for pickling purposes. Always the first of the Red Cabbages in market. Small, handsome, hard heads of blood-red color and of the finest quality. Average weight, 8 pounds. Pkt. 6c; oz. 28e; 2 oz. 50c; 14, 1h. 95c; 14, 1h. 81.70; 1h. 83.00.

#### Mammoth Red Rock

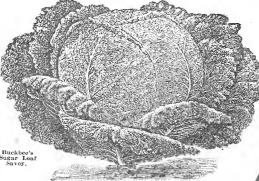

One of the finest Red Cabbages on the market. Heads average over 10 pounds each, and are always of rich red color, very solid and of excellent flavor. Always sure to head. Try lt. Fkt. 6c; or. 30c; 2 or. 55c; ½ lb. \$1.00; ½ lb. \$1.80; lb. \$3.25.

#### New Red Polish

The Best Red Cabbage for Pickling or Table Use,

The Best Red Cabbage for Ficking or Table Use.

This New Red Cabbage is a vigorous grower and quite hardy. The heads are of a dark red color, and are extremely firm and heavy. The outside leaves are somewhat crumpled at the edges, giving the plant a pleasing and rather ornamental appearance. It is the largest and surest heading Red acquainted, and will push is the most profitable red sort with which we are acquainted, and will push is the most profitable red sort with which we are acquainted, and will push is the most profitable red sort with which we are acquainted, and will push is the most profitable sets for soverex, cook and pickle-maker. Pkt. 8c; oz. 35c; 2 oz. 55c; ½ 1b \$1.20; ½ 1b \$2.315; 1b \$3.75.

#### Buckbee's Chinese or Celery Cabbage

A new, most delicious vegetable which should be in every garden and which is one of the most profitable crops to grow for the market.

Although introduced in this country not very long ago, already hundreds of carloads of it have been grown last year in Florida, California and other states and shipped to Eastern markets. It is offered now in the markets of all large cities and has proven a source of great profit for the grower, yielding three times as much as any other early Cabbage and selling at 10c to 15c per pound when other Cabbage early canonage and setting at the to for per pound when their canonage brings only \$12.90 to \$15.00 per ton. Yields in Florida are reported to have been about 30 tons per acre. This vegetable, I believe, is destined to have a wide sale, and whoever grows it will be surprised at the great demand that already exists for it.

The Chinese or Celery Cabbage belongs to the Cabbage family; when young it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, weigh often 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and has a distinctive flavor very delicate and pleasant; every leaf, including the outside ones, is tender and eatable.

It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French dressing it makes a splendid cold slaw. It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower.

Chinese Cabbage thrives well in any good soil, but low, moist and even wet ground is the best suited. The seed is like Cabbage seed, and it should be treated like late Cabbage, sowing during July; early plantings are likely to run to seed in hot weather. The seed is sown in drills about 20 inches apart and the plants thinned out to stand 15 thinkes apart in the rows; if grown for the market start seed in boxes and transplant, Cultivate the same as Cabbage. It will not stand frost and for Winter use it should be stored in a cool, frostproof cellar.

Our seed is Chinese grown, which is the only reliable stock for good solid heads. Prices, postpaid, pkt. 10c; oz. 25c; 2 oz. 45c; 1/4 lb. 75c.

For Cabbage Plants See Page 88

## Savoy Cabbages

Savoy Cabbages have crimped leaves and are more tender, of milder and sweeter flavor than the smooth-leaved varieties; their flavor will imquality to Cauliflower and make a constant of the continuous continuou

#### Improved American Savoy

Adapted for private use. Grown in fall and allowed to be touched by frost, it is one of the most delicious of all vegetables. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 80c; ½ lb. \$1.0; lb. \$2.00.

#### Buckbee's Sugar Loaf Savoy

This improved variety is the very best of the Savoys for home use or the market. Most attractive, matures early, hardest headed. Plants vigorous, densely crumpied and very sure heading. Blanches beautifully. Pkt. 5c; oz. 25c; 2 oz. 40c; 4 lb. 78c; ½ lb. 81.30; lb. \$25.0.

Buckbee's Chinese or Celery Cabbage.

#### BUCKBEE'S EXTRA EARLY CHIEF CAULIFLOWER

The Earliest Grown—A Sure Header—Drought Resister—Large Solid Heads of Snowy Whiteness

The best variety for either market or family purposes, by far the earliest and surest large header and the most profitable grown. The greater part of Cauliflower seed offered is of European growth, but after years of careful study and perseverance we are able to offer this thoroughbred American variety—"CHIEF." It is of very compact growth, with year where table to the property of the property o

with very short stalks. The plants can be set very close together, and the leaves growing upward naturally protect the heads, which are handsome beyond description, measuring fully 12 to 15 inches across, and even more under careful cultivation; they are pure snow-white, very close, compact and of the most superior quality. The heads being so extremely solid and deep, weigh heavier than any other early variety.

It can be used for early or late planting, for forcing or the open ground; used any way, I recommend it with the full assurance that it will give entire satisfaction and that it is not surpassed by any other variety in earliness and sure heading quality.

In no vegetable is there so vital a relationship between seed and crops as in the Cauliflower. I make Cauliflower a specialty and I know Extra Early Chief will never fail to please the most exacting; it is a thoroughbred, pedigree-strain, the grandest, large-heading, early Cauliflower ever grown. I have sold it for years, supplying the largest Cauliflower growers with it in every part of this country and have received nothing but praise from everybody.

Comparative tests have proved conclusively that Buckbee's Chief matures earlier, is a surer and heavier cropper and produces more marketable heads per acre than any other Cauliflower of equal size. No grower of Cauliflower need fear the outcome of the crop if he is relying on this superb, world-beating variety.

#### BUCKBEE'S "FULL OF LIFE" CAULIFLOWER-Cont'd

Buckbee's Early Favorite.

#### BUCKBEE'S EARLY FAVORITE Very Popular, Very Large, Easily Grown.

A son division and a son nave talled to thrive. Of dwarf growth, with short outer leaves, and it is required that prove yet failed by increasing popularity is due entirely to its real merit and not to any special effort in its behalf. Give it a trial and we are sure you will never have reason to complain of the results. Pkt. 8e; ½ oz. 80c; oz. \$1.40; 2 oz. \$2.50; 1/4 lb. \$4.50.

#### TRUE EARLY SNOWBALL, Pedigree Seed

IRUL EARLY SNOWBALL, Pedigree Seed

Certainly a fine variety, a great favorite with market gardeners and a standard throughout the country; very early, close growing, of compact habit; is well adapted for forcing under glass during winter and spring. The heads are large. For early or late planting, for the family or the market garden this variety local market garden the variety can have been described and it is not quite so large. We have the finest strain of the Snowball in the country; this can be attested to by our many market gardener customers who used it for many years with great success. Pkt. 10c; ½ oz. \$1.25; oz. \$2.25; 2 oz. \$4.00; ½ 1D. \$7.50.

#### EXTRA EARLY DWARF ERFURT SELECTED

Remarkable for reliability of heading; dwarf; solid pure white heads of superior superior with the superior with many; Snowball and Buckbee's Chief are highly developed strains of this variety and produce somewhat larger heads earlier in the season. Pkt. 10; ½ 0.2 S.100; 20. S.1.55; 2 0.2 S.5.50; ½ 1b. S.6.75.

#### EXTRA EARLY PARIS

An extra early variety, useful for Spring planting. Heads of medium size with narrow and straight leaves; they are snow white and of fine quality, but not as large nor as firm as the Erfurt type of Cauliflower. Dwarf habit, Pkt. Se; ½ 0z. 40c; 0z. 75c; 2 oz. \$1.45; ½ lb. \$2.75.

#### LE NORMAND'S SHORT STEM

Sure Heading Standard Late Variety.

Sure meaning Standard Late Variety.

The very best large late variety grown. Sure to please. Curd is well protected by broad, short leaves of deep green color; the stems are extremely short and stout. Head very large, solid, pure white and of superb quality. It is very hardy, stands drought very well, and also frost. It is a sure header, Fine in every way. Very popular with market gardeners. Well be Toady for use in about 120 days from sowing. Pkt. 8e; ½ oz. 40e; oz. 75c; 2 oz. \$1.5; ½ b. \$2.75.

#### CAULIFLOWER PLANTS

Ready about March 25th - See page 88 for Prices

# BUCKBEE'S "FULL OF LIFE" CELERY

#### BUCKBEE'S ALL HEART

Crisp and Brittle-Rich Golden Color-Exquisite Nutty Flavor.

The latest and best creation in Celery. Originated on Rockford Seed Farms after years of careful trial and experiment and has given unparalleled satisfaction in every part of the country. It is the earliest of the Winter Celeries-ready for use about 14 days later than the early self-blanching sorts listed on page 28. It is a very showy sort, with very broad, medium sized stalks, of fine ivory-white color and a rich golden heart. Crisp, tender and brittle. The flavor is delightfully rich and nutty. This is the best celery for Winter storage. It is unsurpassed for the professional Celery grower, the home and market garden. We control the entire stock of Buckbee's All Heart Celery. Pkt. 10c; oz. 35c; 2 oz. 60c; 1/4 lb. \$1.15; 1/2 lb. \$2.00; lb. \$3.50.

#### BUCKBEE'S GENUINE GOLDEN HEART

Original Private Stock. This variety is of a short, stocky growth with a large heart which blanches An old, very popular, longa beautiful golden yellow, and is crisp, brittle, tender and of fine flavor. A keeping sort. Pkt. 5c; oz. 20c; 2 oz. 35c; 1/4 lb. 60c; 1/2 lb. \$1.10; lb. \$2.00.

#### BUCKBEE'S PERFECTED KALAMAZOO

It is an acknowledged fact that more good Celery is grown in the famous "Kalamazoo Celery Fields" than anywhere in the country. For years our heaviest sales of Celery Seed have been in that section, and we have devoted much time to the improvement of the justly celebrated variety grown in that section, and Buckbee's Perfected Kalamazoo will be found greatly superior to the old strain. The stalks are quite thick, solid, crisp and of creamy-white color, growing very uniform in size and shape. It is profitable alike for market or family use. There is no waste in preparing it for the table. Pkt. 6e; oz. 35e; 2 oz. 60e; ½ lb. \$3.10; ½ lb. \$3.10; lb. \$3.50;

#### GIANT PASCAL OR WINTER KING RE-SELECTED STOCK SEED

A selection from the Golden Self-Blanching, and adds to the general good qualities of its parent, superior keeping qualities. The stalks are short, broad, heavy, thick, solid, crisp, and of a rich nutty flavor, free from any trace of bitterness. They blanch to a paper whiteness of our Winter Celeries, Pkt. 5c; oz. 20c; 2 oz. 35c; ½ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

#### WINTER QUEEN

A very popular sort, and an excellent winter keeps: with short, broad and extra heavy stalks; or compact growth, with very large heart. Elanchese easily and quickly, Crisp and delicious auty flavor. As a late Winter keeper it is unsurpassed. It is worthy of a place in every garden and is a said with the property of t

### BUCKBEE'S "Full of Life" CELERY

### BUCKBEE'S GOLDEN YELLOW SELF-BLANCHING Originator's French Grown Seed.

This is the strain used by gardeners and extensive growers in every large Celery district in the United States. No other strain of seed gives such universal satisfaction, and it is without question the most popular and dependable early strain of Celery grown. The plants are medium sized, stocky, and the stalks crisp, solid, heavy and of a yellowish-green color when young, but as they mature the inner stems and leaves turn a beautiful golden yellow, which adds much to their attractiveness and makes the work of blanching much easier. The handsome color, crispness, tenderness, freedom from stringiness and fine nutty flavor of this variety make it only necessary to be tried in order to establish it as the standard of excellence as an early sort. Pkt. 10c; oz. 65c; 2 oz. \$1.15;  $\frac{1}{4}$  lb. \$2.15;  $\frac{1}{2}$  lb. \$4.10; lb. \$8.00.

Select American grown seed. Pkt. 8c; oz. 45c; 2 oz. 80c; 1/4 lb. \$1.50; 1/2 lb. \$2.75; lb. \$5.00.

### PERFECTED WHITE PLUME

Is too widely known to require extended description. We will only say that we have not yet found, a strain that is as early and of as good a flavor, crisp and tender, as our selection of this sort. It is unsurpassed for Fall and early winter use. Pkt. 5c; oz. 25c; 2 oz. 40c;  $\frac{1}{2}$  lb. 73c;  $\frac{1}{2}$  lb. \$1.30; lb. \$2.50.

#### NEW COLUMBIA Buckbee's Perfected Strain.

An early maturing sort, only a few a few days later than Golden Self-Blanching, and unsurpassed

in shape and quality. The plant is of medium height, but very stocky and heavy. The stalks are thick, almost round, resembling in shape those of Giant Pascal, but the color has in it more of the rich yellow tint of Golden Self-Blanching which variety it resembles very much in appearance when trimmed and bunched for the market. Pkt. 8c; oz. 35c; 2 oz. 60c; 1/4 lb. \$1.15; 1/2 lb. \$2.00; lb.

### BUCKBEE'S "FULL OF LIFE" CELERY SEED

Is noted the World over and is planted by the largest, most critical and successful celery grow-ers in the United States.

### CELERIAC, OR TURNIP ROOTED CELERY

Celeriac is grown for the bulbous roots, which are excellent for stews, soups. and salads

NEW DELICATESS-Root turnip-shaped; much larger, smoother and of more tender, sweeter taste, stronger flavor than other varieties. Pkt. 10c; oz. 40c.

LARGE ROOTED GIANT PRAGUE—Improved form of turnip-rooted Celery, producing large and smooth roots, almost round; few side roots. Large green foliage. Pkt. 5e; oz. 25c.

#### CELERY SEED FOR FLAVORING

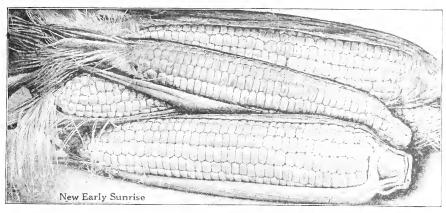

Oz. 8c; 2 oz. 12c; 1/4 lb, 20c; 1/2 lb, 30c; lb. 45c.

\$3.50.

# The Best First Early Sweet Corns

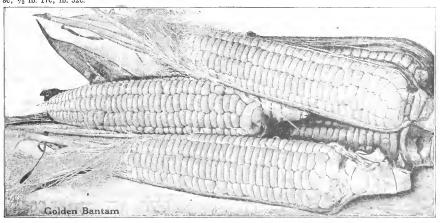

## Buckbee's New Early Sunrise Absolutely the Earliest Good Sweet Corn

The beauty and quality of this remarkable variety give it prominence over all others for family, market, canning, shipping, and, in fact, all purposes. Ears large (the fat kind), grains of great depth, exceedingly tender and sweet, the sort that fairly melts in the mouth. Something in Sweet Corn that makes everybody talk Early Sunrise as the very best introduction to present date. Our seed stock is carefully grown and selected with the sole object of keeping it up to the highest standard of excellence as the earliest, largest and best on record. This is a very distinct variety, which was originated many years ago by a market gardener in northern Iowa. It always proved with us earlier than any other so-called extra early variety of other seedsmen. The ears are about 6 inches long, 10 to 12-rowed; they are very uniform and handsome and have a small white cob. Postpath, pkt. 10e; ½ lb. 20e; lb. 35c.

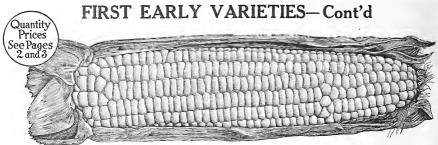

### Golden Bantam

A very early Sweet Corn, about ten days later than Sunrise; more hardly and can therefore be planted earlier than most other sweet corn. It grows 3½ to 4 feet high, produces two or more ears to the stalk; the ears, which are 6 to 7 inches long and covered with eight rows of golden yellow grain, are very tender and of exceptionally rich and delicious flavor. Golden Bantam has a distinct taste and many people prefer it to all other varieties. Market gardeners will find it a well-paying crop wherever it has been tried. Our stock has been carefully selected. Postpaid, pkt. 8c; 1/2 lb. 17c; lb. 32c.

# BUCKBEE'S PEDIGREED SWEET CORN

#### Buckbee's First of All.

### Buckbee's First of All

Extra Early Large Size, Heavy Cropper, Sweet and Tender

Comparative tests made by Sweet Corn experts throughout the country as well as at Rockford Seed Farms have proven it to be from three days to a week earlier than Cory, making it very desirable, not only for family gardens, but an especial boon to market gardeners who desire to have the first Sweet Corn in market. Ears are of good size, well filled with large gralas to the very tip. Many of the ears contain from ten to twelve rows, while the Cory generally has only eight rows. In habit of growth it excels all other early varieties, being stocky and exceptionally vigorous. The quality is excellent and surpassing sweet. Postpaid, pkt. 8e; ½ lb. 16e; lb. 30e.

### Mammoth Early White Cob Cory

A very fine extra early variety, but somewhat later than Buckbee's Early Sunrise, and is very largely planted by market gardeners to follow this variety; it has proven a well-paying crop for them

Mammoth Cory is a selection from the old White Cob Cory, but its ears are 12-rowed and the kernels sit very close together, so that there is no lost space on the cob. The grain is large, broad, very white and of sweet, delicious quality. The plant are vigorous growers of medium height and are very prolific, this is a finely bred sweet corn with handsome, symmetric ears and is worthy a place in every garden. Postpaid, pkt. 7c; 42 lb, 16c; lb, 28c,

### Buckbee's Best of All

Early, prolific, sweet, tender, large, handsome. "Best of All" is of exceptionally stocky growth and an abundant and satisfactory yielder; ears of large size; kernels very broad and espender of the stock of the st

### Peep o' Day

Very early small-eared variety. Stalks grow three feet high, have few leaves and produce generally more than one ear to the stalk. Ears small, measuring not more than five inches long and filled from but to tip with ten rows of small grains of a very sweet flavor. Much grown in the Northwest; not quite as very sweet flavor, as large as Sunrise. Postpath, pkt. 75; 72 Db. 165; 10, 28c.

### Extra Early Cory

One of the most popular varieties and extra early. Ears of good size, well filled to the very tip with eight rows of broad kernels of excellent quality; vigorous grower; about four feet high. Postpaid, pkt. 7c; ½ lb. 16c; lb. 27c.

### Early Crosby

A most excellent variety, remarkably early and of the best flavor. Ears of medium size, 12 or more rowed, grain very thick and sweet. Largely grown for canning. Pkt. 7c; ½ lb. 16e; lb. 28c.

### Early Minnesota

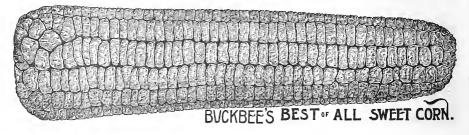

This popular variety is one of the best early sorts for the market and the private garden. By careful selection we have developed a stock which is remarkably uniform, and in which all the good qualities are intensified. The stalks are about six feet high, bearing one or two ears which are about 8 inches long, 8 rowed and have very broad, white, sweet and tender kernels. Pkt. 7c; ½ 1b. 15c; 1b. 27c. –

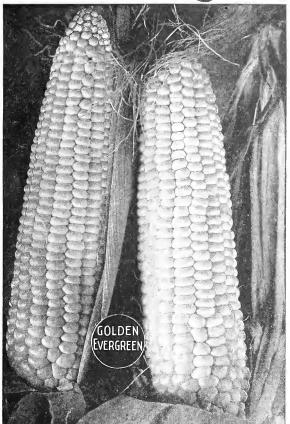

### Kendall's New Large Early Giant

Ears large and long; 10 to 12 rowed. Kernels white, sweet and tender. Very desirable for both market and family purposes. Postpaid, pkt. 7c; ½ lb. 16c; lb. 28c.

### Improved Adams Early

While not a Sweet Corn, this is a tender corn often used for the table, particularly in the South The care are about? inches long, 12 to 14 rowed and the kernels are white, somewhat deeper than broad and indented at the outer end. The stalks are about six feet high. Can be planted earlier than any Sweet Corn. Pit. 7c; ½ lb, 15c; lb, 25c.

# BUCKBEE'S NEW GOLDEN EVERGREEN

The Sweetest Corn Ever Eaten

The Greatest

Sweet Corn Yet Introduced

### The One Best Sweet Corn

BUCKBEE'S GOLDEN EVERGREEN is the result of a cross between white Evergreen and Golden Bantam, and proved to be a happy and complete blending of each kind, combining the deliciously sweet green habit of the White Evergreen; those who tasted it say that it outclasses the parent sorts in sweetness and tenderness. It is a true Evergreen, as the ears remain evergreen and edible for many weeks.

BUCKBEE'S GOLDEN EVERGREEN is ready for the table about five days after Golden Bantam, but the ears are much longer than those of that sort, being intermediate in size between those of its term of the stable of t

BUCKBEE'S GOLDEN EVERGREEN is of the right size, nice appearance and considered by all who thed it the sweetest Corn ever caten. It is sure to outstrip in a few years all other varieties in popularity. We believe it is the best allaround Corn and the most desirable one

for the family garden; it is also particularly well adapted for market gardeners having a discriminating trade and has always been sold at a premium, there never having been enough to supply the demand. Pkt. 10e; 3.5 lb. 20e; lb. 35c,

Quantity Prices See Pages 2 and 3

### MEDIUM EARLY VARIETIES

NEW HONEY SWEET

An exceptionally fine variety for second early use, being from one to two weeks later than any extra early varieties. Ears twelve-rowed, medium size, very handsome. Grains of a beautiful creamy white color, deep and cob very small. Fine quality. Postpaid, pkt. 8e; ½ lb. 16e; lb. 30e.

### BUCKBEE'S PEDIGREED SWEET CORN LATE OR MAIN CROP

ountry Gentlemen COUNTRY GENTLEMEN

This variety is often called the "Shoe Peg" Corn, owing to the arrangement of the crowded kernels, which are long and very sweet. Our seed of this variety has been carefully selected and is true to name. It is considered by many the best of the late varieties. It remains tender and fit for use longer than most sorts, as the ear is enclosed in a thick husk, which keeps it "in the milk." Slender, very deep, white, very tender and lusciously sweet. Postpatid, pkt. 8c; ½ lb, 18c; lb, 32c.

STOWELL'S EVERGREEN

The best known and most District the transfer of the varieties. This Corn is distinguished by the large eart the long deep terminists rich, signer flavor and its long keeping qualities. Our seed has been selected for its sweetness, productiveness and large size. No better can be obtained. It is Northern grown. Our strain is particularly fine and our price is very reasonable. Buckbee's Private Stock Evergreen, listed below, is an exceptionally fine early strain of Stowell's. Postguaid, pkt. 8e; ½ lb. 16e; lb, 28e.

MAMMOTH LATE OR SUGAR

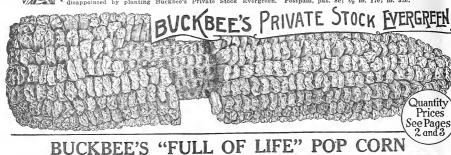

Produces the largest ears of any variety, a single ear often weighing 2 or 3 pounds. Of excellent quality. Very late. Postpaid, pkt. 8c; ½ lb. 16c; lb. 30c.

BUCKBEE'S HICKOX

Postpaid, pkt. 7e; 1/2 lb. 15e; lb. 28c.

BUCKBEE'S PRIVATE STOCK EVERGREEN

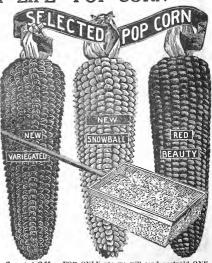

Late, Best for Main Crop. For table use the quality of Buckhee's Private Stock Evergreen Sweet Corn cannot be excelled. It is very tender, sugary and remained the excelled of the cooking. Owing to the best cooking to the cooking to the cooking to the grain should be supported by far the most salable canned corn. The ears are large; the grains long and slender. Earlier and with larger grains than the ordinary Stowells. Outyields all other varieties. Many of our customers reported yields of over 200 bushels of ears per acre. You cannot possibly be disappointed by planting Buckhee's Private Stock Evergreen. Postpaid, pkt. 8c; ½ b. 17c; bb. 32c.

Pop Corn should be found in every garden, especially if there are children to enjoy it during the long Winter evenings which bring young people together for social amusement. Pop Corn pops best when more than one year old, and when well popped it becomes twenty times its natural size; thus a quart and a size that a quart a size that a quart and a size that a size

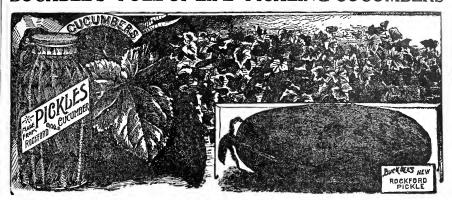

advance of any other variety, ears averaging 6 inches in length. Beautiful shape; the best popper. Postpaid, pkt. 10c; NEW KED BEAUTY—Fine variety. The stalks grow 6 feet high, and average three to four ears each from 5 to 6 inches long and covered with large rice-shaped kernels of a deep red color. Postpaid, pkt. 10c; ½ bb. 25c; lb. 45c. (Details of the stalk of the

1b. 35c. UUCKBEE'S NEW BLACK BEAUTY POP CORN—The Most Dellicious of All—An extra early variety which pops very large and is the most tender and crisp of all. Although the kernels are black, this color does not seem to show at all when popped, being then a pearly white. This new variety has been bred in Wisconsin and is extremely early, ripening so early it may be popped the same season as grown, without kiln drying. Bars about 6 inches long, twelve-rowed; kernels 3000 bt. 300 bt drying. Ea smooth, sha 30c; lb. 50c.

### BUCKBEE'S NEW ROCKFORD PICKLE

Without question the finest variety for pickling, possessing every qualification required of a perfect pickling Cucumber and is four-to-one in productiveness compared with other standard sorts.

It has become a general favorite verywhere and is used exclusively by many pickle factories throughout the country. The trible sof medium size, stender, cylindrica, but high graphics and the soft medium size, stender, cylindrica, but high graphics are consisted dark green color. It is wonderfully even in growth and the trible is the state of 
#### EARLY GREEN CLUSTER

Fruit is of the form desirable for pickling. Extraordinarily prolific, growing in clusters of 2 to 3 Cucumbers. Nothing more desirable for small pickles. If the fruit is kept closely gathered the vines will continue bearing all summer. Pkt. 5c; oz. 10c; 2 oz. 15; ½ bb. 25c; ½ lb. 40c; lb. 75c.

#### BUCKBEE'S INTERNATIONAL

This grand, good, early variety of our own introduction more than pleased all who have tried it. Has no thick ends; of rich, luxuriant growth, an abundant yielder; has beautiful mediumsized fruit always of good, even shape. In flavor it has no superior, always tender and crisp. You should not fail to try it, Pkt, Se; oz. 10e; 2 oz. 18e; ¼ lb. 35e; ½ lb. 65e; lb. \$1.25.

#### EARLY PROLIFIC SHORT GREEN, or EARLY FRAME

A most excellent sort for pickling as well as for slicing, Vigorous, productive plants. Fruit straight, handsome, crisp and tender. Keeps green a long while. Our stock is Al. Pkt, 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 85c.

#### NEW EVERBEARING

The merit of this water that the vines produce fruit continuously using the facts. They exhibit at the same time Cucumbers in every stage of growth, but invariably of perfect form, even when quite small. The fruit is of fine green color and very desirable for pickling. Pkt. 5c; oz. 10c; 2 oz. 18c; 4, lb. 30c; ½ lb. 55c; lb. \$1.00.

#### SNOW'S PICKLING

An early maturing, very small, dark green Cucumber, cyllndricai, square ended and very popular with growers for small pickles. We have been growing this variety ourselves for several years, glving special attention to purity and uniformity of type, and we believe the seed we offer meets the requirements of those who want an ideal bottle pickle. Pkt. 5c; vz. 10c; 2 vz. 10c; ½ lb. 20c; lb. 50c; lb. 90c.

### WESTERFIELD'S CHICAGO PICKLE

A very desirable sort; fruits of medium length, tapering at each end, with very large and prominent spines. The color is deep green. This is a most prolife variety and is very largely grown for pickle factories. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 28c; ½ lb. 50c; lb. 90c.

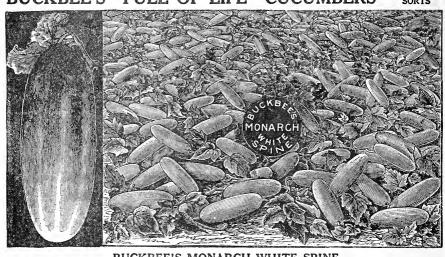

#### BUCKBEE'S NEW EXTRA EARLY LONG GREEN

The Ideal Variety to Plant for General Crop.

Produced by selection from Long Green. Vines vigorous and productive, forming fruit fit for the table nearly as early as the shorter sorts. Fruits often measure 15 to 20 inches when fully matured. They are of fine quality, firm and crisp. Highly valued for slicing. The young fruits make the best pickles, and when ripe are preferable to any rower pickles. Our strain is the finest in the market, producing fruits uniformly long, slender, of fine dark green color and of good form, with the large warts and spines well distributed over the surface. Pkt. 10c; oz. 15c; 2 oz. 25c; 4, 16. 40c; ½ [h. 75c; lb. 75c; lb. 51; 25].

## BUCKBEE'S "FULL OF LIFE" CUCUMBERS WHITE SPINE SORTS

### BUCKBEE'S MONARCH WHITE SPINE

The Most Profitable Cucumber for Truckers' Cultivation. Extremely Early. A True Evergreen. The Greatest Yielder. The Best for Shipping, the Ideal for the Home Garden.

An extra early White Spine Cucumber; fruits are ready to gather only 5 or 6 days later than Buckbee's First Crop, which is the earliest Cucumber grown. But they are much larger, growing usually from 8 to 10 inches in length. They are nearly cylindrical in form, slightly pointed at the ends; very smooth, straight and of intensely rich dark green color; are very uniform in shape, size, color, always retaining their beautiful color until fully ripe, and presenting the finest appearance on the market. The flesh is white, fine grained, solid and of excellent flavor. The vines are robust, free of disease, setting on fruit quite early and bearing continuously until frost. They produce the largest crop of any known variety.

The Monarch is a sport of the Early White Spine. We have devoted many years to perfect it by careful re-selection of the finest specimens, but it has been tried now throughout the entire country and has not been found wanting in a single point. We recommend it as the best strain of Extra Early White Spine for the market and for the home garden. It is one of the finest Cucumbers for slicing and one of the best for small pickles. This is the variety mostly grown for the market in the South, yielding crops there of more than \$1,000.00 per acre and is matchless for shipping long distances. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 65c; lb. \$1.25

Buckbee's First Crop.

### BUCKBEE'S NEW ALASKA

Beautiful in shape and color and of the finest quality. An entirely distinct sort developed by ourselves. The vine is vigorous and productive and comes into full bearing very early. The fruit is of fine shape with crisp and tender flesh. An excellent sort for culture under glass. The fruits are about 7 to 8 inches long and are ready for the market between Buckbee's First Crop and Monarch. Pik. 5c; oz. 10e; 2 oz. 10e; 3/4 lb. 30e; 4/5 lb. Crop and Mor. 55c; lb. \$1.00.

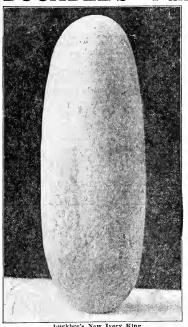

### BUCKBEE'S FIRST CROP

This is the earliest of all cucumbers producing marketable fruits of good size, the fruits are 6 to 7 inches long, straight, cylindrical, blunt at the ends and of very dark green color, which they retain a long time after picking. They grow very uniform in shape, size and color. The least is firm crisp and of the finest the color of the color of the color of the color of the colors. And produce, a good crop, much very uniform in subpt, size that converted and continue of the converted and continue of the converted and its beautiful dark green color, it is of great value for the market gardener and is grown on a large scale in many having proven a big money maker for bottle goods, they are also much used. The converted and converted

### DAVIS PERFECT-BUCKBEE'S PRIVATE STOCK

By using this variety, gardeners can produce out-of-doors Cucumbers that will sell in the market for hot-house forcing varieties. The shape is ideal. It is almost seedless one-third of its length from the stem, and the few seeds that are contained in its blossom end when in eating condition are so enaminated that they are hardly notificable. Plat, 5c; 0z. 15c; 2 oz. 25c; 4 b. 40c; ½ b. 65c; b. \$1.25.

## BUCKBEE'S "Full of Life" CUCUMBERS

buckbee's New Ivory King.

### Buckbee's New Ivory King The Only Pure White Cucumber

During the whole period of growth, from the time they first set until full grown, the form is exceptionally straight and symmetrical, making them as choice for a slicing variety as for pickles. The flesh is firm, very crisp, and tender at all stages. Fruit large with clear white skin, tender and excellent in flavor. Splendid for home garden. Pkt, 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 65c; lb. \$1.25.

### Klondike

An evera fine new strain of White Spine, of very beautiful dark green color. Extremely popular in the South to ship North. Good for table, market or pickling. Comes into bearing early and continues through the season. The fruit is firm and hard and keeps in prime condition a long time after pickling. It grows about 8 inches long and matures between Monarch and Davis Perfect. Pkt. 5c; oz. 10c; 2 oz. 15c; 1/4 lb. 28c; ½ lb. 50e; lb. 95e.

### New Cumberland

Fruits light green, long, straight, thickly set with fine spines. Fine for pickles and slicing: Pkt. 5c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. 55c; lb. \$1.00.

### New Parisian Prolific Pickling

Decidedly the best of all in quality for pickling. The fruit is of an unusually dark green color, so deep that no coloring matter is necessary in preparing them for pickling. Very crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 18c; 1/4 lb. 30c; 1/2 lb. 55c; lb. \$1.00

Lemon Cucumber.

### CHICORY—WITLOOF CHICORY or FRENCH ENDIVE

The Finest Variety of Chicory. The Cholcest of All Winter Salads

Witloof Chicory

This is the new salad which is sold at such high prices by dealers of fancy fruit during winter and is so much relished by epicures at exporting their produce to this country, but it is easily grown, can be made a very profitable crop here and American gardeners are now taking it up more generally,

Without is used principally during winter, furnishing a delightful salad when other fresh vegetables are not available, and is becoming

salad when other fresh vegetables are not available, and is becoming very popular.

The seed is sown in May or June in the open ground in drills 12 to 18 inches apart, and the plants thinned out to 3 inches apart. The plants form long parsnip-shaped roots and these should be lifted in fail, the top foliage cut off 1½ inches above the neck and the lower fail, the top foliage cut off 1½ inches above the neck and the lower inches; then they are stored in soil in a cool place until wanted for growing on.

inches; then they are stored in soil in a way pure growing on.

Witloof may be grown indoors in a cellar or shed where a temperature of about 60 degrees can be maintained. Use a frame or box at least 18 inches deep; fill about 10 inches high with loose soil mixed a part seak way and so that the crown is just covered. The empty room in the bed can now be filled with light soil or sand. Keep the bed dark by covering with an old carpet or boards and water if necessary; the soil should be kept fairly moist, but never soggy. The blanched heads are the edible portion of the plant and they are ready to use as soon as they show above the sand, which should be he 2 or 3 weeks.

be in 2 of 3 weeks.

The teader's oblong and very solid, they blanch ivory white and
The teader's oblong and very solid, they blanch ivory white and
The teader's oblong and the teader of the teader.

They are generally eater raw with French dressing and are the tenderest and most delicately flavored of all salads. Pkt. Get oz. 25c; 2 oz. 45c; 3 lb. 85c.

CHICORY-LARGE ROOTED OR COFFEE

Dried and prepared roots are used quite extensively as a substitute for and an adulterant of Coffee. Pkt. 5c; oz. 15c; 2 oz. 25c; 1/4 lb. 45c.

CRESS NEW UPLAND CRESS—Has the highly prized flavor of Water Cress. Its usage should be more general, as it is of as easy culture as Spinach. It is a perennial plant and can be grown for several years without renewal. Pkt. 5c; oz.

ZUC. LELLED OR PEPPER GRASS—Much used with Lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. Pkt. 5c; oz. 8c; 2 oz. 12c; ½ ib. 20c. TRUE WATER CRESS—Distinct from the last; thrives only when its roots and stems are submerged in water. Grown best along moist banks of small, rapid streams, or in

a tub, in water-covered soil. The plants will in-crease rapidly by self-sown seed and extension of the roots. One of the most delicious small salads. Pkt, 10c; oz. 35c.

True Water Cress

#### CHERVIL

Hardy annual, worthy of more general use for flavoring and garnishing. More beautiful than Parsley

CURLED—Greatly superior to the old, plain variety, earlier, more handsome, having fully as fine perfume and flavor. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c.

Collards

## BUCKBEE'S "FULL OF LIFE" EGG PLANT

BUCKBEE'S NEW EARLY LARGE PURPLE

Better variety than New York Purple. Its earliness, large size, high quality of fruit, and its extreme productiveness make it the most profit-able to grow. Plants large, spreading; foliage light green. Fruit very large, oval or short, pear-shaped; skin smooth, deep purple; flesh nearly white. Plants ripen two to six large fruits, entirely free from spines. Pkt. 10c; oz. 45c; 2 oz. 80c; 1/4 lb. \$1.50.

### New Black Beauty

This recently introduced Egg Plant is from 10 days to 2 weeks earlier than the old New York Purple varieties, and of rich, lustrous, purplish black color, and is a most distinct sort and a favorite where known. The plants are remarkably healthy in their growth, and yield an abundance of large fruits, which are very attractive in appearance. This variety is entirely spineless. The fruits are of the very fluest possible quality. Pkt. 8c. oz. 48c: 26.2.80c; 24. lb. 31.40.

### Buckbee's New White

Produces large fruits, and is very productive. The fiesh is more inder and flavor more delicate than that of many purple varieties.

Pkt. 8c; cz. 40c; 2 oz. 75c; ½ lb, \$1,35.

Improved New York Purple Large, round or oval, of excellent quality; highly esteemed in market. Pkt. 7c; oz. 38c; 2 oz. 70c; 1/4 lb. \$1.35.

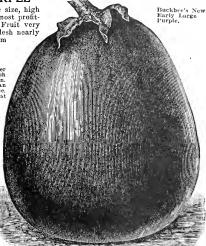

### Extra Early Long Purple

One of the earliest and most produc-tive varieties. Fruit long, dark, rich purple, and of fine quality; earlier but smaller than New York Purple. Pkt. 5c: oz. 35c.

### Honey Plant Seed

SPECIAL MIXED-From all the best honey plants that bees feed upon. Pkt, 5c; oz. 10c; 1/4 lb. 30e; 1/2 lb. 55e; lb. \$1.00.

Endive or Winter Lettuce

GIANT FRINGED OR OYSTER—When fully grown, the center portion can be blanched it as of exeming white by tying up, and contrasts finely with the deep green tips of the outer leaves. Egg Plant, Extra Early Long Purple.

### Dandelions

Improved Large Leaf.

An improved variety of Dandelion, very early. Leaves fully double the size of the common Dandelion. Sow in May or June and cultivate during the Summer, and the following Spring the leaves will be fit to

cut. Cultivated Dandelions are fast becoming favorite Spring Greens. If blanched like celery they make a fine and deliclous salad. The roots when dried and roasted are often employed as a substitute for coffee.

Endive-New Moss Curled.

### Horse Radish

Horse Radish rarely produces seed, but is grown from pieces of the roots.

#### NEW BOHEMIAN OR MALINER KREN,

NEW BOHEMIAN OR MALINER KREN.
Ordinary Horse Radish is a very profitable crop, but with this magnificent new sort
from Bohemia the possibilities are wonderful. The roots are so much larger and
heavier that the yield is about doubled,
the crop can be sold in October. The flesh
is pure white. Three and four tons per acre
can be grown easily. Fine Sets, postpaid,
25c per doz.; \$1.50 per 100. By express or
freight, not prepaid, 100 for \$1.15; 500 for
\$1.75; 1,000 for \$2.00.

### COMMON HORSE RADISH.

The old-fashioned standard variety. Sets or Root., postpaid, 20e per doz.; Si.00 per 100. By express or freight, not prepaid, 100 for 85c; 500 for 83.75; 1,000 for 87.00.

The Garlic is the most pungent In taste and has the strongest odor of all the Onion family. It is largely used in the South of Europe, where it is esteemed for flavoring soups, stews, etc. The root or bulb is composed of many small bulbs called "cloves," which are planted in the Spring. We frequently receive orders for Garlic seed, but can supply the bulbs only. Fine bulbs-1/4 lb. 25c; 1/2 lb. 40c; lb. 75c, postpald.

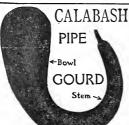

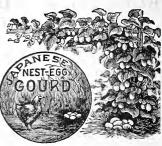

Horse Radish, New Bohemian.

# JAPAN TOWEL GOURD OF LUEP

EIURIES NEW CALABASH PIPE GOURD—Light and attractive pipes can be made from the fruits of this Gourd by any one at a nominal cost. They are the lightest pipes made for their size, are graceful in shape, color like meerschaum, and are delightful smokers. Pipes made from the imported specific properties of the properties of the mine of the specific properties of the State, from New England to the Guilf, and from the Atlantic to the Pacific, producing in great abundance the fruits or gourds from which the pipes are made. The Vine is also very ornamental and useful for covering fences, unsignly places etc. Pitt. 10c; 0z. 256.

NEW JAPANESE DISH CLOTH, OR LUFFA—Ornamental enough for a house vine and fruit is very useful. Fruit enormous, two feet in length, and borne in great profusion. The lining of mature fruit, when washed and bleached, is porous, tough, elastic, sponge-like, making the nicest, cleanest substitute for dish cloths and bath sponges imaginable, besides being useful for various articles of fancy work. Fkt. 5c;

SUGAR TROUGH—Enormous, hard-shelled fruit, holding from 3 to 10 gallons each, and as they never rust or rot, and are very light and strong, are just right to use as receptacles for lard, salt, seed corn, soap, etc., or to use as nesting boxes, etc. They last for years. Pkt. 5c; oz. 20c.

TRUE NEST EGG—Resembling in color, shape and size the eggs of hens. Do not crack, last for years, and make the best of nest eggs. Rapid grower and good climber, extremely entered to the state of nest eggs. Rapid grower and good climber, extremely entered to the state of the sta

Pkt. 5c; oz. 15c.

Kale, Excelsior Moss, Curled.

### KALE OR BORECOLE

1 oz. of seed for 3,500 plants.

DWARF EXCELSIOR GREEN MOSS CURLED KALE-WARF EXCELSIOR GREEN MOSS CURLED KALE— (Greens or Sprouts.)—This is hardier thas Cab-bage and makes excellent greens for Winter and and of very fine flavor, It is improved by frost. Sow the seeds in May or June, transplant in July and treat same as Cabbage. Immense quantities of this are grown in the South and shipped to Northern markets. Fixt. Ser or, 18e; 2 oz. 30c; ¾ 16, 50c.

FALL GREEN CURLED SCOTCH—This variety is very hardy and is improved by a moderate frost. About thirty inches tall, with an abundance of green leaves, which are densely curled and crinkled. Stands the Winters in the Middle States without protection. Pkt. 5c; 20z. 25c; 1b. 40c.

vs. 10c; z 0z. 20c; 10. 40c.
SIBERIAN—One of the best known and most largely used varieties of Kale. It is sometimes called Sprouts or Greens. The green leaves are very large, and comparatively plain in the center, but coarsely cut and distinctly frilled on the edges. The plant is low sut spreading and very hards. Pkt. 5c; oz. 12c; 2 oz. 20c; ½ lb. 35c.

Kale, Tall Green Curled Scotch.

### KOHL RABI

A vegetable intermediate between the Cabbage and Turnip, combining the flavor of both. Edible part is a turnip-shaped built, formed by swelling of stem. When used for the table this should be cut when quite small, as KING OF THE EARLIEST—WHITE—Early and choice. H some white bulbs. Pkt. 5c; 0z. 25c; 2 oz. 49c; ½, lb. Buckbee's "Full of Life" Lettuce Leaved Varieties

### BUCKBEE'S EARLIEST FORCING

The Earliest Lettuce Grown.

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large, loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground.

The plants form a large, loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp, and are of excellent quality. This is the earliest of all Lettuce; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. We control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 45c; 1/2 lb. 80c; lb. \$1.50.

GRAND RAPIDS FORCING Buckbee's New variety of superior quality and beautiful appearance; a series of the series of

IMPROVED BLACK SEEDED SIMPSON Buckberg back.
Acknowledged one of the best early forcing varieties. Leaves are a delicate green, almost white, crisp, tender and sweet. Very early, easily grown, very reliable, does well in hot Sumers when others fail. Largely grown for the market, but salvery popular for the home garden. Pkt. 8c; oz. 12c; 2 oz. 20c; 24 b. 30c; 75 CHARDONNE CLUY CALLED

A decidedly crisp variety. Color, very light green; never spotted or brownish in any part. Quality excellent; sweet in flavor. Pkt. Se; oz. 10e; 2 oz. 15e; ½ lb. 28e; ½ lb. 50e; lb. 90e.

TOMHANNOCK

Handsome Reddish Bronze Lettuce.

Edges of outer leaves are a reddish bronze; within, the leaves are almost white. Very crisp, tender and sweet. Keeps in fine condition for a long time. Excellent for the home garden. Pkt. 5c; oz. 10e; 2 oz. 18e; ½, lb. 30e; ½, bb. 55e; lb. \$10e.

### EARLY PRIZE-HEAD

This old standard sort still stands at the head of the large, thin-leaved clustering sorts for the home garden. Exceedingly tender, crisp and sweet. There is more Prize Head Lettuce grown in this country than any other variety. It is a most reliable variety for all-the-year-round cultivation. Leaves light brown, varying to bright green. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ 1b. 25c; ½ b. 35c. b. 35c.

Dwarf White Heart.

#### Cos Lettuce

Cos Lettuce is distinct from other varieties, in hav-glong, narrow, spoon-shaped leaves, folding into see, sugar-loaf shaped heads which blanch better by having the outer leaves drawn about them and tied. The heads are always crisp and mild and con-sidered by many superior to other kinds.

PARIS WHITE COS—Grows to very large size, producing long, pointed compact bunch of light producing long, pointed compact bunch of light grows to lumense size. Plants of the weigh 5 to 6 pounds each. Pict. 5c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. \$1.05c; lb. \$1.00.

½ 1b, 50c; 1b, \$1.00.

DWART WHITE HEART OR CELERY—Noted for its most excellent flavor. Earliest in cultivation. The plants grow about 8 inches high and 4 to 5 inches across. Of stiff growth, every plant making a weli-developed head of the most excellent flavor, and crisp and tender. Pit. 5c; 02. 10c; 2 02. 18c; ¼ 1b. 50c; ½ 1b. 65c; 1b. \$1.25.

Tomhannock.

### BUCKBEE'S MAMMOTH ALL HEAD LETTUCE

THE WORLD'S ONE UNBEATABLE HEAD LETTUCE

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about 10 days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is show to run to seed, and will not seal or burn and will make a head when other varieties fail. In our repeated trials we have found it to be the best smooth leaved, firm heading Lettuce to grow through the summer months.

Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from

sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have a decidedly buttery flavor and are crisp, tender and sweet.

This is the grandest, most valuable Lettuee ever introduced. There is no other variety giving such general satisfaction under so many varying conditions. Grown in the open ground, or forced in cold-frames or cool greenhouses, it produces a perfect head of extra large size, which never fails to please both grower and user.

Pkt. 10c; oz. 25c; 2 oz. 40c;  $\frac{1}{4}$  lb. 70c;  $\frac{1}{2}$  lb. \$1.30; lb. \$2.50.

# Buckbee's "Full of Life" Lettuce—Butterhead Varieties—Cont'd

### Buckbee's Extra Early May King The Earliest Head Lettuce Grown

An ideal Lettuce for planting in the open ground in Spring, as well as in Fall, and also splendid for forcing. Extremely hardy and very quick growing. Plants grown from 7 to 8 inches in diameter with outer leaves so closely folded that the plant is practically all head. Outer leaves are light green, slightly tinged with yellow, of a specially fine, rich, buttery flavor. The round, compact heads are very solid, so that they will carry well to market. It attains a size suitable for use before any other large heading variety. Buckbee's May King is an extra fine strain and is much earlier than that mostly sold by others. Pkt. 5c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 75c; lb. \$1.25.

BUCKBEES DRUMHEAD The Longest Keepina

Head Lettuce

Buckbee's Extra Early May King,

### Buckbee's Mammoth Big Boston

A very popular variety with market gardeners. It heads well in the open ground during cool weather in Spring and Fall and is grown very extensively in the sales as a fine forcing variety for cold-frames during the Winter months. Our strain is very hardy, sure to head and produces solid heads of large size, often 10 to 12 inches across, which are slow to go to seed. The leaves are thin, hard and crisp, comparatively green color, slightly tinged with reddish brown. The green color, slightly tinged with reddish brown. The inner head blanches to an attractive greenish white, The quality is excellent,

Our seed of this famous variety is used by thousands who purchase it year after year, testifying by that to its wonderful quality. Pkt, 7c; oz. 15c; 2 oz. 25c; ½, lb. 40c; ½, lb. 75c; lb. \$1.25.

Mammoth Big Boston.

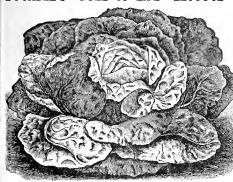

### Buckbee's Ice Drumhead

A Sure Header, Slow to Run to Seed, Unaffected by Hot Weather. Crisp, Tender and Delicious. Absolutely Free from Bitterness.

It grows rapidly; heads very early, only little later than May King, but the heads are much larger, as large as Dutch Cabbage and solid as that. The leaves are thick, broad, light green outside, changing towards the center from a golden yellow to a creamy white. The heads are as palatable as beautiful; very tender; never bitter; of deliciously sweet, buttery flavor. Buckbee's Ice Drumhead is a sure header and an all-

header. It stands hot weather better than any other variety of its class. Ready for use when quite young until it runs to seed. Buckbee's Ice Drumhead is one of the best sellers of Lettuce we grow. It is immensely popular, especially in the Northern and Central States, and justly so, as it is unexcelled in its superb quality, beautiful appearance, heat resistance, keeping and shipping qualities. We control the entire stock of this variety. Pkt. 8c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 75c; lb. \$1.25.

### BUCKBEE'S "FULL OF LIFE" LETTUCE—BUTTERHEAD VARIETIES—Continued

All Season or Improved Deacon.

### ALL SEASON OR IMPROVED DEACON

This magnificent Butter Lettree & unsulpassed or camily garden or market use. Light prese mendades and the blanched portion is a beautiful cream yellow, of delicious, rich buttery flavor. More heat and drought resistant than most varieties of its class. Pkt. 5c; oz. 10c; 2 oz. 18c; ½ lb. 35c; b. 51.00.

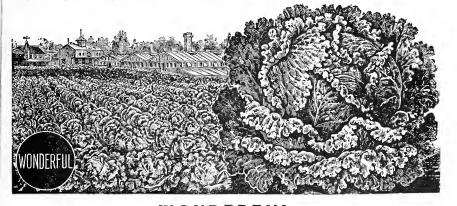

BOSTON MIKET, or White seeded Tennis Ball. Fine beads, hardty Valuable to the win health spill finals in Wintzer Pkt. Set oz. 10e; 2 oz. 15e; 1/4 lb. 25e; 1/2 lb. 45e; lb. 85e. BUCKBEFS NEW GOLD COIN—The heads are solid and compact and measure 7 inches across. Outer leaves covered with russet red and bronze green, the solid hc.rts of light creamy color. Very early. Quality excellent. Fkt. Set oz. 10e; 2 oz. 18e; 1/4 lb. 36e; 4/2 lb. 55e; lb. \$1.00.

BUCKBEE'S SUPERE—An extra early variety, a few days earlier than May King, but smaller. Mostly used for forcing derfully crisp, tender and delricular fish in Pkt. 5e; oz. 10e; 2 oz. 18c; ½ lb. 30e; ½ lb. 55e; lb. \$1.00.

CALIFORNIA CREAM BUTTER—Also called Royal Summer Cabbage. Dark green, round, thick leaves forming a very solid round head, which stands a long time without running to seed. Outer leaves spotted brown, inner ones sweet and nutty in flavor. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ 1b. 30c; ¼ 1b. 30c; ½ 1b. Sl.00.

EARLY BLACK-SEEDED TENNIS BALL or SALAMANDER
—Succeeds everywhere and at all seasons. Sure header,
a fine shipper, excellent quality. Pkt. 5c; oz. 10c; 2 oz. 15c;
1/4 lb. 28c; 1/2 lb. 50c; lb. 90c,

### BUCKBEE'S "FULL OF LIFE" LETTUCE—CRISP HEAD OR SUMMER VARIETIES

### WONDERFUL

### A Big Money Maker. The Standard Main Summer Crop Hot Weather Head Lettuce.

A grand Head Lettuce, called also New York and Los Angeles, furnishes fine crisp Lettuce during the hot Summer months. This is one of the largest varieties grown, producing heads more than 15 inches in diameter and weighing more than 2 pounds each. The outer color is rich dark green, but the heart blanches beautifully and is crisp, tender and delicious. It is reliable, a sure header, and is slow to go to seed. Extensively grown in all sections of the country for Summer use, but also planted in Fall and Winter, especially in the Southwest, from where thousands of carloads of it are shipped during the Winter to Eastern cities. It stands shipping as well as Cabbage and remains in good condition longer than most heading sorts. Most desirable for the private as well as the market gardener. Not used for forcing. Pkt. 8c; oz. 15c; 2 oz. 25c; ½ lb. 40c; ½ lb. 75c; lb. \$1.25.

#### NEW ICEBERG

Quick growing and of exquisite flavor. The large curly leaves which cover the outside of the solid head are of bright, light green, with a slight reddish tinge on the edges. They have small indents which are constantly filled with dewdrops, keeping indents which are constantly filled with dewdrops, keeping a state of the constant of

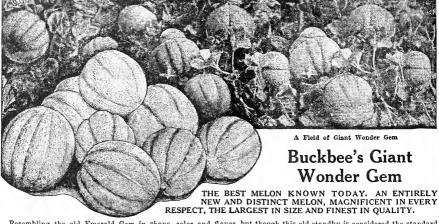

### IMPROVED HANSON

Heat-Resisting. Much Used for Midsummer Planting Outdoors. Large, firm cabage-like heads with broad outer leaves frilled at the edge and of light green color. The inner leaves are white and deliciously sweet, crisp and tender. An old, most popular variety grown everywhere and extensively used for the kitchen garden as well as market. Pkt, 5e; oz. 10e; 2 oz. 15e; ½ lb. 28e; ½ lb. 50e; lb. 90e.

#### BUCKBEE'S COMBINATION LETTUCE MIXTURE One Sowing Produces Salad for the Whole Season.

Contains a grand assortment of decidedly distinct and excellent Lettuces. They mature early, medium and late; some curied and crimped, others produce heads. Colors range from almost pure white, through delicate shades of green and yellow to rich golden. All are delightfully fresh, crisp, tender and of excellent flavor. All sizes, from the small early to the mammeth Summer varieties. Liberal pkt, 5c; oz. 12c; 2 oz. 20c; 1/4 lb. 35c; 1/4 lb. 60c; lb. 81.00c; lb. 10c; lb. 20c.

### BUCKBEE'S "FULL OF LIFE" MUSK MELONS

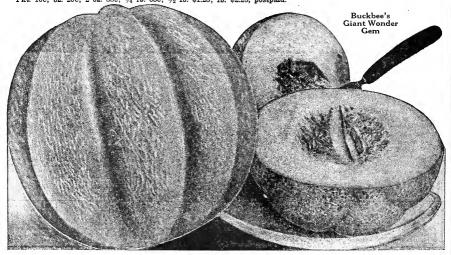

Resembling the old Emerald Gem in shape, color and flavor, but though this old standby is considered the standard of excellence in quality among melons, it is only of small size and will not stand shipping; Buckbee's New Giant Wonder Gem, however, is much larger; in fact, it is the largest good melon growing, weighing under ordinary conditions as much as seventeen and eighteen pounds each and with special care much more, and it is also much more

netted and of good shipping quality.

The melons are globular, slightly flattened, deeply but irregularly ribbed, covered more or less with shallow netting; the skin is of rich emerald green color while young, becoming slightly tinged with yellow as the fruit matures. The flesh is of deep, rich salmon color, about 3 inches in thickness, thicker than the flesh of any other sort we know of; the melon is indeed almost all solid meat, the cavity being very small, hardly large enough to accommodate the seeds. In quality it is like Emerald Gem when at its best, highly aromatic, of the richest and most luscious flavor, most tender, entirely stringless, practically melting in your mouth. This delicious flavor extends to the very rind. The vines are of vigorous growth, and the foliage of firm texture, resisting the attack of insects and blight.

These fine, large melons will always sell at good prices, as they closely resemble in appearance and flavor the large, greenhouse grown melons sold at fancy prices at the fruit stands.

Pkt. 10c; oz. 20c; 2 oz. 35c; ½, 1b. \$1.25; 1b. \$2.25, postpaid.

### BUCKBEE'S "Full of Life" ROCKY FORD MUSK MELONS

#### Buckbee's New Honey Boy.

### Buckbee's New Victory (See painting from nature on front cover)

Color and shape well shown by illustration, which was painted from an average fruit taken from our fields. Do not fail to try this finest of all Musk Melons this year. We control the entire stock of this variety. Pkt. 13c; 20.2 45c; 20.2 45c; ½ lb. \$1.25d; lb. \$2.25d.

### Buckbee's New Honey Boy

Planted by 50,000 of Our Customers Last Year.

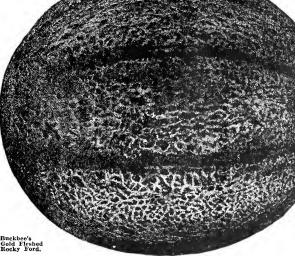

This is the earliest strain of all Rocky Ford Melons. It always brings the highest prices in the market.

Exceedingly early - very prolific - ever-bearingyielding heavy crops from early Summer until Fall. The fruit is oval, trifle elongated-solid netting-ideal shipper. Flesh is light green, very thick meat, sweet and delicious flavor. These Melons weigh on an average about 11/2 lbs. each. They grow very uniform and a large percentage of them are of standard size, forty-five of them filling a crate 12x12x24 inches. You can't go wrong on Buckbee's Honey Boy. Choicest home grown Seeds. Large pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 45c; 1/2 lb. 80c; lb. \$1.50.

### Buckbee's New Gold Fleshed Rocky Ford The Biggest Cropper of All Rocky Ford Melons

A selection from Buckbee's famous Rocky Ford, with salmon (not orange) flesh, maturing about ten days later than Buckbee's Honey Boy. Gold fleshed Rocky Ford is the biggest cropper and finest flavored Melon grown in Rocky Ford. It is covered with heavy gray netting over the entire surface, grows very uniform, and is more disease-resistant than any other variety; der unfavorable conditions when other strains rust badly, the plants of this variety remain green and thrifty and will produce blossoms and fruit for a long time. The flesh is quite firm, deep, leaving but a very small seed cavity, and is of superb quality and delightful, rich, aromatic flavor not excelled by any other variety. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 45c; 1/2 lb. 80c; lb. \$1.50.

### Buckbee's "Full of Life" Musk Melons-Green Fleshed Varieties

True Jenny Lind Musk Melon.

### New Early Hackensack This is a Splendid Melon.

This is a splendid Meton.

The fruit is medium sized, nearly round, evenly and deeply ribed, with a very coarse netting, and almost as large as the Large Hackensack. The flesh is green, a little coarse, but very julcy, sweet and well flavored. A very early Melon and wonderful yielder and splendid shipper, Pkt. Sc; oz. 12c; 2 oz. 20c; 42 b. 36c; 32 b. 36c; b. \$1.00.

### Large Hackensack The Noted "Turk's Cap" Melon,

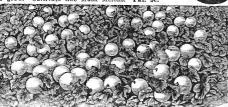

About ten days later than the foresolven and the state of the state

### New Bush Musk Melon

A VALUABLE NOVELTY—A vineless Musk Melon that can be grown in every garden. The bush habit of growth of this new variety enables it to be grown in small gardens, where the vine sorts could not be grown for enables it to be grown in small gardens, where the vine sorts could not be grown for lack of room, and they yield about twice as vine sorts. The fruits are of the popular yiens sorts. The fruits are of the popular 'Jenny Lind'' type, but larger, averaging 5 inches in diameter; they vary somewhat in green, but so densely netted that it appears almost russet colored. The flesh is very deep, edible almost to the rind and is colored quality is superh. Usclosely sweet and juicy, with a cool, gratifying flavor and a delightful aroma. They ripen a little in advance, with a cool, gratifying flavor and a delightful aroma. They ripen a little in advance to 18 inches in length and two or three plants enhe grown in a hill 2½ to 3 feet apart. Pkt. 8c; oz. 25c; 2 oz. 45c; ½ lb. 30c.

### Queen Ann's See Cut

Sweet Scented Pocket Melon or Pomegranate, A pretty climbing variety; fruit round, size of an orange, yellow color, striped and spotted red. Flesh not edie; grown for oranment and its agreeable pungent agrance, sweetly perfuming the room for days. Trained trellises or arbors it is very ornamental. It is easy grow. Cultivate like Musk Melons. Pkt. 5c. of yellow color, ble; grown for pungent Trained

Garden Lemon, a Single Plant.

### Buckbee's New Prolific Nutmeg

Unsurpassed in Luscious Flavor. Unsurpassed in Luscious Flavor.
This is a very early Melon of great productiveness. Farticularly adapted for home garden, but
slightly ribbed, globular. Skin dark green, becoming yellow when over ripe, and neatly covered
with broad, shallow netting, flesh thick, sweet and
of light green color. Large Fkt. 5c; oz. 12c; 2 oz.
20c; 34 bb. 35c; ½ bb. 60c; ib. \$1.00c.

### New Garden Lemon

Resembles the Mango Lemon in manner of growth, but is distinct in that the unripe fruit is striped with very dark green spots, nearly black, and when ripe is not russeted. Fruit a trifle smaller than the Mango Melon, Has a finer flesh and most desirable acid flavor, thus dispense. ing with sliced lemon, which is so important in putting up the Mango Melon. Unexcelled for general canning purposes. Cultivate similar to Musk Melons. It is an enormous yielder. Pkt. 10c; oz. 25c.

### The Mango Melon or Vegetable Peach

Very striking in color, most wonderful yielder. Vines of Mango Melon are somewhat smaller than the Musk Melon, requiring same cultivation. Fruit about the size, shape and requiring same cultivation. Fruit about the size, shape and color of an orange, somewhat russeted. For sweet pickles, pies or preserving they are splendid. In the West and Northwest, where fruit is scarce, they are rapidly becoming popular, as they are easily cultivated, enormously productive, and can be used in every way as the Peach except that they are not quite as sweet and are not used raw. Pkt. 10c; oz. 25c.

### BUCKBEE'S "Full of Life" MUSK MELONS—Salmon Fleshed Varieties

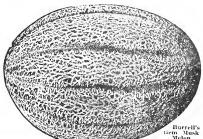

Emerald Gem Musk Melon.

### EMERALD GEM

Splendid Size, Color and Flavor,

The standard of excellence among the salmon-fleshed varieties. small to medium size, globular or very slightly flattened at the ends, only slightly netted and ribbed. Skin deep green while young, tecoming tinged with yellow as the fruit matures. Flesh deep salmon yellow, thick, ripening close to the rind; sweet, julcy, melting and un-surpassed in flavor. For home use surpassed in flavor. For home use and nearby markets it leads all other kinds on account of its delicious flavor. Choicest stock seed and of our own growing. Large pkt, 5c; oz. 10c; 2 oz. 18c; 1/4 lb. 35c; 1/2 lb. 65c; lb. \$1.25.

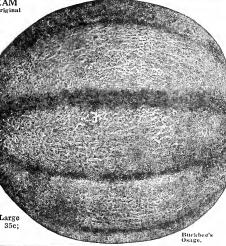

### BURRELL'S GEM One of the best

yellow-fleshed Melons; it is ex-cellent for shipping and a most desirable medium early sort for the home garden. Larger, more elongated, and about a week later than the standard Rocky Ford kinds. has well-arched ribs, covered with a closely laced and interlaced gray netting. Flesh of a reddish orange color. very thick, fine grained and of rich, spicy flavor, The Melons average 214 pounds, 6 inches long, 414 inches thick, and will crate more evenly than any other Melon grown. Vines very vigorous and productive. Pkt. 5e; oz. 10e; 2 oz. 18e; ¼ lb. 30e; ½ lb, 55e; lb, 90c.

### BUCKBEE'S OSAGE IMPROVED MILLER'S CREAM The Best Home and Market Melon-Original Stock.

This Melon has made its way into public favor from the market rather than the garden, and is highly prized by those who like an exceedingly sweet and highly flavored Melon. It is medium to large sized, oval, slightly ribbed, dark green in color, covered more or less with shallow netting. The flesh is deep salmon color, very thick and deliciously rich, sugary, there being but a slight cavity in the center of even the largest fruit. The best general purpose Melon yet intro-duced. The most popular market Melon in the Northern States, not more than a week later than the small earliest Melons, but producing fruits three times as large. Our stock is unequaled, producing fruits larger. earlier and more netted than seed commonly sold by other dealers.. Large pkt. 5c; oz. 10c; 2 oz. 18c; 1/4 lb. 35c; 1/2 lb. 65c; lb. \$1.25.

Buckbee's Western Giant.

#### PAUL ROSE OR PETOSKEY

The Favorite Basket Mclon,

In general appearance much like Rocky Ford Netted Gem. but about one lnch larger in diameter; oval fruits, lightly ribbed and densely netted. It has flesh of the color and quality of the Osage, very thick, orange yellow, sweet, highly flavored and sufficiently firm to stand shipping short distances to the market. A splendid variety for the home garden. Pkt, 5e; oz. 12e; 2 oz. 20e; 1/4 lb. 35e; 1/2 lb. 60e; lb. \$1.00.

### BUCKBEE'S WESTERN GIANT

Noted Not Only for Its Great Size, But for Its Most Magnifleent Flavor and General Good Quality.

A large Melon ripening about the same time as Osage: the flesh is rich, melting and sugary. As an exhibition and large market variety it is grand. It will astonish everyone by its merits, being exceptionally desirable for family and market purposes. For shipping it has no superior. Where size is an object, and there is not a particle of danger of sacrificing quality, Buckbee's Western Glant will always give the most complete satisfaction. Pkt, 10c; oz, 15c; 2 oz, 25e; 1/4 lb. 45e; 1/2 lb. 80e; lb. \$1.50.

### COLE'S EARLY

The Best Earliest Large Melon for the Home Garden. Cole's Early is not only one of the earliest varieties in cultivation, but it continues to bear throughout the season. The beautiful bright red flesh is crisp and of delicate texture—granulated, cool and sparkling. In flavor it is lusciously sweet and refreshing. Melons are not large, seldom over 12 inches in length by 9 inches in diameter, but what they lack in size is more than made up in number and solidity. heart is large, there is little or no cavity and very few seeds—all solid ficsh, the quality of which is sustained clear to the rind. It can be grown successfully over a larger latitude than most other Watermelons, and it will mature large crops in the Northern States when the season is at all favorable. This is a Melon for the family garden and local market, the skin being rather tender, making it unfit for shipping. Pkt. 5c; oz. 10c; 2 oz. 15c; 1/4 lb. 25c; 1/2 lb. 45c; lb. 85c. The Baby of the Watermelon a Dollght for the grover on account of the extraordinery politices, yielding fully as much in weight per acre as any of the larger Melons and being earlier than any other, finds always a ready market and brings very high prices; a delight also for the consumer on account of its convenient size and its lusclous sweetness.

This Melon is almost round, and measures from 5 to 7 inches each way and weighs from 3 to 6 pounds. The skin is dark green, the rind thin but strong. The flesh of rich carmine color, always solid and of exceptionally sweet flavor. The seeds are very small, resembling apple seed, but of gray color.

Pkt. 10c; ½ oz. 15c; oz. 25c.

### NEW EXCEL

NEW EXCEL

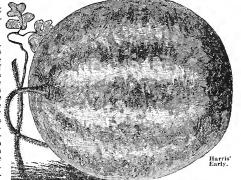

This Watermelon has become a favorite sort with the Southern growers for shipping north; does equally as well planted here in our Northern climate. The large oblong meions are of a dark green color with faint stripes. The tough rind permits rough handling in transit, making it a good long distance shipper. The red fiesh is very solid, criep and of excellent flavor. The vines produce an enormous crop of medium early meions, which are handsome in appearance, making them a quick selling meion on the market, or of the product of the color, some black, some white with black border, Postpaid, pkt., 5c; oz., 10c; 2 ozs., 15c; ¼ lb., 28c; ½ lb., 50c; lb., 90c.

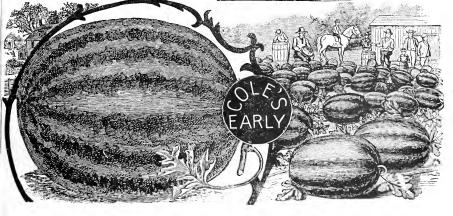

### HARRIS' EARLY

THARKIS EARLI

The Best Earliest Large Shipping Melon.

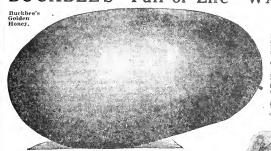

In form the Melon is oval to oblong; beautifully striped with green and gray; bright red flesh, which is sweet and tender. It is very productive. It is the Melon for everybody to grow who wants to be first in the market with fine large Melons weighing from 20 to 40 pounds. It bears shipment very well. Harris Early ripens about the same time as Cole's, but having a dualities we present the strength of the same time as Cole's. Pt. 10. 25c; ½ lb. 40c; lb. 75c.

Ernest Austin, Paragould, Ark.: "I have been ordering seeds of you for six or seven years and always liked them."

NEW CLIMBING WATERMELON
A Superb Variety, Novel and Attractive.
The vine may be allowed to trail on the ground or may be trained and tied to trellises, etc. The Melons are about the size of a cocoanut, with seed no larger than apple seed. They are very solld, rich crimson flesh and of the highest quality, perfectly ideal for the home garden. Fruit ripens for a long period, unlike other sorts which ripen their fruit mostly at one time. Pkt. 10e; 3 pkts, 25c.

NOTHING BUT QUALITY

### FACTS ABOUT BUCKBEE'S SURE CROP SPAWN

This Spawn is prepared solely for us by a specialist in this country who has not only devoted a lifetime to the work, but who is a profound student of the industry. His work has resulted in procuring the best and most reliable Spawn in the world. Under our contract it is impossible for the grower to secture any Sure Crop Mushroom Spawn from anyone except Buckboo of trying it, that they will find Sure Crop Spawn to be all that is claimed for it and more. It produces Mushrooms true to type, in much greater abundance, of much earlier maturity and of much larger size than those grown by any other method, and these Mushrooms are in great demand at the very highest market prices.

In order to meet the demand for Sure Crop Spawn, and to provide against deterioration of its producing qualities, our arrangement with the producer is for frequent shipments which, coupled with the care we give it, renders it absolutely certain that our customers will all be furnished with Spawn that is fresh, of quick, vigorous growth and if they handle it properly will bring them

### big returns. We have made the price as low as Spawn of such an exceedingly high grade can possibly be sold for. BUCKBEE'S SURE CROP SPAWN

# MONEY MAKING ONIONS QUICK GROWING SURE CROPPERS LONG KEEPERS

### Buckbee's Southport Globe Onions

Southport Globe Onions are most attractive in appearance and most economical in use. They command the highest price in the market. These Onions are big croppers and splendid keep-ers. Harvested in September, they keep perfectly sound and

merchantable until the following June. Our strains of these varieties have been carefully bred and are unequalled by those of any other grower in size, beauty, yielding and keeping qualities.

### Southport Red Globe

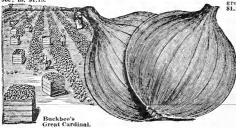

Buckbee's Re-Selected Pedigree Seed.

The celebrated Blood-Red Globe Onion. This variety has been many years proved one of the most profitable for the market and shipping trade, commanding uniformly good prices in carload lots. It is of large size and splendid appearance, and frequently yields from 600 to 800 bushels per acre under average culture. It is an Onion of unusual merit. Flesh is firm, finely grained, very rich, yet unusually mild for a red Onion, and is

Southport Yellow Globe Buckbee's Re-Selected Pedigree Seed.

Entirely distinct from Onions of the Danvers type, having notable and striking characteristics of its own. Excels in size, otable and striking characteristics of its own. Excels in size, and flavor. Matures in early Fall, it is sure to satisfy the one who buys a packet or the one who sows 50 pounds or more of seed for carload shipments. A truly grand Onion, whose large, golden-yellow spheres make a beautiful appearance, sacked, crated or barried for the market.

Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 8c; oz. 15c; 2 oz. 28c; 1/4 lb. 50c; 1/2 lb. 90c; lb. \$1.75.

# The crop is ready to harvest in early Rall and keeps well until the late Spring months. No one that we have ever known has been disappointed with the results obtained by planting this great Onlon. Our own growth, choicest Northern-grown, high-grade pedigred stook, seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ½ lb. 60c; ½ lb.

\$1.10; lb. \$2.00.

### Southport White Globe

Buckbee's Re-Selected Pedigree Seed.

Buckbee's Re-Selected Pedigree Seed.

Handsomest of all Onlons. It is of true globe form, pure white, hard, small necked, ripening regularly and evenly; a splendid keeper. The flesh is firm and fine grained and mild to tasts. Average yields of 500 to 700 bushels per acre are can afford to plant inferior stock, with only cheapness of price to recommend it, when seed like ours is to be had as reasonable the results of planting a few ounces often paying many times the first cost of the best seed.

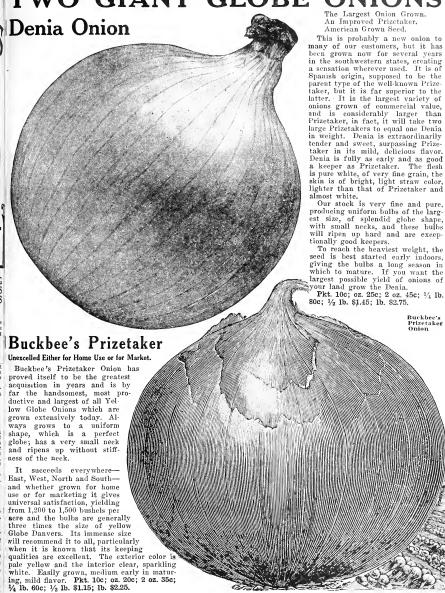

Our own growth choicest Northern-grown, high-grade pedigreed stock seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ½ 1b. 60c; ½ lb. \$1.15; lb. \$2.25.

### Buckbee's Great Cardinal

The World-Beating Red Globe Onion. Enormous Yielder. Large Size. Perfect Globe Shape. Splendid Keeper. Wonderful Shipper. Matures Early.

The largest American grown red globe Onion. The color ls rich, very deep cardinal-purple, darker than that of other red Onions. The flesh is thick and of splendid flavor, It is one of the very best keepers ever introduced. It has the size and shape to recommend it in the highest degree for the market. We would not praise it so highly if we did not believe it to be alone in its class. It is one of the real money makers. No one but Buckbee can furnish GREAT CARDINAL SEED. Pkt. 10c; oz, 20c; 2 oz. 35c; 1/4 lb. 60e; 1/2 lb, \$1.15; lb, \$2.25,

### TWO GIANT GLOBE ONIONS

### BUCKBEE'S PEDIGREE LARGE RED WETHERSFIELD

### OUR LEADING SPECIALTY

One of the chief departments of our seed growing business consists of growing Buckbee's Pedigreed Red Wethersfield Onion consists of growing Buckbee's Pedigreed Red Wethersfield Onion for seed purposes only. Our stock has reached such a high point of merit that it is a household word everywhere that Buckbee's Pedigree Red Wethersfield Onion Seed is the most reliable and produces more good of the many thousands of the consolicited testimonials which we have received from all over the country, we have every reason to believe that the time which we personally spend in our onion fields is truly appreciasly: "Buckbee's Seeds are Full of Life."

There are many strains of this justly celebrated Onion offered, but we venture to say none can surpass Buckbee's Prize Medal Stock of this famous variety. The various strains, good, bad and indifferent that are generally offered to the unwary planter, come to maturity all the way from August up until as late as October. This unreliability of cropping is very disastrous to most localities.

THE GREATEST OF ALL RED ONIONS

THE GREATEST OF ALL RED ONIONS

The seed which we are offering is of the earliest maturity; grown from hand-sorted buils that will produce Onions of immense size; 1½ to 2½-pound Onions from our seed are of frequent occurrence. BUCKBEE'S RED WETHERSFIELD grows with unusual regularity, scallions being unknown. It is a magnificent keeper. An enormous cropper—700 to 1,000 bushels have frequently been raised upon a single acre. The shape is accurately shop purplish red, with the field in the product of the country of the country indoorse it as the best Red Onion ever grown.

#### NEVER HAS BEEN KNOWN TO FAIL

NEVER HAS BEEN KNOWN TO FAIL

We trust no Onion grower who receives our catalogue will
fail to try at least a small quantity of BUCKBEE'S RED
WETHERSFIELD ONION, for all ought to know how much
superior it is to other strains offered. This seed will produce
bighly-colored, long-keeping Onions, sure to command the highest price in the market. Will yield doubt the crop that seed
from most other desiers will produce.

BUCKBEE'S PEDIGREED LARGE RED WETHERSFIELD-Our own growth, choicest, northern grown, high-grade, pedigree "Full of Life" stock seed. Pkt. 5c; oz. 15c; 2 oz. 28c; 1/4 lb. 50c; 1/2 lb. 90c; lb. \$1.75.

### BUCKBEE'S NEW GOLDEN GLOBE DANVERS

Long Keeper. Best Shipper. Unrivaled Market Onion. Always in the Lead. Challenges Competition.

A most perfect type of the globe-shaped Onion and an extra early variety. It has a very small neck, the entire crop drying down at one time. The bulbs are of a beautiful golden yellow color. Trial tests have shown this great variety to yield over 2,00) bushels per acre, while under ordinary cultivation in past seasons several of our customers have reported yields of 1,700 bushels per acre. The bulbs are very hard, solld and are exceptionally good keepers.

Remember, that we control the entire sunniv of this variety.

are exceptionally good keepers.

Remember, that we control the entire supply of this variety.

Our own growth, choicest Northern-grown, high-grade pedigreed stock seed. Pixt. 8c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; stock seed. lb. \$2.00.

### BUCKBEE'S SELECTED YELLOW GLOBE DANVERS

Standard of Execllence for Home and Market Use.

Buckbee's strain of Yellow Globe Danvers, developed by care-Bucknees strain of Yeilew viole Danvers, developed by Care-ful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces \$30 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as Southport Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedicirred stock seed. Pkt 5c; oz. 12c; 2 oz. 23c; ½ lb. 36c; b. 30c; lb. 31.56.

#### SELECTED YELLOW STRASSBURG OR DUTCH

Look at

This For OUALITY

Prices Talk

Quite similar to the foregoing, but the bulbs are rather more flattened, of a darker skin, a little larger and mature a few days later. One of the best to grow for sets, and a splendid keeper. High-grade pedigreed seed. Pkt. 5e; oz. 12c; 2 oz. 21c; ½ lb. 70e; ½ lb. 70e; lb. Sl.35.

### Extra Early Long Keeping Australian Brown Onion

Hardiest of All. Sure Cropper. Abundantly productive. Very fine quality. You can't go wrong on this at the exceptionally low prices at which we offer our home-grown seed This remarkable Onion is of seed. This remarkable of the medium size, wonderfully hard and solid and most attractive for market, both in form and appearance. They are extremely early in ripening and make no stiff In ripening and make no stiff necks or scallions. Every seed seems to produce a good-sized Onion, and the bulb begins to form very quickly when the plant is not over three inches high. Planted with the Red Wethersfield it will average nearly four weeks earlier, and ripen off more uni-

earlier, and ripen off more uniformily. It has the reputation of keeping indefinitely, and we think from its firmness and hardness that it will keep in good condition longer than any other Onion known. The color of the whole year in good condition, and on this and other accounts it will commend itself to Onion Set growers, who often lose heavily in carrying their crop because the sets do not "keep." Pkt, 5e; az. 10e; 2 oz. 18e; ½ lb, 35e; ½ lb, 68e; lb, \$1.25.

### BUCKBEE'S MAMMOTH SILVER KING

THE KING OF WHITE ONIONS

Its Mildness of Flavor and Tenderness are Unsurpassed.

The largest white Onion. Grows to a remarkable size—average diameter is from 5 to 7½ inches. Single bulbs often attain b to 1/2 inches. Single outps often attain weights of from 2½ to 4 pounds each. There is no other white Onion which attains such mammoth size. The shape is flattened, but thick through. The skin is of a beautiful mammoth size.
thick through. The skin is of a beautiful, silvery white. The flesh is of a snowy white and is of a particularly mild and pleasant flavor.

This Onion is very popular and is now a leading sort to grow for the market in many Being a sure cropper, producing immense Onions and enormous crops which bring the highest prices, this variety has been a great money-maker for the grower; but its fine, mild flavor makes it also most desirable for the private gardener. Pkt., 10c; oz. 40c; 2 oz. 75c; ½ lb. \$1.40; ½ lb. \$2.50; lb. 84.50.

### Bermuda Onions

Bermuda Onions are largely grown in the South and have proved a most profitable crop. They are planted there in the fall and shipped North in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1-inch in size.

WHITE BERMUDA—The bulbs are quite broad and flat in form. The color is not a clear white, but rather a pale straw; flesh crisp, solid and mild, early ripening. Pkt. 8c; oz. 25c; 2 oz. 45c; ½ lb.

The BERMUDA—Similar in form and early ripening to the Bermuda White, but grow larger in size, ranging from 3 to 4 inches in diameter; very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Pkt. 8e; oz. 25e; 2 oz. 45e;

singhtly sulfused with pink; very mild. Fat. oc; vs. 387, 7 vs. 487, 10, 786.
CRYSTAL WHITE WAX.—This new variety is a large, pure-white, flat Onion. It is the earliest and most popular Onion with the large growers in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slient; thick or being so clear and pure. Pkt. 8c; vs. 36c; 2 vs. 66c; vs. 40, 81,25.
NOTE—For larger quantities write for Special Prices.

Genuine Teneriffe Grown.

### PICKLING ONIONS

### BUCKBEE'S WHITE PICKLING

BUCKBEF'S WHITE PICKLING

Buckbee's Early White Pickling Onions.

### EARLY WHITE WELSH (For Green Onions)

A most desirable green bunch onion. It does not form bulbs, only scallions or enlargements at the base of each shoot, which are quite attractive and, being extremely early, sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial can remain in the ground for years. Pkt, 10e; oz. 35e; 2 oz. 65e; ½ lb. \$1.25; ½ lb. \$2.30; lb. \$4.50.

# BUCKBEE'S "Full of Life" ONION SETS

Buckbee's Yellow Bottom.

Early White Welsh.

Buckbee's White Bottom,

Buckbee's Red Bottom.

### BOTTOM ONION SETS

Bottom Onion Sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seed. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the sowing of another crop on the land the same year. Every private garden should contain a sowing of sets.

HAMBURG TURNIP ROOTED—The edible portion of this variety is the fleshy root which resembles a small parsnip and has a davor similar to Celeriac; it is extensively used for flavoring soups and stews. Large pkt, 6c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c;

Buckbee's Beauty Parsley.

### PEANUTS

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, but now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a jundered million will be grown with them. Last year about a jundered million and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 80 galons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanut oil is fully equal to oilve oil and for the produces and the produces of th

Peanuts are also valuable for dry-land farming, owing to their Peanuts are also valuable for dry-land tarming, owing to their ability to withstand dry weather. Peanuts are soil builders and renovators. The tops make fine hay, relished by all stock, while the roots furnish rich food for both man and stock. A medium light sandy or loamy soil is the best for Peanuts; they have yielded in a dry season on land too poor for corn a ton of excellent dry forage and from 50 to 60 bushels of nuts per acre.

Plant In rows 21/2 to 3 feet apart and 6 to 8 inches apart in Plant in rows 2½ to 3 test apart and a to 3 micros apart the rows. The Spanish Peanuts are planted either shelled or in pods, using 1½ peck of shelled or 2 bushels in pods per acre. The pods may also be broken in 2 parts, soaked in water and then planted at once. The other varieties are mostly planted also be browned to the other varieties. Flanting must not rate of 1/2 bushel per acre; Planting must not have of 1/2 bushel per acre; and they begin when they mature pull them up, turning the When they weather they will be cured in 24 then planted at once. shelled at the rate of be done until the weather is warm. Cultiv to form pods. When they mature pull the roots to the sun. In bright weather they hours. They must be pulled before frost.

### SPANISH PEANUT

SPANISH PEANUT

The eariest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant Pods are small than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 120 bushels of nuts have been have of the state of the sort of the state

CHOICEST EXTRA EARLY SWEET WRINKLED VARIETIES - Continued

SUTTON'S EXCELSIOR

An extra early dwarf, Wrinkled Pea. A very heavy cropper. Large, massive pods. Rich, delicious flavor.

Large, massive pods. Rich, delicious flavor.

As early as the Nott's Excelsior, but much more productive, with larger and broader pods. It grows about 15 to 18 inches high, and is an exceedingly heavy bearer. The pods are 4½ inches long, very broad, square at the end, and are packed with 6 to 8 immense wrinkled Peas. It is one of the sweetest Peas grown, and is unexcelled in delicious, melting quality, and superb, rich flavor. The vines and pods are of a light green color. Now often grown for the market in place of Gradus, 26rt. th. 4fe-res at the same time. Postpaid, pkt, 10c: ½ lb. 25rt. th. 4fe-res at the same time. Postpaid, pkt, 10c: ½ lb.

LITTLE MARVEL

A New Dwarf Extra Early Pea of Unusual Value, in Enormous Demand Among Market Gardeners.

We are sure that as soon as a gardener becomes acquainted with this variety he will quit growing the old varieties like American Wonder, varieties like American Little Gem, etc.

In season this new sort ripens with the American Wonder, while the pods, usually borne in pairs, are more numerous, larger and contain one or two more Peas. Its two striking features are: The beautiful dark green color of the pods and its great keeping qualities, when ready for the table staying in excellent condition for a week longer than "Nott's" or "Wonders." Little Marvel is an extraordinary cropper, and although the pods are only of medium size, it is fully as productive as most larger podded kinds. Vines 15 inches high; pods in pairs 21/2 to 3 inches long, square at bottom, jammed with 6 to 8 quite large, deep, green, wrinkled Peas, which are of luscious, sugary flavor. Post paid, pkt. 10c; ½ lb. 28c; lb. 50c.

McLEAN'S IMPROVED LITTLE GEM

Vines 18 inches high, covered with long pods, well filled with sweet, tender Peas. Postpaid, pkt. 8c; ½ lb. 22c; lb. 42c. NOTT'S EXCELSIOR

Vines larger, more productive, but a few days later than American Wonder, earlier and more prolific than Little Gem. Unsurpassed in sweetness and quality. Height, 12 to 15 inches. Postpaid, pkt. 8e; ½ lb. 25c; lb. 45c.

TRUE AMERICAN WONDER

Dwarf-wrinkled Pea. esteemed for earliness, productiveness, quality. Strong and robust, about 10 inches high, and produces medium large pods which contain 5 to 6 wrinkled Peas of very sweet flavor. Postpaid, pkt. 8e; ½ lb, 25e; lb. 45e.

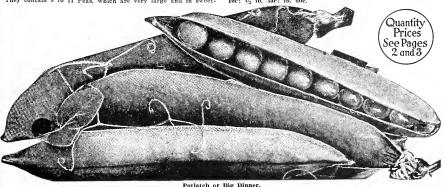

#### POTLATCH OR BIG DINNER

The Best Main Crop Variety of Large Podded Dwarf Peas.

Forliatch is chinook Indian for Big Dinner. The vines are strong variety and vigorous, growing about 20 inches high, with coarse around the coarse of the coarse and the coarse around the coarse of t

I large roduced DWAT Feas.

The finest. Potlatch is a wonder of productiveness and the way the Feas shell out is astonishing. The finest productiveness are a favorite with market gardeners, and owing to delicious quality one of the best for the table. Potlach is a second early, dwarf, very large podded Pea; it has become the leading and most popular variety of its class. Postpaid, pkt. 10c; ½ lb, 53c; lb. 60c.

# BUCKBEE'S "FULL OF LIFE" PEAS

econd Early and Main Crop. Sweet. Wrinkled Varieties.

#### DAISY OR DWARF TELEPHONE

Thoroughbred Main Crop Sweet Wrinkled Peas.

The vines, though growing only about 18 inches in height, are very thick, stout and bear a big crop of large, well-filled pods. The pods average 5 to 6 inches in length, containing 7 to 9 large Peas of a light green color which are tender and sweet. Compared with the tall Carter's Telephone in size, shape and color of pods and exquisite flavor, the two varieties are alike, but the Daisy being dwarf can be grown without support and the rows of it can be made closer together and furthermore it is about ten days earlier than the tall sort. Postpaid, pkt. 8c; ½ lb. 25c; lb. 47c.

#### IMPROVED STRATAGEM

High Grade Standard Dwarf Late Pea,

One of the best of the large-podded sorts. The pods are of immense size and uniformly filled with very large dark green Peas of the finest quality. The vines green 15 to 18 inches in height. About 15 to 6 days later than the Daisy. It is vastly superior to the stocks now generally sold as Stratagem. Vines require no support. Postpaid, pkt. 8c; ½2 lb. 22c; lb. 42c.

#### CARTER'S TELEPHONE Selected Stock

A Standard Large Podded Main Crop Variety in Every Market.

The Telephone has become the leading Pea with market gardeners whose trade appreciates fine appearance and high quality. Vines vigorous, growing about 4 feet high, producing an abundance of very large pods filled with immense Peas, which are tender, sweet and of excellent flavor. Foliage and pods are of light, bright green color. Postpaid, pkt. 8e; ½ lb. 25e; lb. 45e.

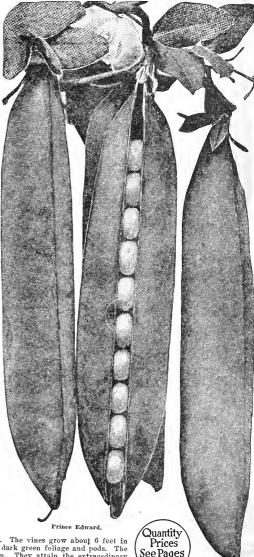

# ALDERMAN OR IMPROVED TELEPHONE

This comparatively new Pea is, in many respects, the very best early main crop variety of the valuable Telephone type. The vines grow nearly 5 feet high, are dark green, vigorous and exceedingly productive. Pods are very large, long, dark green. They appear a little later than those of Carter's Telephone, but are larger, often measuring 6 inches and over. The Peas are of the largest size and of unsurpassed quality. Market gardeners are demanding the large podded, dark-colored sorts, which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most productive variety of this class. We recommend it unreservedly as one of the finest and most desirable for the home as well as for the market gardener. Postpaid, pkt. 8c; ½ lb. 25c; lb. 48c

#### PRINCE EDWARD OR PRODIGIOUS

This is an English strain of the Telephone which also belongs to that type, especially for size of the pods. Prince Edward is considered by all who have tried it the most profitable variety to grow for the trucker, and where it is known there is an enormous demand for it. This is the largest garden Pea we grow. It is truly the giant of the Pea family and is unsurpassed for exhibition purposes. In England, where it has been exhibited in the last few years at the

leading shows, it has always taken the first prize. The vines grow about 6 feet in height, are of vigorous and robust habit and have dark green foliage and pods. The pods are produced in pairs and in great profusion. They attain the extraordinary length of 7 inches and upwards and are closely packed with 11 to 13 large, dark green Peas of delicious quality. Postpaid, pkt. 10c; ½ 1b. 33c; lb. 60c.

2 and 3

Second Early and Main Crop; Sweet, Wrinkled Sorts-Continued

#### NEW EVERBEARING

The Great Continuous Everbearing Variety.

Vine stout, about two and ne-barriers and the same at a copy six to ten broad pods. If these are picked as they mature and the same and are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The Peas are very large and wrinkled, cook very quickly, are tender, of superior flavor and preferred by many to any other sort. Postpaid, plt. 8c: tender, of superior 1/2 lb, 25c; lb. 45c.

IMPROVED CHAMPION OF ENGLAND

and mixed

IMPROVED CHAMPION OF ENGLAND

The Standard Sweet Flavored Late Wripkled Pea.

Very productive and universally admitted to be one of the richest and best flavored eas. Height four to five feet; seed light green and much shriveled. Very inferior and mixed stocks of this sort are frequently offered, but when the seed is as well grown and selected as that we in quality to any in cultivation and one of the best of its season, either, for the amateur or market gardener. This is the latest pea we grow; it is about a week later than Telephano. Postpatik, plat. Fer. 32 b. 25e; lb 40e

#### HORSFORDS MARKET GARDEN

GARDEN

A first-class wrinkled
Pea: medium late. Height
2 to 3 feet. It is a
profitable sort for
market gardeners,
equally good for the
home table and also
much used by canners. Medium sized pods, enormously productive. Postpaid, pkt. 8c; 1/2 lb. 20c; lb. 38c.

#### YORKSHIRE HERO vines are stout, of medium

The vines are stout of medum height, about two or the medum height, about two or the dot of the medium size, about three inches long filled with large peas that remain a long time as most sorts. The peas are of fine quality and will be preferred to any other by those who like a rich, marrow-like pea. Seed large, wrinkled and flattened. Postpaid, pkt. 86; ½ lb, 20c; lb, 38c.

#### GRANT'S FAVORITE

This fine variety of our own introduction is unquestionably the sweetest late Pea ever offered, coming into use just after the early varieties are through bearing. Luxuriant grower, from 3 to 4 feet high. The pods are of good size, and always well filled with exceptionally sweet and highly flavored Peas. It is nearly an upright grower, but will do better if staked or planted along a fence. Postpatia, pkt, 8; 4; 4 be 35e; tb 45e.

Quantity Prices See Pages 2 and 3

#### Buckbee's New Vigorosa

THE MOST MAGNIFICENT OF ALL NEW PRODUCTIONS

Nothing like it for a second early Pea has ever been produced. It requires no support. There is no Pea more prolific. It is a leader in the market and in demand among epicures. To try it is to surely succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is ABSOLUTELY UNPARALLELED.

No bushing at all is required. The vines grow to be but 20 inches tall and are so stout that they bear immense crops without falling. As an enormous yielder the New Vigorosa ranks first and has no close rival. When it comes to quality-well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases Critical Judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. Postpaid, pkt. 10c; 1/2 lb. 25c; lb. 45c.

Buckbee's True Sugar Pie.

#### BUCKBEE'S TRUE SUGAR PIE

One of the very earliest and very best pumpkins, fruits are small, round, with orange-colored skin and flesh. Remarkably prolific and an excellent keeper. The flesh is thick, fine-grained, dry, sweet, sugary, and of the finest quality for pies. It cannot be beat for table use. Pkt. 5c; oz. 10c; 2 oz. 18c; 1/4 lb. 30c; 1/2 lb. 55c; lb. \$1.00.

#### NEW JAPANESE PIE

The earliest pumpkin, the seeds marked with curious indentations like Japanese letters. Fruits medium size, good keepers and weigh 15 to 20 pounds each. The flesh is a keepers and weigh 15 to 20 pounds each. The flesh is a rich salmon, unusually fine grained. For making pies, custards, etc., they certainly have no superior. Containing but little water, can easily be cut and dried like dried apples and make excellent pies or sauce for winter use. Pkt. 5e: oz. 12c; 2 oz. 23c; 1/4 lb. 45c.

RECORD

New Japanese Pie.

#### BUCKBEE'S KING OF THE MAMMOTHS

Wonderfully grand and colossal variety, astonishing everyone by its mammoth size and heavy weight. Think of it-a single Pumpkin weighing 469 pounds!, Many of our customers saw this specimen on exhibition at the World's Fair. King of Mammoths is always a prize winner at fairs and exhibitions. Notwithstanding its enormous size, it is one of the best pie and table varieties grown. A splendid keeper, and exceptionally valuable for feeding purposes. We control the complete stock of this variety, Send to Buckbee for true stock We do not save seed from specimens weighing less than 200 pounds. Pkt. 10c; oz. 15e; 2 oz. 28e; 1/4 lb. 50e; 1/2 lb. 90c: lb. \$1.75.

#### GOLDEN OBLONG

Very hardy and productive; pumpkins fifteen to twenty inches in length and eight to ten inches in diameter. Skin of a rich golden orange, thin but tough, making it almost as good a keeper for Winter as the hard shell squashes. Flesh is light golden yellow, of very rich, fine quality. Pkt. 6c; oz. 10c; 2 oz. 15c; 1/4 lb. 28c; 1/2 lb. 50c; lb. 90c, postpaid.

#### NEW CALHOUN

BUCKBEE'S

KINGOFTHE

MAMMOTHS

Fine variety, heavy and solid; very productive. Skin rich cream color, desh salmon yellow, very thick, fine grained and of superior quality. Pkt, 5:; oz. 12e: 2 oz. 21e: ½ lb. 40e.

#### LARGE CHEESE

Sometimes called Kentucky Field—Flattened fruit with broad ribs: creamy buff skin; averages 2 feet in diameter. It is an excellent keeping variety, with thick flesh of exceptionally fine quality. Pkt. 5c; oz. 7e; 2 oz. 12c; 1/4 lb. 20c; 1/2 lb. 30c; lb. 50c.

#### CUSHAW OR CROOKNECK WHITE

Creamy-white skin. Flesh yellow, solid and sweet. Popular table. Pkt. 5c; oz. 12c; 2 oz. 23c; ½ lb. 45c; ½ lb. 80c; lb. \$1.50. Popular for the **QUAKER PIE** 

Fine grained and of rich flavor, having none of the stringy nature common to so many varieties. It is early and keeps late. Oval shaped, tapering to the ends. Of cream color, both inside and out. Pkt, 5e; oz. 21e; ½ lb. 40c.

#### NEW WINTER LUXURY

Fine keeper and enormously productive. It is very finely netted and in color is a golden russet. Pkt. 5c; oz. 10c; 2 oz. 18c; 1/4 lb. 30c.

#### TENNESSEE SWEET POTATO

A magnificent parabel of which was a little ribbed. Color creamy white sheed variety of medium bare a little ribbed. Color creamy white sheed variety of another bare a pasarance of sweet potatoes, but is of more delicious taste. Flesh thick, creamy white, remarkably fine grained, dry and brittle. There is no superior for making blee and custards. Hardy and productive, and keeps perfectly sound until late in the Spring. Pkt. Sc; oz. 10e; 2 oz. 38e; ½ lb. 36e.

#### BUCKBEE'S NEW SAND-WICH ISLAND

A splendid variety, coming from a remote section of the from a remote section of the chance our representative found it. It has created a great furore in its new home. Remarkably distinct in every bearer and deliciously thick fiesh. An excellent keeper, seed of our own growth. Pkt. 10c; oz. 15c; 2 oz. 25c; 3/4 lb. 45c; 3/2 lb. 40c; 1/2 lb. 4

#### WESTERN FIELD

Cnoice stock seed, by mall. postpaid, oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 85c. By express of freight, at buyer's expense, 5 lbs. \$3.85; 10 lbs. \$7.50.

# The Cream of the Extra Early Radishes

# Buckbee's Rapid Forcing.

#### BUCKBEE'S RAPID FORCING

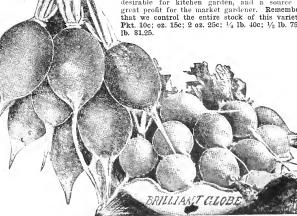

The Earliest of All Radishes.

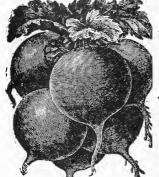

Quick growth is one of the main essentials for a crisp and tender Radish. Buckbee's Rapid Forcing matures in about 14 days from sowing; that is several days ahead of any other variety known today. This Radish is of a fine turnip shape. It remains in good condition without getting hollow or pithy longer than any other extra early variety. The flesh is pure white, crisp and of very pleasant flavor. The skin is a most attractive bright scarlet. The leaves are very short, which admits of close sowing. Its extreme earliness, -maturing before all other kinds-

its beautiful bright searlet color, and its unusually brittle and delicious quality, make it most desirable for kitchen garden, and a source of great profit for the market gardener. Remember, that we control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 75c;

#### BUCKBEE'S BRILLIANT GLOBE

Buckbee's Brilliant Globe is a great improvement on the well-known Scarlet Globe, as it runs more even in shape and size, is of a richer and brighter color and is very much earlier. It will surely take the place of the older variety where known. It is well suited for greenhouse and hotbed forcing, and also for growing outdoors. It is of attractive globular form, of magnificent, glowing, bright scarlet color, and has pure white, crisp, tender and juicy flesh. We especially recommend this variety to the market gardener, but it is also one of the finest for the home garden. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 75c; lb. \$1.25.

Buckbee's New Early Red King

#### BUCKBEE'S CRIMSON GIANT GLOBE

Sweet, Crisp, Juicy, Mild-Wonderful Yielder, Beautiful Color, Large Size.

This Radish is an entirely new type and differs radically from all varieties hitherto in cultivation, in-sofar as its roots attain more than double the size of other round, early double the size of other round, early varieties, without getting pithy or hollow. It is very early, notwithstanding its size. Color crimson, flesh pure white, of the best quality. The roots often weigh 1½ ounces each and are crisp and juicy. Fine for outdoors and forcing. seed should be sown very thinly to permit full development of the roots. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

#### NEW TRIUMPH

The Greatest Radish Novelty.

Both unique and useful. Matures early, generally in about 14 days. Nothing produces a more pleasing effect on the table than this beautiful variety. The roots are of globular form, tops are short and attractive, which make it valuable for cultivation under glass. The flesh is very crisp and solid and of mild, pleasing flavor. Its most attractive and distinctive feature, however, is the unique color of the skin. The ground color is beautiful ivory white, striped horizontally and splashed with bright scarlet. Sure to become popular with market gardeners and private planters. Pkt. 5c; oz. 10c; 2 oz. 18c; 1/4 lb. 30c; 1/2 lb. 55c; lb. \$1.00.

#### NEW LEAFLESS

The extra early forcing Radishes lately introduced are remarkable for the small size of their leaves; they develop their roots in so short a time that the latter are practically in advance of the leaves. The character is still more noticeable in this new variety. The seed leaves, which are noted for great development from the start, are the only green parts to be seen on the plants until the bulbs are almost large enough for pulling. At that time one or two short leaves only are produced. The roots are of the shape and golor of our Rapid Forcing Radish. Pkt. Sec. vo. 10c. 2 ez. 18e; 1/4 lb. 30e; 1/2 lb. 55e; lb. \$1.00.

#### EARLY SCARLET TURNIP WHITE-TIPPED

For many years we have found this variety to be the most popular of all among private gardeners, and unsurpassed as a Table Radish, where, by reason of the private gardeners, and unsurpassed as a Table Radish, where, by leasted of the strong, contrasting colors of the root, it makes a most attractive appearance. The flesh is crisp, white and tender, and extremely mild. Roots smooth, fine bright scarlet, with clear white tips. Very early. Very popular for planting outdoors and a splendid market variety. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

# **BUCKBEE'S EXTRA EARLY RADISHES**

#### BUCKBEE'S NEW EARLY RED KING

The Earliest and Best; Sweet, Crisp, Juley, Mild; Wonderful Yielder, Beautiful Color, Uniform Size,

This new variety is our own production and is one of the earliest ever grown-fully matured Radish being pulled on our Rockford Trial Grounds in the short space of 14 days from time seed was planted. Won favorable comment and helped to secure First Prize and Diploma at the State Exhibit at the Springfield, Illinois, State Fair. It is of small size; just right for the purpose; beautiful dark red skin; ivory white flesh; extremely mild and sweet flavor; retains its crispness even after quite old and never becomes pithy. Pkt. 5c; oz. 12c; 2 oz. 21c; 1/4 lb. 40c; 1/2 lb. 75c; lb. \$1.25.

#### BUCKBEE'S CRYSTAL FORCING

The Quickest Growing White Radish.

Without an equal. Matures in 14 days. Pure snow-white in color-fairly crystal -so clear and transparent. Nothing is more tempting and pleasing than a combination of Buckbee's Crystal Forcing and Buckbee's Rapid Forcing when arranged in market or on the table. Pkt. 5c; oz, 10c; 2 oz, 18c; 1/4 lb, 30c; 1/2 lb. 55c; lb. \$1.00.

#### VICK'S SCARLET GLOBE

Its color is a rich scarlet. It has a small top and is a highly bred Radish. A grand forcing variety and excellent for sowing outdoors. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 28c; ½ lb. 50c; lb. 90c.

#### EARLY WHITE TURNIP

Very handsome; of quick growth; sweet, juicy and tender. Skin ivory white; flesh pure white. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 28c; ½ lb. 50c; lb. 90c.

#### EARLY SCARLET TURNIP

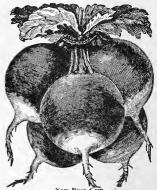

The famous standard variety. One of the finest, juiclest, sweetest and best Rad-ishes for early use grown. Rich, red color; fiesh white. Pkt. 5c; oz. 10e; 2 oz. 15c; 1/2 lb. 25c; 1/2 lb. 45c; lb. 85c.

#### NEW ROSY GEM

Handsome Turnip Radish, a great favortic in many markets and for early planting outdoors. But little later than the preceding and will give entire satisfaction where extreme earliness is not the object. Roots slightly flattened on the underside, color very dark scarlet with a white tip; fiesh white and of the best quality. One of the best, either for home or market use. Pkt. Sc; oz. 10e; 2 oz. 15e; ½ lb. 28e; ½ lb. 59e; lb. 90e; 2 oz. 15e; ½ lb. 28e; ½ lb. 50e; lb. 90c.

Buckbee's Crimson Giant Globe.

# BUCKBEE'S Long and Half Long EARLY RADISHES

EARLY SCARLET OLIVE SHAPED

This variety has a small top and is very early, making it one of the best for forcing under glass. Roots ready to pull may be had in three weeks, and they remain fit for use longer than any other early variety. They are small, true olive shaped, smooth, very deep red in color; fiesh is white, crisp, tender and mild in flavor. May be planted very closely owing to their small tops. Fkt. 5c; 0x. 10c; 2 0x. 15c; ½ the 28c; ½ lb. 28c; ½ lb.

#### EARLY WHITE OLIVE SHAPED

A splendid olive-shaped radish pure white in color. Distinctly earlier than any other half long white sort. Good-sized radishes may be pulled in 20 to 25 days which are solid and crisp, of good flavor, and first-class in every respect. A splendid companion to Early Scarlet Olive Shaped. Pkt. 5e; oz. 10e; 2 oz. 15e; ½ lb. 25e; ½ lb. 45e; lb. 85e.

#### PARIS BEAUTY OR HALF LONG DEEP SCARLET

A brilliant deep, rich red color, changing to a pure white in the lower portion. About 3 to 4 inches long, but thicker than the foregoing variety. The flesh is very white, crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; 34, lb. going variety. The fles and tender. Pkt. 5c; oz 28c; ½ lb. 50c; lb. 90c.

# BUCKBEE'S "FULL OF LIFE" HUBBARD SQUASH

Four varieties that have been perfected until they are now absolutely unequaled NEW GOLDEN HUBBARD

First Offered by Us as a Novelty in 1901. Now Known and Grown in Every State in the Union.

This is a true Hubbard Squash, except in color, which is bright golden. The vine is a vigorous but not rampant grower and wonderfully productive, expending the energy derived from liberal fertilizing in the production of an increased number rather than of overgrown and coarse fruits, as some varieties are apit to do. It ripens its crop very early and uniformly, thus making it a certain cropper. The fruits are very uniform in size, weighing from the variety conditions the state of the variety  It cooks very dry, fine grained and good on the variety of the

½ lb. 65c; lb. \$1.20.

#### BLUE HUBBARD or MARBLEHEAD

Good Size, Splendid Keeper, Excelient Shipper.

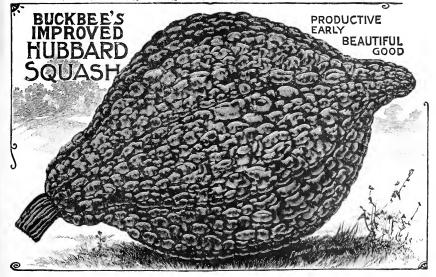

Without question this is one of the best fall and winter varieties; flesh bright, creamy yellow; fine grained, very dry, sweet and delightfully flavored; keeps splendidly throughout the winter. Splendid for all purposes.

The shell is hard and heavily warted. Just wash it clean, cut in half, take out the seeds, bake twenty minutes and you will have the most delicious squash you ever tasted. Splendid for pies because of its sweetness and dainty Havor. Ripens in the fall and keeps as long as Euckbee's Improved Hubbard. Pkt, 6c; 0z. 12c; 2 oz. 21c; ½, 1b. 10c; ½, b. 70c; lb. \$1.35,

#### BUCKBEE'S IMPROVED HUBBARD

The Famous American Standard Winter Squash.

The Grand Old Favorite—This is a superior selection of this famous variety and one of the best winter Squashes; flesh bright orange yellow, fine grained, very dry, sweet and rich flavored; keeps perfectly good throughout the winter, boils or bakes exceedingly dry and is esteemed by many to be as good baked as a sweet potato. Our stock is most carefully selected with regard to quality of the flesh and color and wartiness of the shell, but the latter peculiarities are largely determined by the soils in which the Squashes are raised. Our customers can plant this variety in perfect confidence that every fruit will be a pure Hubbard. Pkt. Sci. oz. 10c; 2 oz. 18c; ¼ lb. 35s; ½ lb. 65c; lb. Sl.25,

# THE EARLIEST SCARLET TOMATOES

BUCKBEE'S EARLIEST MARKET

The Earliest, Large, Smooth, Scarlet Tomato in Existence. Indispensable to the Market Gardener. A Great Money-Making Tomato.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a larger portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Buckbee's Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent

kind also for the home garden, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1920. Pkt. 10c; oz. 28c; 2 oz. 50c; 1/4 lb. 95c; 1/2 lb. \$1.70; lb. \$3.00.

#### MANSFIELD TREE OR MAMMOTH PRIZE

This wonderful variety grows from 10 to 15 feet in height, and will begin to ripen by July 4th and bear until killed by frost. Flesh firm and solid, almost seedless and of the most delicious flavor. Pkt. 5c; oz. 35c; 2 oz. 65c; 1/4 lb. \$1.25.

#### CHALK'S EARLY JEWEL

The largest, smoothest, and finest flavored extra early bright red Tomato. Within a week to ten days as early as Spark's Earliana, it is even a heavier cropper, with Tomatoes of a larger size and sweeter flavor. Pkt. 5c; oz. 25c; 2 oz. 40c;  $\frac{1}{4}$  1b. 70c;  $\frac{1}{2}$  1b. \$1.30; 1b. \$2.50.

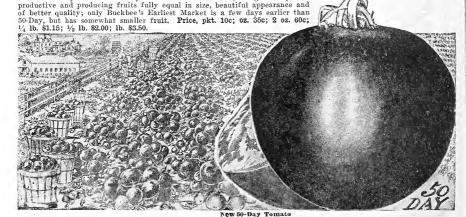

#### **BUCKBEE'S NEW 50-DAY TOMATO**

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes.

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicions sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and it should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more

# BUCKBEE'S "Full of Life" TOMATOES—Scarlet Varieties—Continued

#### NEW EARLIANA

An extremely early, smooth brighty rounds of good size and favor. Is among the ven that ready or the market, and not only remarked for its earliest on the services of the ser

#### BUCKBEE'S BONNY BEST

One of the very best early Tomatoes yet introduce; within a week as early as Earliana, but a much heavier cropper, producing Tomatoes of much larger size, more attractive in shape and color. The fruits are very smooth, round, very deep, solidly meaty, with only a few small seed cells; of bright deep scarlet color and of excellent quality. The plants are very vigorous, of robust growth and fruit continuously throughout the season. Very desirable for the home garden and one of the best for market gardeners whose trade demands extra fine fruits. As a canning sort it yields from 12 to 15 tons to the acre, grading as No. 1. Pkt. 5e; oz. 25e; 2 oz. 40e; ¼ 1b. 70e; ½ 1b. 81.30; 1b. 82.50.

#### BUCKBEE'S NEW EARLY BANQUET

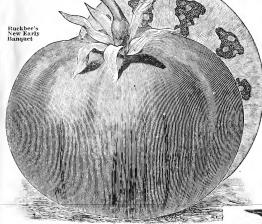

The Earliest and Finest Very Large Scarlet Tomato.

The most valuable variety introduced in the last 30 years.

As large and more productive and earlier than Stone, the king of all main crop tomatoes for the canner and market gardener.

This new variety which we introduced in 1918 has all the good qualities of the old Stone, it has the same large solid, smooth fruits, and its immense productiveness but it far excels it in earliness, beginning to fruit about 2 weeks earlier, hence, lengthening the bearing season.

The fruits are brilliant, bright-red, often weigh a pound and a buff each and are borne in large clusters averaging six and more to the cluster; all fruits are invariably of marketable size and have flesh of the richest, brightest red color, which makes them especially suitable for canning and catsup making. Price, pkt. 8c; 0z. 35c; 2 0z. 65c; ¼ 1b. 82.15; 1b. 83.75.

#### NEW JOHN BAER

An extra early Tomato, large, smooth, bright scarlet fruits of excellent quality. Short, vigorous vines, enormously productive. Fruits larger, smoother, with less seeds than those of Earliana, but somewhat later.

For early crops the New John Baer Tomato is planted exclusively in many sections supplying large city markets.

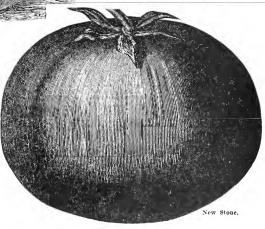

large city markets.

Plants are compact in growth, with short, closeionited branches, setting fruits very freely in the
case. So freely are the fruits set that one plant
case. So freely are the fruits set that one plant

form Tomatoes in a season. Most valuable for the
market gardener and very desirable for home use.
Pkt. 8c; oz, 25c; 2 oz, 45c; 1½ lb. 80c; ½ lb. 81,45;
lb. 82.75.

#### THE NEW STONE

#### Buckbee's Improved Strain

A standard main crop variety of red Tomatoes. Late, enormously productive, with very large, very deep solid and very smooth fruits of spiendid shape and finest quality. Unpurposed for slicing and canning. The vines are largested for slicing and very productive. Buckbee's lungwood Storous and very productive. Buckbee's lungwood Storous and very being larger, smoother, more uniform in size and shape and of brighter color than that offered by others. Pkt. 5ej oz. 20c; 2 oz 35e; ½ lb. 60e; ½ lb. 81.10: lb. 82.00,

Trade Mark Registered 1914-By H. W. Buckbee, Et. Al.

# BUCKBEE'S BEEFSTEAK

# The King of All Main Crop Tomatoes

NOTHING in the way of a Tomato Creation has ever achieved in so short a time, the tremendously excellent reputation that has come to BUCKBEE'S BEEFSTEAK. Growers from every section of the wide world have sent in unsolicited praise, and the tests to which they have subjected it teave no room for doubt that it has all the qualities required in a Tomato. Its important features are:—Earliness, Lar. Street and the street of 
variety.

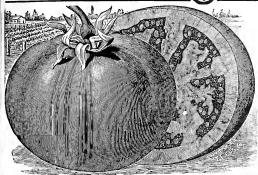

#### THE WORLD'S ONE UNBEATABLE TOMATO

We control the entire seed supply and offer the choicest "Full of Life" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Beefsteak." Pkt. 10c; 3 pkts. 25c; ½ 0z. 30c; 0z. 50c; 2 0z. 90c; ½ lb. \$1.75; ½ lb. \$2.00; lb. \$5.00; 
# Ten Reasons Why You Should Plant Buckbee's Beefsteak Tomatoes

- 1-Introduced by us in 1904, and has never failed to give
- -Introduced by us in 1994, and has never laised to give satisfaction.
  -Reputation. Less than 1999 packets were sold in 1994.
  Over 150,000 of our customers were pleased in 1919. This is a wonderful record. 3-Has been grown in every state in the Union with splendid
- 4-Large size; in fact, the largest smooth Tomato ever grown,
- 5—Matures early, and continues to set fruits until frost. 6—A spiendid shipper, even when sent long distances. 7—Enormously productive; in fact, we claim and believe that you can raise more bushels per acre from Beefsteak than from any other variety.
- 8—Handsome color, which finds it a ready sale in any market, 9—Good keeper. Holds up a long time after picking. 10—Flavor unequalled, practically all meat, having few seeds.

ROCKFURD SEED FARMS: H.W. BUCKBEE ROCKFORD. ILL INOIS, FOREST CITY GREENHOUSES.

# PINK or PURPLE TOMATOES

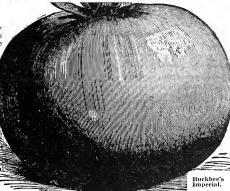

The Earliest Pink in Cultivation.

The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, goodsized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 25c; 2 oz. 45c; 1/4 lb. 80c; 1/2 lb. \$1.45; lb.

#### New Early June Pink.

#### LIVINGSTON'S GLOBE

A very beautiful second early variety. The fruits are of large size, specimens weighing over one pound have been grown from our seed, and they retain a marketable size throughout the season. Always smooth, have firm flesh and very few seeds. They will ripen evenly without any green core. The color of the skin is a fine glossy rose, tinged with purple. The Globe is exceedingly productive, the plants being literally loaded with fruit. In quality there can be nothing more desirable, flesh being mild, pleasant, and of delicious flavor. Pkt. 5c; oz. 25c; 2 oz. 45c; 1/4 lb. 80c; ½ lb. \$1.45; lb. \$2.75.

#### BEAUTY

 We have been perfecting this to a larger, smoother fruit than the original stock, and think we have made it one of the smoothest and best of the large purple sorts. Fruit large, uniform, very smooth; color purplish pink, flesh light pink, excellent flavor. The vines are large, vigorous, not subject to rust or blight and bear enormous crops until killed by frost. Pkt. 5c; oz. 20c; 2 oz. 35c; 1/4 lb. 60c; 1/2 lb. \$1.15; lb. \$2.25.

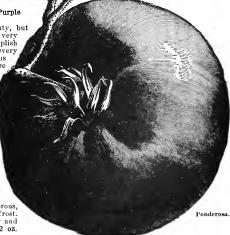

#### BUCKBEE'S IMPERIAL Unquestionably the Most Productive of the Large Purple Tomatoes.

BUCKBEE'S IMPERIAL is fully as early as Beauty, but the fruits are much larger and heavier. They are very showy, smooth, of fine shape, beautiful, glossy, purplish crimson color, and command the highest prices in every market. The vines are hardy, vigorous and enormous croppers, single plants often yielding under field culture more than a bushel of fully grown, ripe fruits. plants bear continuously until destroyed by frost. The

flesh is firm, of the finest flavor; ripens evenly to the stem. The skin is thin but tough. BUCKBEE'S IMPERIAL is the best purple variety to grow for the market. A splendid long-distance shipper and most desirable for the home market. Pkt. 10c; oz. 28c; 2 oz. 50c; 1/4 lb. 95c; 1/2 lb. \$1.70; lb. \$3.00.

#### HENDERSON'S PONDEROSA or No. 400 Shape Perfect, Size Massive, Extra Prolific, Early and Late. Finest Quality

Monster Tomatoes, the largest of all Tomatoes, often weighing 2 to 3 pounds each. The fruits are oblong in form, deep through, of rich, bright solid meat, exceptionally free from seed and unsurpassed in sweet delicious flavor; used raw or cooked; a single Tomato enough for a meal. The vines are healthy and vigorous, medium early, and bear large crops continuously until frost. Buckbee's strain is exceptionally fine, bearing smoother and larger fruits than any other one. Pkt. 8c; oz. 35c; 2 oz. 65c; 1/4 lb. \$1.25; 1/2 lb. \$2.30; lb. \$4.00.

# BUCKBEE'S "Full of Life" TREE TOMATOES

The so-called Tree or Bush sorts are the most valuable Tomatoes for the home garden, where room is generally short, as they grow stiffly erect and have close, heavy foliage, allowing very close planting. Even if set as close as 12 x 24 inches apart they will produce an abundant erop. All of these varieties are very productive and of the finest quality.

Buckbee's Tree or Station Tomato.

EARLY DWARF CHAMPION—Very early; hard to beet for home use. Color purplish pink. Fruit smooth, symmetrical, solid and menty. Tkt. Ser, ex. 25c; 2 oz. 40c; ½ lb. 70c; ½ lb. 81.86; lb. 82.56.

BUCKBEE'S WORLD'S FAHR—The fruit is a beautiful golden yellow shade, good size, round and solid, with few seeds; flesh meaty and very sweet and mild. A handsome table sort. Pkt. 8c; oz. 35c; 2 oz. 65c; ½ lb. \$1.25; ½ lb. \$2.29; lb. \$4.00

BUCKDEE'S EARLY PROSPER-ITY—Prosperity is a Tomato of stering worth, one that is bound to please. It is the earliest of the Tree Tomatoes, with large, perfect fruits; a SPLENDID KEEPER, AN ENORMOUS YIELDER AND FINE SHIPPER. COLOR BRIGHT SCARLET RED. invaluable for the house and the property of the second of the property of the color of the SCARLET RED. invaluable for the house and the color of the color of the SCARLET RED. Invaluable for the color of the SCARLET RED. Invaluable for the color of the SCARLET RED. Invaluable for the color of the scarlet of the color of the 

New Dwarf Ponderosa.

#### BUCKBEE'S NEW TREE or STATION

This New Tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil and to the earliness with which it reaches its maturity. In color the fruit is purplish pink and it is always round, smooth and symmetrical. Size medium, table quality superior. A good shipper. Pkt. 6c; oz. 28c; 2 oz. 50c; 4 lb. 95c; ½ lb. 81.70; lb. 83.00.

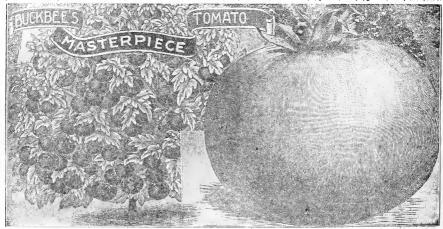

#### NEW DWARF PONDEROSA

A cross between Dwarf Champion and Tall Ponderosa. The fruits are glossy, purplish-red, with solid, meaty, bright-red fiesh; no core and but few seeds. They are fully as large as those of the Tall Ponderosa. Plants grow about 2 feet high, stocky and branching, bearing Tomatoes in great clusters from July until frost. Pkt. 8; 0x. 35; 2 0z. 55; 2 fb. Sl.25.

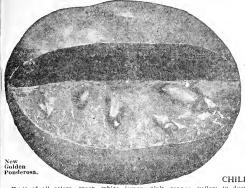

#### BUCKBEE'S NEW MASTERPIECE TOMATO

The Tomato that will surprise you for large size, handsome shape, beautiful rich crimson-purple color, thin and tough skin, solid meaty flesh, small seed cells with few seeds; rich appetizing flavor; smooth, clean fruit that does not crack, no hard or green core, and the true dwarf tree type; plants well balanced, strong and vigorous, phenomenally productive, bearing regular sized fruits continuously until frost. In fact, New Masterpiece is the acme of perfection in the Tomato family, the largest fruiting and best all-around dwarf growing sort. We have no hesitanev in offering "New Masterpiece" as a candidate for public favor, knowing a trial will convince the most skeptical it is the Tomato of Supreme Excellence.

We control the entire stock of this variety. Price, pkt. 8c; oz. 35c; 2 oz. 60c; \(\frac{1}{4}\) lb. \$1.15; \(\frac{1}{2}\) lb. \$2.00; lb. \$3.50.

# **BUCKBEE'S "FULL OF LIFE" YELLOW TOMATOES**

#### NEW GOLDEN PONDEROSA

A splendid novelty. Equals its famous parent, the red Ponderosa, in every respect but color. It possesses its large size, heavy meat and luscious quality, and in addition is of a striking rich golden yellow color, making a novel and most attractive table effeet, especially when served sliced with a red variety. This is the largest of the yellow varieties in cultivation. The fruits are very uniform in shape and size. contain but little core and few seeds, and are a solid mass of succulent meat. Their skin is thin and they ripen the first fruit quite early, continuing to bear until frost. Pkt. 8c; oz. 35c; 2 oz. 65c; 1/4 lb. \$1.25.

#### BUCKBEE'S GOLDEN PRIZE

New golden yellow sort. Flesh thick and of extra quality. Produces enormous crops of quite large fruits. Even if you should be prejudiced against a yellow sort, this will please you. Pkt. 6e; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1,70; lb. \$3,00.

SEE also BUCKBEE'S WORLD'S FAIR on page 82

#### CHILDS' RESPLENDENT-THE NOVELTY TOMATO

Fruit of all colors, green, white, lemon, pink, orange, yellow to deep ruby-red, borne on the same plant in wonderful abundance. Showy and attractive beyond description. Plant dwarf, stout, upright with novel foliage. Fruit large with more solid flesh and less seed cavity than any other. Pkt. 8c; or. 35c; 2 or. 35c; 2 do. 8t.25.

MIXED TOMATO SEED For the benefit of many customers who would like to try all kinds, we offer this mixture Pkt, 5c oz. 25c; 2 oz. 40c; 34 lb. 75c.

#### SMALL FRUITED TOMATOES

CURRANT RED-Extremely small, exquisite flavor. Pkt. 5c; oz. 25c.

CHERRY RED - Fruit about five-eighths of an inch in diameter; perfectly round and smooth. Fine for pickles and preserves. Pkt. 5e; oz. 30e.

CHERRY YELLOW-Differs from Red Cherry in color only. Pkt. 5e; oz. 30c.

PEACH NEW ROSE-A most deand handsome Tomato appetizing, fruity flavor net with in any other licious and with appetizing, not met with in any variety. Pkt. 5e; oz. 25c.

PEACH NEW YELLOW—Same as New Rose Peach, but lemon-yellow. Pkt. 5c; oz. 25c.

PEAR RED-Bright red, excellent flavor. True small pear-shaped. Pkt. 5c; oz. 25c.

PEAR YELLOW-Solid flesh, excellent flavor. True small pear-shaped. Pkt. 5c; oz. 25c. PLUM YELLOW-Fruit 2 inches

long. 1 inch across, with yellow skin and flesh. Pkt. 5c; oz. 25c. RED PLUM-Same as Yellow except color. Pkt, 5c; Plum oz. 25c.

UCKREE'S SNOWBALL. The New White Tomato—A grand new variety of recent introduction, which always gives the best of satisfaction. Color is pearly white inside, skin acarly the same shade, coming into fruit early and yielding throughout the season an abundance of fine Tomatoes which are 1½ inches in diameter, round and smooth. No better variety can be found for table, pickling or canning purposes. Pkt, Sc; ½ oz. 25; oz. 40e; 20. 75; oz. 75; c), b, St.25. BUCKBEE'S SNOWBALL,

Yellow Pear.

pleasant strawberry-like flavor and is much relished raw, but generally used for preserves, for which it is excellent. The small yellow fruits are enclosed in a husk, and when ripe are half an inch in diameter. Easy to grow, do well on any dry soil. Flants do well on any dry soil. Flants preading growth; im-mensely productive. Pkt, 5c; ox.

# EARLY VARIETIES

#### EARLY SNOWBALL or SIX WEEKS

The earliest round variety. Roots of medium size, smooth, very beautiful and showy. Skin and flesh snow white. Very mild and sweet. Pkt. 5c; oz. 10c; 2 oz. 15c. 1/4 lb. 28c; 1/2 lb. 50c; lb. 95c.

# BUCKBEE'S RED or PURPLE TOP

STRAP LEAF
There is probably a larger amount of seed of this variety sown annually than any sother turnip. As a market variety, without doubt the peer of all. Has single tap root and a bright purple top. Matures 8 or 9 weeks from sowing. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ 1b. 25c; ½ 1b. 45c; lb. 80c.

#### NEW GOLDEN GLOBE

Most delicious and sweetest of all yellow fleshed turnips, very superior for all general purposes. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 28c; ½ lb. 50c; lb. 95c.

#### NEW WHITE EGG

NEW WHITE EGG
This is certainly one of the very choicest and finest varieties; producing beautiful egg-shaped roots with thin white skin. They are always firm, solid and of sweet flavor. A most profitable market sort. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ lb. 28c; ½ lb. 60c; lb. 35c.

#### EXTRA EARLY VARIETIES

#### EXTRA EARLY PURPLE TOP MILAN

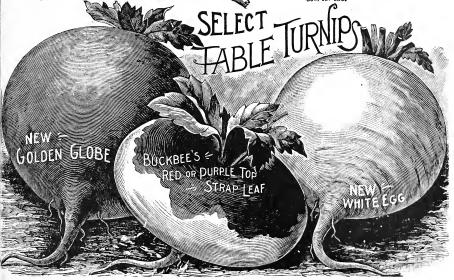

MILAN
The very earliest Turnip grown. The tops of this variety grow very small and are distinctly strapleaved, growing very exceed and compact. The roots are small and flat Turnip-shaped; skin purple on top of the root, clear white below. Flesh white, of mild sweet flavor. Pkt. Sc; 02. 15e; 2 0z. 28e; 3/4 lb. 50e; 1/2 lb. 90e; lb. \$1.75.

#### BUCKBEE'S EXTRA EARLY CAMEO

A grand acquisition from the land of the Czar, identical with Buckbee's Cardinal in every way except color, which is a beautiful pearl white. By all means include it in your order. Pkt. 5c; oz. 12c; 2 oz. 23c; 1/4 lb. 45c; 1/2 lb. 80c; lb. 81.50.

#### BUCKBEE'S EXTRA EARLY CARDINAL

Called by some Scarlett Kashmyr-Verger early variety, of magnificent shapping ready variety, of magnificent shapping qualities. Outside skin brilliant cardinal red color, resembling a radish; the flesh is white, tender, crisp, of splendid table quality. It keeps well. Pkt. 5c; 02. 15c; 20. 28c; 4 bi. 50c; b. 81.75.

# BUCKBEE'S BEST TABLE TURNIPS—Cont'd.

# Cow Horn.

combination with hay

#### Cow Horn

Sometimes called Long White. The roots are long, carrot-like, of cylindrical form but ending in a point and slightly crooked; they are 12 to 15 inches long by 24; inches in diameter and grow partly above the ground. The color is pure white with a little shade of green on top. Well flavored and of rapid growth. Fine for Fall and early Winter use. Yery valuable also as a soil enricher; can be sown broadcast in \$10 or stubble ground, will grow on poor, wormout soils, to \$10 or 
#### Improved Early Flat White Dutch

Excellent early garden variety and very much used. The roots are of medium size, very flat and the color white. Very early, sweet and tender. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ lb. 25c; ½ lb. 45c;

#### New White Flat Strap Leaf

Identical with Buckbee's Red or Puple Top in valuable qualities differing only in color, which is a beautiful ivory white. The leaves are few and grow upright. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 5c; ½ lb. 45c; lb. 55c.

#### Yellow Aberdeen

A turnip of high merit. Very hardy, very productive; medium sized roots; late maturing. Unequalled for its long keeping qualities. The flesh is yellow, tender, sugary and very solid. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 85c.

#### Southern Seven Top

Cultivated extensively and with profit in the South for the tops, which are used and are most excellent for greens. It is very hardy, will grow all Winter, but will not produce a good root. In many sections of the South it is also a favorite green feed for stock, and its use as a pasture crop like rape is quite general. Pkt. 5c; oz. 8c; 2 oz. 12c; 34 lb. 20c; 34 lb. 35c; lb. 60c.

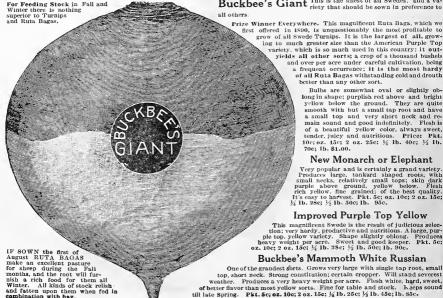

New Purple Top White Globe.

#### New Purple Top White Globe

A globular variety, very even in shape and ol beautiful appearance. The flesh is white, of excellent quality and desirable for table and stock. Immensely productive, much more so than any flat variety. This variety is a good keeper and a fine market sort. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 40c; lb. 75c.

#### THE BEST RUTA BAGAS

Buckbee's Giant This is the finest of all Swedes, and a variety that should be sown in preference to Prize Winner Everywhere. This magnificent Ruta Baga, which we

> grow of all Swede Turnips. It is the largest of all, grow-ing to much greater size than the American Purple Top variety, which is so much used in this country; it outyields all other sorts; a crop of a thousand bushels and over per acre under careful cultivation, being a frequent occurrence; it is the most hardy

of all Ruta Bagas withstanding cold and drouth better than any other sort. Bulbs are somewhat oval or slightly ob-

long in shape; purplish red above and bright long in snape; purpusn red above and origint ycllow below the ground. They are quite smooth with but a small tap root and have a small top and very short neck and re-main sound and good indefinitely. Flesh is of a beautiful yellow color, always sweet, tender, juicy and nutritious. Price: Pkt. 10c; oz. 15c; 2 oz. 25c; ½ lb. 40c; ½ lb. 70c; lb. \$1.00.

#### New Monarch or Elephant

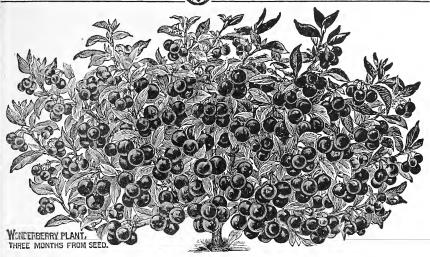

Very popular and is certainly a grand variety. Produces large, tankard shaped roots, with small necks, relatively small tops; skin dark purple above ground, yellow below. Flesh rich yellow, fine grained; of the best quality. It's easy to harderst. Pkt. 5c; 02. 10c; 2 02. 15c; ½ 1b. 26c; 1b. 50c; 1b. 50c.

#### Improved Purple Top Yellow

This magnificent Swede is the result of judicious selection; very hardy, productive and nutritious. A large, purple top, yellow variety. Shape slightly oblong. Produces heavy weight per acre. Sweet and good keeper. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 28c; ½ lb. 50c; lb. 90c.

#### Buckbee's Mammoth White Russian

One of the grandest sorts. Grows very large with single tap root, small top, short neck. Strong constitution; certain cropper. Will stand severest weather. Produces a very heavy weight per acre. Flesh white, hard, sweet, of better flavor than most yellow sorts. Fine for table and stock. keeps sound till late Spring. Pkt. 5c; oz. 10c; 2 oz. 15c; 1/4 lb. 25c; 1/2 lb. 45c; lb. 85c.

# The Sunberry or Improved Wonderberry

THIS IS WITHOUT QUESTION LUTHER BURBANK'S GREATEST PRODUCTION; A LUSCIOUS BERRY THAT MAY BE GROWN AND RIPENED FROM SEED IN ANY SOIL OR CLIMATE IN THREE MONTHS.

Fruit more like a great, rich, duscious blueberry than anything else. Blue-black in color, fine in flavor and unsurpassed for eating cooked, canned or preserved in any form. It is easily the greatest garden fruit ever introduced, and equally valuable for the value of the color, and the color of the first and the color of the color of the first and the color of the first and the color of the first and several to grow. Succeeding the color of the first and the color of the first and fruit at small expense, as one or two packets of the seed will be sufficient for any ordinary garden and produce all the fruit wanted. THE QUALITY of the Sunberry or Improved Wonderberry is sweet and delicious when fully ripe. Like the grapt it should have time to ripen well after turning black in full sun. Skin, which may seem a little tough in a raw state, cooks tender. Seeds small, one-quarter the size of Tomato seed, and cook soft, and are not noticeable.

PRICE OF SEED: Pkt. 10e; 3 pkts, 25e; ½ oz. 40e; oz. 75c.

PRICE OF PLANTS. We can supply a limited number of nicely started plants at 10e each; 3 for 25e; 75e per doz. postpaid.

# Strawberries from Seed

It will begin to bear fruit in about four months after seed is sown and continues to produce fruit until very late in the fall. Seeds sown in April will give tipe berries in July. The berries are not as large as the standard Varieties, but are of superior quality and have the rich wild Strawberry flavor. The plant is everbearing in the true sense of the word, producing fruit all summer, and comes perfectly urform seed. It also makes a beautiful pot plant, will grow well in the house, and even fruit during the winter. Perfectly hardy everywhere and easy to grow. A packet of seed should produce 40 to 50 plants. Pitt. 19; pkts. 25c.

# The Best Herb Plants

(See Page 39 for Herb Sced)

Reppermint.—From the leaves of this plant is distilled the well known peppermint of commerce. The green leaves and stems have the same effect as the essential oil, and to most persons the flavor server pleasant. Hardy Perennial. Strong plants, each, 15e; 2 for Spearmint.—The plant which pressure.

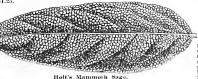

25c.

Spearmint.—The plant which produces the mint of the markets and largely used for culinary purposes. It is also used in concecting the refreshing Mint Julep, so popular in some sections. Hardy Perennial. Strong plants, each 15c; 2 for 25c.

Holt's Mammoth Sage (Hardy and Eventasting).—Holt's Mammoth is a great improvement upon the ordinary Garden Sage; its leaves being four to five inches long, clean and perfect. They are held well up from the soil, are rich in flavor and of great substance. Perfectly hardy; does not produce seeds. Each, 15c; 2 for 25c;

The True Tarragon.—The leaves and young shoots of which are much prized by many as an inplication of the state of the state of the state of the state, or cut in the Autumn and dried. Harrly perfect of the state of & for 50c.

Layender (Old-Fashloned Sweet) Lavender (Old-Fashloned Sweet)

The leaves are sometimes used for seasoning, but the plant is seasoning, but the plant is thought which are used for the distillation of Lavender Water or dried and used to perfume linen. Hardy Perennial. Strong plants, 20c each; 3 for 50c.

#### Buckbee's Frost Proof Cabbage Plants Will Double Your Profit, Why?

There are a number of sea islands along the South Carolina sea coast where the soil and climatic conditions are just suited for growing tough, hardy Cabbage plants during the winter and early spring. The seed is planted in the open field in the months of October, November, December, January and February. The plants make a slow but steady growth, until at 8 to 10 weeks of age they are very tough and hardy, the buds are purple and the outer leaves a reddish brown. When in this condition they can be shipped to territory farther north and planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants could be planted. These none-grown not been or cold frame plants could be planted. These frost-proof Cabbage plants will stand a temperature of 8 to 10 degrees above zero without injury; the land freezing, or the plants being covered with ice, sleet or snow after they are planted will not injure

them. The top of the plant does not grow until your regular oping weather opens up, but the roots grow from the time they are planted and lust as soon as ging; and the same soon as ging and the same soon as ging; and the same soon as ging in the soon as ging and the same soon as ging in the soon as ging and the same soon as ging in the soon as ging and the same soon as ging in the soon as ging and the same soon as ging in the same soon as ging as ging in the same soon as ging in the same soo them

To get the advantage of these frost-proof Cabbage Plants they must be planted a month or six weeks earlier than you would plant home-grown plants. Our Cabbage Plants are grown from the best Long Island grown

Our Cabbage Plants are grown from the best Long Island grown seed and are shipped direct from our growing station in South Carolina by mail or express. We can fill orders from December 1st to April 15th. Owing to present consection of all transportation, our responsibility ceases upon delivery to transportation company. The plants will be somewhat whited and have a hard, stunted these plants be be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the results

the results.

duce the results.

Can supply only the following varieties of frost-proof Cabbage Plants: Early Jersey Wakefield, Charleston or Large Wakefield, Succession and Early Plat Dutch.

Plants packed 500, 1,000 or 2,000 to the crate. Ordered in these quantities, they weigh about 25 pounds per 1,000 crated for shipment, and can be abjped to any point where they will arrive within four or five days. No plants shipped C. O. D.

Prices: By Mail, Postpaid, 50c per 100. By Express, pur-1000 to 4000 @ \$2.15 per 1000; in lots of 5000 to 9000 @ \$2.05 per 1000; in lots of 10,000 and over @ \$1.95 per 1000.

# Asparagus Roots (See page 4)

Mrs. A. L. Wood, Thurman, Neb., writes; I received the Sweet Potato Plants by mail in the best of condition. Thank you for your promptness

promptiess.
Martin, 952 S. Cooper St., Memphis, Tenn., writes; I received the order of Plants all O. K., and must say, you certainly know how to ship plants. They look as fresh as if they had just been taken out of the bed.
Mrs. H. P. Henrickson, Box 73. Ulen, Minn., writes; I received the plants in good shape and was well pleased with them.

Mrs. Grace Hyde, Springfield, Tenn., writes; The plants I re-eived from you arrived in fine condition.

# Rhubarb Roots (See Page 62)

Mrs. W. J. Hutchinson, Caspiana, La., writes; Thank you very much for the splendid plants you sent me. I am sure they will all grow

Mr. L. Sierra Horcasitas, Loma del Ray, Facubaya, Mexico. writes; The plants you sent me some days ago by Wells-Fargo Express came in satisfactory condition. I am very much pleased with them and congratulate you for your skillful manner of packing plants to long distances. Notwithstanding the plants were delayed seven days in transit they reached me fresh and green. Sure to live.

# BUCKBEE'S "Full of Life" Farm Seeds

SPECIAL NOTICE For lowest market prices on Farm Seeds, Potatoes and Onion Sets in Bulk, see back page of order sheet, and if the 10-day limit has expired before you are ready to order, send for new list, which will be mailed promptly on request.

#### BARLEY

#### SUCCESS BEARDLESS BARLEY

This is the earliest Barley known. It is six-rowed and beardless

This is the earliest Barley known. It is six-rowed and beardless. The absence of beards makes it much more agreeable to handle in threshing and also makes it a safer and better feed for stock than bearded varieties. It is well known that many young pigs are lost annually by choking on Barley heads. This beardless Barley is without question the best nurse-crop which we have. It stools much less than other Barley or Oats, rarely lodges, and forms so little shade that it never injures a meadow, furthermore being a very early variety, it can be cut and put out of the way before Wheat and Oats, good yields on poor, thin lands and stands up well and yields big crops of 50 to 75 bushels on rich land. Success Beardless Barley is a vigorous grower, has strong straw and heavy, well-filled heads. The grain has hulls like common Barley and its quality is excellent.

Prices, postpaid, pkt, 10e; lb, 25c; 3 lbs. 70c.

#### ODERBRUCKER or WISCONSIN No. 55 BARLEY

A stlff-strawed, heavyvlelding, six-rowed, bearded variety. It is about the same as Manshury in time of maturity, manner of growth and general appearance, but has a plumper ker-nel and weighs more to the measured bushel. has protein content

of 15 per cent, or nearly double the amount of protein found in many other varieties. This makes it a very valuable feeding Barley, which is an important consideration with the leading farmers and stockmen, who are now appreciating more and more the value of Barley as a food for all kinds of stock, horses as well as cattle. Prices, postpaid, per lb. 25c; 3 lbs. 70c.

> FOR BULK PRICES BY EXPRESS OR FREIGHT SEE ORDER SHEET

This Barley is hulless and beardless. The kernelig-shell out without the hulls and are very pretty, plump, of oval shape and pure white.

It is a very early variety, ripening before the bearded and the state of the state of the state of the state of the transport of the state of the state of the state of the wheat. In the western states it is often sown as eather root. catch crop.

attich, crop.

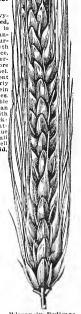

It is not a maiting Barley. Can be used for feeding only, but as a fattening feed, especially for hogs, it has no equals, making sweeter meat and nicer lard than corn. For horse feed it is best mixed with oats and the two ground together. It is also very valuable for feeding poultry. This Barley is of the greatest value for the western it is used in its place there for feeding, not do well and is used in its place there for feeding. It is often grown for hay and should be cut just before it becomes ripe, while the straw is green, and In this condition it is relished by all stock.

It yields well on poor land and makes enormous crops on good land. It is the heaviest yielding Barley known; on good land. It is the heaviest yielding Earley known; on good land. It is the heaviest yielding Earley known; on good land. It is the heaviest yielding Earley known; on good land. It is the heaviest yielding the property of the

#### WISCONSIN PEDIGREE BARLEY

The Champion Barley of the world. The greatest of all six-rowed bearded varieties. Wisconsin Pedigree Barley has yielded from 5 to 20 bushels more than common varieties, and many have reported yields from 5 to 20 bushels more than common varieties, and many have reported yields from 5 to 20 bushels during the agreement of 35 bushels per consistent of the property 
#### MANSHURY BARLEY

We believe this to be as fine a Bariev as was ever offered the farmers of the United States, a variety which will yield plump grains as well as strong, stiff straw and long, well hiled heads, quality no other Bariev excels it. It yields abundantly. It is early and very vigorous in growth, straw seldom lodges. Poslpaid, pkt., 10c; lb., 25c; 3 lbs., 70c. heads. The

Wisconsin Pedigree Bariey.

ROCKFURD SEED FARMS Y H.W. BUCKBEE ROCKFORD. ILLINOIS, FOREST CITY GREENHOUSES

SOY AND SOJA BEANS

Soy Beans are fast becoming a leading crop in all states of the Union. They can be grown as far north as corn and are always a sure, safe and profitable crop. Soy Beans grow erect, branching out in 4 to 6 stems near the ground, which attain the height of 2 or 3 feet. The branches are thickly covered with leaves and pods from the ground to the top. On a single plant, I tovered with fatives and pous from 3 to 4 beans each, have often been counted.

They are more drought and heat-resistant than alfalfa, grow on all soils, even on sandy and acid ones where clover fails. Growing erect, they can be easily cul-

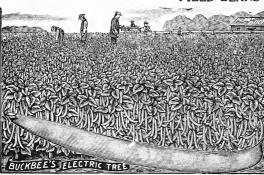

tlyated and harvested.

on sandy and cold ones where clover tails. Growing erect, they can be easily currently solve Beans are mostly grown for grain. This grain is equal in feeding value to oil meal and contains 3½ times as much protein and fat as Corn or Oats.

Soy Bean hay is richer in protein than alfalfa and twice as nourishing as millet hay. Soys are largely used as a catch crop and can be sown as late as July hay. Soys are largely used as a catch crop and can be sown as late as July best mixed with Fodder Corn, Allieto Sorre would, but being very rich, they are best mixed with Fodder Corn, Allieto Sorre was been made a splendid hog pasture that can be used 8 to 8 weeks after seeding. For Enslinge, Soy Beans are mostly used, in combination with Corn or Japaneses Hilet, which makes the best of all ensliages, containing all the elements necessary for fight varieties are used. Corn and Soy Beans, should be sown 4 to 5 weeks later. Use 2 parts of Japanese Millet or forn to 1 part Soy Beans for a perfect belanced ratio. Use 2 parts of Japanese Millet or forn to 1 part Soy Beans for a perfect belanced ratio. Use 2 parts of Japanese Millet or forn to 1 part Soy Beans for a perfect belanced ratio, the rate of one-third beans and two-thirds corn, they also give splendid results. When the rate of one-third beans and two-thirds corn, they also give splendid results. When the recommended; it has been a great success everywhere. In a trial at the Iowa Status, pigs hogging down Corn and Soy Beans gained 20 per cent more than those pastured on corn allows.

Soys are used with great profit as soil renovators, and are especially valuable on sandy soils. When the entire crop is plowed under they will add to the soil such a quantity of nitrogen alone which, in the form of commercial fertilizer, is worth over \$18.00 per acre. This is twice as much as a crop of Cowpeas or Clover will furnish. Soys per acre. This is twice as much as a crop of Cowpeas or Clover will furnish. Soys per acre. #### FIELD BEANS

#### WHITE TEPARY, FIELD BEANS

Grows and Produces a Crop with Less Moisture Than Any Other Plant Known.

A Most Valuable Dry Farming Crop for the West.

White Tepary Beans is a native of the Southwest but although it comes from the desert and has been raised in a country having a very light rainfall without irregalous, nevertheless, to better conditions and we believe will be found profitable. In the warm climate of the Southwest it ripens in about 60 to 65 days. It can even be planted there after the grain is harvested and still make a crop.

It is hardy, will withstand a great deal of neglect and will quickly recover from drought when more favorable conditions set in. Frofitable crops can be raised in regions where the rainfall is 8 to 3

inches and less.

In the Southwest, where these Beans have been grown for years, they produce very much larger crops than any other variety. At the Arizona Experiment Station, when ordinary Beans produced 2 to 3 pods to a plant, the Tepary plants had as many as 200 ripe pods.

The Tepary can easily be distinguished from ordinary Beans by its more slender vines and thinner and smoother leaves. The pods are small, only about 3 inches long. The seed is smaller than that of the Navy, oval and of a pure white color.

As a food, Tepary is equal to any Bean known to commerce. When soaked in water they swell to twice their original volume and more than double in weight. A given weight of Prapares will makes the bean also very valuable as a green manure crop. Drill in rows 2 to 3 feet and 4 inches spart in the rows. Sow 12 ibs. to an acre. Postpaid, pkt., 8c; ½ lb., 15c; lb., 25e; 3 lbs., 70e.

# This desirable and profitable crop, should be more generally known. It is usually sown in the Northern States in July, and will fill up the vacant plots at a Lime when make a second crop maturing in about two months. It does well on light soils, gives a good crop even on land low in nitrogen. It makes a splendid flower food for bees and is profitable on account of its large grain yield, turned under it is a good soil good condition for the crop to follow. It is prized as a poultry feed, being regarded as a stimulant to egg production, and when ground is profitably fed to hogs and other stock. It makes also a fine quality of flour—the kind that goes into the famous "Buckwheat Cakes." So Wig to I bushel per acre. BUCKBEE'S GIANT JAPANASE

Entirely distinct from all other varieties. Has all the valuable characteristics of the old Japanese Buckwheat, and in addition is earlier and will yield at least one-quarter more per acre. On this account it can be grown farther north. It resists drought and blight very well. The seed is rich dark brown in color and larger than Silver Hull As much as 60 to 86 bushels to the acre have been harvested of this variety. making it very profitable to raise. More than a week earlier than Silver Hull. Choicest stock seed, postpaid, pkt. 10c; lb. 25c; 3 bs. 10c.

#### IMPROVED SILVER HULLED

INITATION INTERPORT HULLED

This valuable variety is a decided improvement on the old black or gray sort. It is early, remains longer in bloom than other sorts. A fine variety for honey bees. The grain is of a beautiful light gray color and has a thin husk. Millers prefer Silver Hull, there being less waste, and it makes whiter, better and more nutritions flour than other varieties. It is more productive than the Japanese and the grain meets with a ready sale, bringing high prices. Choicest stock seed, postpaid, pkt, 10c; lb. 25c; 3 lbs. 70e.

# BUCKBEE'S "Fu

We Grow and Furnish Corn Adapted for All Parts of This Country.

Seed Corn will not produce satisfactory results unless planted in localities with similar climatic conditions to those where it was raised. Corn, for instance, that will mature in 90 days in Illinois will require two to three weeks more in Minnesota, and Corn grown in the North should not be planted in the South unless for special purposes, as the yield will be disappointing. For this reason we grow Seed Corn in different localities north and south and we state where each variety was grown and for what section

The Corn we offer is pedigreed stock, carefully bred, free from barren stalks, and the seed is tipped and butted and of the highest vitality.

#### IMPROVED INDIAN SOUAW CORN

Holds More Records for Wonderful Performances Under Difficult Conditions Than Any Corn Ever Grown.

It is an extremely early variety, maturing in 76 days, and could be planted up to July 4 and make a crop before frost.

One of the Greatest Novelties Ever Introduced.

One of the Greatest Novelties Ever Introduced.

This Corn is inclined to stool, and one grain will produce usually more than one stalk. Each stalk bears 2 or 3 ears, 9 to 12 Inches in length, and beautifully white. It produces an abundance of fodder and is the best variety for ensliage. It yields 50 to 75 bushels of corn per acre, and the ears are fine for roasting, although not very sweet. It is a good variety for poor soils. The kernel contains more starch than any other Corn, and ground and boiled by the same process as wheat, gives a fine flour that will make bread, biscuits, etc., the same as the wheat flour. Plant two kernels in a hill and cultivate the same as other corn. For flour, plant \$10 ks. for fodder, 15 bs. per acre. Postpaid, pkt., 10c; ½ bs., 29c; bs., 35c; 3 bs., \$1.00.

# BUCKBEE'S "Full of Life" SEED CORN

Dent Corns for the Northwest.

# REGENERATED RED HACKBERRY OR IMPROVED NORTHWESTERN DENT

The earliest and hardiest Dent Corn grown; it is the corn for the North, is very popular throughout the northwestern states and can he depended upon to mature in North Dakota, Northern Minnesota, Wisconsin, Montana and Manitoba; but it is also quite largely used in other states for early feeding, hogging down and is very often grown with early soy beans for that purpose, and for late planting when other corn has heen destroyed by frost or drought, as if planted as late as July it will generally mature before foot, it is also planted largely in drouth stricken, sections of Kansas. Oklahoma, etc., where it is known as White Cap Red Butcher and often is the only variety that will make a crop.

there, all home grown kinds being dried up.

The Red Hackherry grown 6 | feet high, the ears are 7 to 10 inches long; setting 3 feet above the ground, they can be cut with the corn harvester; they have 10 to 14 rows of large red kernels with a yellow cap. This corn matures in 75 to 83 days and is very productive.

yielding on an average 70 to 75 bushels per acre. The stalks being shorter than those of later sorts, they can be planted close together; it is mostly grown in drills. Our strain is the finest and earliest in the country. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

#### MINNESOTA No. 13 or WIS. No. 8

This is the earliest yellow dent corn grown; argely grown all over Minnesota, Wisconsin, the Dakotas and Northern Michigan; there is no other Yellow Dent, fully as early, that is equally as productive.

The stalks are 7 feet high, are very leafy and furnish great quantities of fodder; there are usually two ears on a stalk which average 8 inches in length and have 16 to 20 rows of smooth, plump, rich yellow kernels. Minnesota No. 13 will ripen in about 90 days and ripen in about 90 days anyields from 60 to 80 hushels per acre in a good season. Our stock is true to type and ripens very early and uniformly. Postpaid, pkt. 10c; lb. 30c; 3 lbs.

an average vield on 22 acres of 93 bushels per acre. The highest yield per acre of any corn grown in Wisconsin in 1913 was 137 6-10 bushels Silver King and In 1914, 132 bushels

Postpaid,

64 pounds of Sliver King.

pkt. 10c; lb. 30c; 3 lbs. 85c.

MINNE-SOTA WHITE DENT This is the ear-

liest white dent grown, it is as carly as the Red Hackherry but much more productive and is adapted for all the Northwestern States; it is much planted there on poor, thin soils and also on cold and wet ground where it will give good crops when other corns fall.

The stalks are 6 to 7 feet high. have large foliage making unusually finefodder; the ears are 8 to 9 inches long, 14 to 18 rowed, and have large, deep, white grains. Under average conditions the yield in the Northwest is 75 bushels and more per acre. Postpaid, pkt. 10c; lb. 30c; 3 lhs. 85c.

#### MURDOCK EARLY YELLOW DENT

The Murdock is the heaviest yielding Yellow Dent corn that can be grown in the Northwestern states, it is an ideal corn for Southern Minnesota, Southern South Dakota, the Southern half of Wisconsin and Northern Iowa. Murdock was awarded sweepstakes for the Northern zone at the National Corn Ex-position of 1909 and 1910 and received First Prize at the Wisconsin State Fair in 1914.

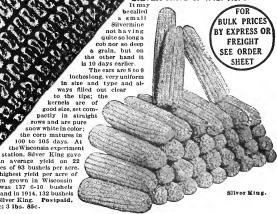

Prize at the Wisconsin State Fair in 191.
The stalks are 8 feet high, the ears setting 3½ feet from the ground. The ears are 8 to 9 inches long, 1½ to 20 rowed and have very deep, large grains, slightly rough which are slitting very compactly and solidly on the cob. There is no other extra early corn which grows other extra early corn which grow as uniformly in type, size of ears and color as Murdock; a load of this rich, golden-yellow corn is a beautiful sight. Murdock matures in about 95 days of average corn weather and has a record of has a record of ylelding a hundred bushels and more

# BUCKBEE'S "Full of Life" SEED CORN

The Great Prize-Winning Show Corns of the Central and Southern Corn Belt

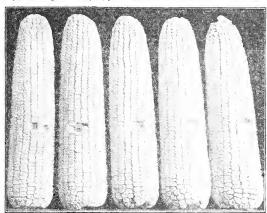

The two famous prize corns listed here, Boone County White and Reid's Yellow Deut, are the standard varieties for states in the latitude of Illinois and further some more than 75 per cent of all corn raised in the combeit is grown of these two varieties, under these and other names. They are the greatest yielding white and yellow Corn. hese two varieties More than 75 per cent of all corn raised in the combelt is grown of these two varieties, under these and other names. They are the greatest yielding white and yellow Corn known, have made records of bumper crops never reached by other sorts, and have won more prizes than all other varieties combined only form prizes than all other varieties combined when from prizes eliming status and was raised in Northern Illinois. These Corns are safe to plant as far north as Central Iowa. They mature at about the same time, requiring 110 to 115 days.

Reid's Improved Yellow Dent

Reid's Yellow Dent is the main Corn crop of the cornbelt. It outyields any other yellow variety and gave the highest yields of any variety tested at the Illinois Experiment Station for a period of over 20 years.

The stalks are 9 to 12 feet high, making an abundance of fine fodder. The ears are very large, 9 to 11 inches long and 7 to 8 inches in circumference, and have 20 to 24 rows of deep, wedge-shaped kernels, moderately rough and of light yellow color, which is characteristic of this variety. The ears are of cylindrical shape from butt to life, the color is red and small and easy to shuck. The ears are remarkably uniform in shape, size and color, and in this respect this variety is superior to all Corns. It shells from 88 to 93 per cent of grain. Postpaid, pkt. 10c; lb, 30c; 3 lbs. 85c.

Boone County White.

#### Perfected Boone County White

The most popular and the heaviest cropping white Corn known. It is also the lost highly bred Corn in the world. It does well on all classes of soil. On old corn land it should be planted in

most highly bred Corn in the world.

It does well on all classes of soil. On old corn land it should be planted in preference to yellow Corn. The root system is very extensive, deep growing, making the plant drought-resisting. The stalks are strong and exceedingly beavy from thick, furnishing an enormous quantity of forage. The ears are 9 to 12 inches in length, 7½ to 8½ inches in circumference, averaging a pound in weight, and contain 18 to 24 rows of exceptionally deep kernels of pure white color. They are soil as a rock, there being very little space between the rows; are of cylindrical shape, rounding off only within about an included in the top, and are most uniform in size and shape. Postpaid, pkt. 10c; h. 26c; 2 lb. 28c.

#### EARLY WHITE CAP YELLOW DENT

A very strong grower with heavy fodder and large ears. Matures in 90 days and is a good Corn for planting as far north as Southern Minnesota. The grain has a white cap and yellow body. Heavy yielder. Postpaid, pkt., 10e: lb., 30e;

#### BUCKBEE'S EARLY GOLD MINE

DUCKBEE'S EARLY GOLD MINE
This great variety will usually produce a crop in 90 days and
has always matured in Northern lowa. It can safely be planted
in this section up to the middle of June and still be depended
upon to ripen by the middle of September. It produces a
magnificent yield, there generally being two rood-stard cars to
the stalk, with large kernels, cob well filled. Postpaid, pkt.,
10c; 1b., 30c; 8 lbs., 85c.

BULK PRICES BY EXPRESS OR FREIGHT SEE ORDER SHEET

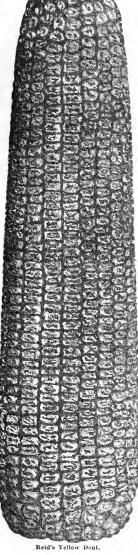

FOR

#### BUCKBEE'S GREAT LIBERTY FIELD CORN

This new variegated Corn combines more solid morit than any Corn in cultivation. Expert corn growers pronounce it a perfect field Corn as to vield, see of ears, color and length of grain and quality of fodder. Tostpand, pkt. 10er; B. 30er; 3 lbs., 85c.

#### THOROUGHBRED LEAMING

Deep golden color: striking uniformity. The ears range from 9 to 12 inches lor; striking uniformity. The ears range from 9 to 12 inches lor; sternels broad, thick, doep, rather rough, rounding wedge-shaped. Red cob, medium in size. Matures in about 100 to 11e days. It is safe for planting in Central Iowa Postonial, Okt. 10e; th., 20e; 3 lbs. 35c.

# FORAGE

Folder corn is a very valuable crop on the farm. It occupies a place that cannot well be filled by any other crop and should be largedy planted by every farmer. Corn has no equal in yielding large amounts of valuable forage under a great variety of soil and climatic conditions. Used for forage, ensilage and hay, it furnishes the cheapest supply of healthy and nutritive food in winter, spring, summer and fall for dairy and cattle, for hogs and other live stock on the farm. When preserved as ensilage it can be stored much more cheaply in much less space than any other feed, keeps indefinitely and is always ready to feed. The growing of corn on a fair proportion of the farm will permit the keeping of more cattle and so increase the revenue as well as augment the manure supply so necessary to the maintenance of soil fertility. When other crops have failed and it is too late to plant anything else, fodder corn can always be grown and will furnish feed for the stock and make a paying crop. In selecting corn fodder and enclises we do not recommend the very laters, coarse and late varieties, which require a very one time to when the very laters, coarse and late varieties, which require a very one time to where they are to be planted are the most satisfactory. It is not necessary that the crop fully mature, but the nearer it comes to maturity the greater the food value and the more valuable it is to the stock feeding on it.

Sow in drills 3½ feet apart, using from ½ to ½ bushel per acre. The more seed is planted the more bulk, more stalks and leaves but the less grain will be harvested. About 20 pounds of seed is a good quantity to sow in the cornbelt; sown that thickly the plants will not get larger than a man's thumb, look like a mass of leaves, have a high feeding value and are eaten without wate.

waste.
We offer the following corns for fodder and silo:

#### Buckbee's Goliath Fodder Corn

The World-Beating Fodder and Ensilage Producer. Surpasses Any Other Fodder Corn on Earth in Yield and Surpasses A Feeding Value

Surpasses Any Other Fooder COTH on Earth in Text and Peeding Value tely which we have been developing for years. Thousands and thousands of our customers in every part of the country assert that it stands without a peer for feeding either in the green state or for sile purposes. It is very rich in nutriment and a wondrously immense yielder. Grows rapidly, is early, short jointed, tail, and produces an overwhelming abundant of the control 
Red Cob Ensilage Corn

in almost any iatitude. Price, postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c. One of the Best Fodder and Silo Corns

White Cob Ensilage Corn

A Popular Standard Variety.

A pure white Corn with a white cob, of tail growth, short joints and leafy, giving an abundance of fodder; sweet, tender and julcy. It is a popular standard variety grown successfully

Beyond doubt one of the best fodder corns, either to feed green, to put up for the silo, or to cure for hay. It is a pure white corn, cropping as high as 45 tons per acre. It is sweet, tender and juicy; has short joints and therefore an abundance of leaves, and grows to a fair height, but coarse-stalked. The seed is white and grows on a red cob, thus giving it the name. Price, postpaid, pkt. 10c; ib. 25c; 3 lbs. 70c.

#### Sweet Fodder Corn

One of the most valuable fodder plants in existence; every stock farmer should devote some land to it. The stalks are sweet, juicy, rich, tender and very nutritious, and the leaves are numerous, very large, broad and succulent. The plant contains more sugar and has a much greater feeding value than any other variety of corn, and whether fed dry or green, is very palatable, and cattle and hogs will greedly eat every part of it. This Corn, if planted at the proper time in spring, will produce well-formed ears in any part of the Northwest before frost.

Sow in drills 25 pounds per acre. Postpaid, pkt.,i0e; lb., 30e; 3 lbs., 85e.

Red as a named. Be sure to state for what kind of seed the culture is wanted.

Red as a named. Be sure to state for what kind of seed the culture is wanted.

Red as a named of such crops.

Red as a named of seed the culture is wanted.

Red as a named of seed inoculation or by the use of soil from an old field previously used for such crops.

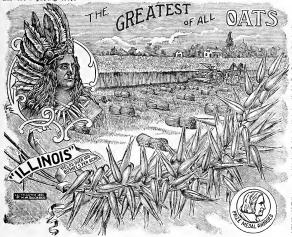

Red as a name of the seed before sown; the inoculation is done in a few minutes and the bacteria are carried into the soil in ample number to insure infection of the roots when germination takes place.

Seed inoculation is not only used to secure good stand, but the crops also grow more vigorously, winter-kill less readily and in case of perennial legumes, like alfalfa, much larger crops are also harvested the second year than from unnoculated seed. Furthermore, inoculation increases the amount of nitrogen in the plants from 50 to .60 per cent. and increases, therefore, the value of the crops, whether they are used for feeding or green manuing. The cultures are good of 8 months after leaving our warehouse.

Price of Edwards' Legume Bacteria Cultures to inoculate 30 lbs. of seed, 75c; for 60 lbs, of seed, \$1.40 postpaid.

# **BUCKBEE'S**

Oats are a profitable crop if new seed of varieties that have merit is sown. There is no grain that demands a change of seed more often than Oats. Every second or third year the seed stock should be renewed, because if grown in the same soil and in the same neighborhood year after year they will deteriorate and become light and chaffy. Our prices are so low that every farmer can afford to buy new seed of our pedigreed, vigorous-growing varieties every year and harvest a paying crop.

#### SILVERMINE

One of the most popular varieties and very largely grown in all central and western states. It is a medium early Oats, maturing about a week ahead of the Swedish Select, and is very hardy and prolific. Has long, stiff straw and grain of the clearest white color, usually plump and heavy with prolific. Has long, stiff straw and grain of the clearest white color, usually plump and heavy with tendency to rust or lodge unless soil is very rich. Many people who have raised Silverines the tendency to rust or lodge unless soil is very rich. Many people who have raised Silverines the tendency to rust or lodge unless soil is very rich. Many people who have raised Silverines the tendency to rust or lodge unless soil is very rich. Many people who have raised Silverines the them the best Oats on earth. It is the standard variety for main crop in most parts of Iowa. At the trials at the Experiment Station in Wooster, Ohio, the Ju-year average yield of Silvermine was 67.08 bushels per acre, or the third best of 21 varieties; about a bushel less per acre than 18 to 18

#### IMPROVED WHITE RUSSIAN

A distinct variety, being a side or horse-mane Oats. It originated in Russia, but has become thoroughly acclimated and is a great favorite everywhere. White Russian is as nearly rust proof as any Oats can be. It is a medium late variety. It is much appreciated for its rugged hardness, enabling It to withstand diseases, insects and cold, unfavorable weather. It yields large crops. The berries are longer and larger than those of other varieties. It ripens with the Blue Stem What, and these two kinds make a good combination for succotash. This variety is much grown and a very heavy yielder in the North. Postpaid, pkt. 10e; lb. 25; 3 lbs. 60e.

#### REGENERATED SWEDISH OATS

An Improvement of the well-known Swedish Select; has given larger yields in this country than the old variety; it stools heavier, grows more vigorously, resists droughts better and is free from rust and smit. In short, it possesses all the good qualities of the Swedish Select in a much higher Owe stock is grown from the originator's seeds and is very plump, heavy and of bright color; pure, clean and entirely free from weeds and other grains. It is ahead of the English stock being grown in this country, and is therefore acclimated and will give much larger crops. Regeneral Swedish White Kherson (Iowa No.103), has been widely advertised and is one of the most popular Oats grown in this country. It grows on nearly all soils, except when very rich. It is especially well adapted to upland soils and seems to do.

The straw is coarse, very stiff and noted for its power to resist lodging. The heads are large, branching and filled with very large, thick grains of bright color. They are medium late. Postpaid, pkt, 10c; lb. 25c; 3 lbs, 65c.

#### EARLY BLACK PROLIFIC TARTARIAN

Tests made by many progressive farmers convince them that these Black Cots are more reliable eroppers than White Oarlier are progressive farmers convince them that these Black Cots are more reliable eroppers than White Oarlier are practically drought-proof and rust-proof. The traw is stiff, the heads are long and the grain yield is heavy. These Oats are the best to grow on rich and also seed and damp soil. Postpaid, pikt, 10e: 1b. 30e; 3 thes. 30e.

The Earliest of All Large Grained Oats.

The Barlies of All Large Grained Oats.

Quaker Oats is a spreading variety, throwing out its heavily laden branches on all sides, It has thick walled, stiff straw of medium height, that carries the load without lodging, withstanding the straw of the st

#### WINTER OATS

Winter Oats are of the greatest value for the states south of the Missouri line. They are grown there for fall and spring pasture and for grain. They also generally stand the winter everywhere in our state and in the southern half of Iowa. Our Winter Oats grown in the North are incomparably superior to southern-grown stock. They are more hardy, earlier, less susceptible to rust, of more vigorous growth, stand up hetter and are more productive.

#### TEXAS RED RUST-PROOF WINTER OATS

A standard favorite not only in Texas, from which it derives its name, but all through the Southern States. Texas Rust-Proof Oat has a very heavy berry, nearly every one has a distinctive beard, protecting it from the sun and enabling it to stand extreme heat. It has short, strong, still straw and does not lodge easily. These oats are much used on light, sandy soils and also for low grounds, where Oats are likely to rust. These oats can be sown in Fall and Spring. Sow 2 bushels per acre. Postpaid, pkt. WINNTED TIPE OATS

#### WINTER TURF OATS

Sometimes called Virginia Gray. This splendid variety has proven immensely popular and satisfactory wherever it has been grown. When sown early in fall and the roots thoroughly established in the soil, it is very hardy and will stand a great deal of coid. Its stooling propensities are remarkable, and on good soil yields from fifty to seventy hushels per acre. The grain is of a dark gray color, with a distinct stripe and weights heavier than the ordinary Oat. These oats can also be sown in Spring and it sown very early, will outyleid ordinary Spring Oats. Sow 1½, to 2 bushels per acre. Tostpaid, pkt., 10c; 10c, 25c; 3 bs., 70c.

#### NEW APPLER WINTER OATS

This is undoubtedly one of the best all round Oats for planting in the Fall as they afford a valuable pasture the greater part of the Winter and early Spring, thus reducing the quantity of other necessary food. They may be harvested early enough in the Spring for other crops to follow. This variety spreads and stools out enormously, especially when grazed, and if stock be taken off by March will yield a large crop of grain. This is a very popular Oat in the South, especially on the light sandy soils of the coast region. Prices, postpaid, pkt, 10c: 10c, 35c: 3 lbs., 70c.

BUCKBEE'S EXTRA EARLY MICHIGAN FAVORITE—Mature in about 50 days. In quality and productiveness it is equal to any of the well-known standard varieties; bushels of seed per acre is often harvested. Much used as a fertilizing crop. Postpaid, ½ B. 20c; bl. 35c; 3 lbs. \$1.00. NEW ERA—Upright, remarkably prolific. South. Postpaid, Pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. \$5c.

a week later than New Era, a favorite in the South and Middle West. Very productive. Much used for pasture and fertilizer. Postpaid, pkt. 10c; ½ lb. 15c; lb, 25c; 3 lbs. 70c.

Cow Peas grow on almost all soils and thrive on land too poor for clover. They are drought-resistant, stand the heat of the southern summer and are largely grown in the Southern summer and are largely grown in the Southern summer and are largely grown in the Southern scales. Cow Peas, whether used for green fodder, hay or ensilage, have a higher feeding value than clover, millet or any other grass. They make an excellent hog pasture, an acre of ripening an excellent hog pasture, an acre of ripening hogs. The Georgia Experiment Station made 12½ tons green hay or 2½ tons dry per acre. The yield of peas is 15 bus, per acre.

Used for green manuring, Cow Peas will in-crease wonderfully the fertility of the soil. For hay, Soy Beans or Milet and Cow Peas are much planted together at the rates of about a bushe! of Cow Peas to half bushe! of Soys or Millet per acre.

Culture—Sow when warm, in drills, 3 feet apart, and cultivate, using 60 lbs per acre; or broadcast 100 lbs, per acre. The planting is often done in corn at the last cultivation.

BRABHAM—The most valuable Cow Pea today in America, of the most productive in yield of forage and of shelled Of upright growth, retains foliage exceptionally well early and very similar to New Era but is bound to supplant this variety on acd of shelled pea well.

so sound to supplant this variety on account of its wiit-resisting qualities. Postpaid, pkt., 10e; ½ lb., 18e; lh., 30e; 3 lbs., 85c.

Mammoth

Spring Rye

Spring Spelts or Emmer

Spring Spelts or Emmer

A valuable grain closely related to wheat; the krnels, however, are tightly enclosed in the hulls and achosely related to wheat; the krnels, however, are tightly enclosed in the hulls and achosely related to wheat; the krnels, however, are tightly enclosed in the hulls and achosely related to the krnels of a claramer, as good crops of it can be grown, under the grain and climate, although it is, like Macaroni Wheat, especially adapted to dry regions and localities with hot, dry Summers; withstands drouth where barley fails entirely, it is also never affected by excessive rains. Spelts is a staple crop in all parts of the West, Northwest and Southwest, but it can also be profitably grown in all sections of the corn belt. Wonderful crops of it have been grown under adverse conditions, been reported from the western states. It thrives on poor land, stony ground, in forest regions, on the prairies; it is quite hardy and should be sown as soon as the land can be worked. It has quite stiff straw, stands up well on ground where oats and barley lodge. It neither rusts nor blights. Oats and spelts ripen about the same time and are often sown together for horse feed. Spelts makes a well-balanced feed for horses, the same as oats. When cut when the grain is past the middle milk stage, it will make straw-hay of excellent quality.

Thresh like wheat. Sow 80 to 100 lbs, per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

New White Beardless Winter Spelts

New White Beardless Winter Spelts. As the name indicates, this variety is without beards, and also has much larger heads and is much more productive in suitable climates than the Spring variety. It thrives best on dry prairie regions with hot Summers, where it has given excellent results; but it is also considerably resistant to the effects of wet weather in humid climates. It is not it is considerably resistant to the effects of wet weather in humid climates. It is not wheat and has been grown for a number of years in Southern Minnesota with good success, always giving better returns there than any Winter Wheat. It certainly is more hardy than Winter Barley and Winter Oats, and we especially recommend it for sowing in place of these two varieties, as it is much more productive and a surer crop. For many Central, Southern and Eastern states, where Spring oats do not yield read winter Oats are not hardy, we can recommend this Winter Spelts as a sure crop. If all and Winter pasturage. We can recommend the Winter Spelts as a sure crop. The preparation of the land for seeding and the subsequent management of the Winter Spelts crops are practically the same as required for Winter Rye or Wheat. Sow with a drill at the rate of about 50 lbs. per acre; cover about 3 inches deep. Postpaid, pkt., 10e; lb., 30e; 3 lbs., 85c.

Head of White Beardless Winter Spelts.

### MAMMOTH SPRING RYE

Spring Rye is entirely distinct from Winter Rye, and we call particular attention to the fact that we offer genuine Spring Rye. It can be sown in Spring a little later than other Spring grain and a crop harvested the same season; on that account it is much used as a catch crop, especially where Winter grain has been killed out. There is an increasing demand for this variety; it is a very profitable farm crop to grow anywhere, and farmers are finding out its value. It does not grow quite as tall as Winter Rye, but usually yields as well and the grain fine quality. On good ground the yield is never less than 40 bushels per acre. As it does not stool that we have the set of the second profit of t is of fine quality. much as

WINTER RYE

The hardiest and the earliest grain crop grown; the best grain crop for sandy soils; in fact, the salvation of the farmer in very sandy sections of the country, and it can be depended upon more than any other to produce a good paying crop everywhere and every year. It is more hardy than wheat, but so the grown on a great variety of soils, does best on fertile ground, but is of the greatest value of the stand of Rye is more shender and grows taller than wheat, but owing to its extreme rigidity it does not lodge easily. Rye starts to grow much earlier in Spring than Winter Wheat, and ripens a week cariler. It is troubled very little by insects and diseases as it is too near maturity when insects and such diseases as it is too near maturity when insects and such diseases as it is too near mature then insects and such diseases and the standard of the

Giant Winter Rve

A heavy cropper, with stiff straw, large heads and plump, heavy grains. Postpaid, pkt., 10c; lb., 25c; 3 lbs., 70c. New Rosen Winter Rye

The famous Rye, originated by the Michigan Experiment Station, has now proven its superiority over all other varieties in every Rye-producing section. It has doubled the yield obtainable with any other kind. The average yield of common Rye in this country is less than 15 bushels per acre, but that of Rosen Rye, 40 to 45 bushels.

Rosen Rye has very stiff straw and very large heads with 4 even rows filled with very large kernels. c of the Rosen that the 4 rows are always evenly well filled on 39 per cent of the heads, while Common Rye

Buckbee's Red Turkey

# GRAIN OR NON-SACCHARINE SORGHUMS

These varieties are more resistant to heat and drouth than Corn, and are therefore more profitable to grow, where—because of drouth, hot winds and shallow soils—Corn is not a reliable ctop. They yield as much grain as Corn, make excellent fooder and slage and will grow on any soil where Corn will, and on many too poor for Corn. They are unsurpassed as a grain and fooder ctop, for dry, alkali lands. The feeding value of the grain, forage and slage of these Sorghums is about equal to that

of Corn.

They should be planted about 10 days later than Corn, as they do not withstand the cold and dampness of Spring like Indian Corn, but are strictly hot weather plants. Sow for grain, 4 to 8 lbs.: for silage, 8 to 12 lbs., and for hay, 1 to 2 bushels per acre. Cut for hay when the grain is in the milk or soft dough stage; for silage, when in the hard dough stage or nearly ripe; for grain, when fully matured.

Buckbee's Early Kaffir Corn.

# WONDERFUL MILO MAIZE

An Early Grain Sorghum, Weather Crop. A Sure, Dry-

This Dwarf Milo is extensively grown for This Dwarf Milo is extensively grown for grain in sections where the season is short. It matures in 80 to 85 days; an earlier and ling value. Admirably adapted to dry-land farming. The grains are the largest of all Sorghums. Stalks 3 to 5 feet high; coarser and less leafy than those of Kaffir. Postpaid, pkt. for: ½ lb. 18c; lb. 36c; 3 lbs. 85c.

### BUCKBEE'S EARLY KAFFIR CORN The Standard Grain Sorghum and the Best for

The Standard Grain Sorghum and the Best for Forage and Sliage, but the seed is, as a grain, torage and sliage, but the seed is, as a grain, producibly grown on land high and low-inch or poor and whether the season is wet or dry. Plants attain the height of from 5 to 8 feet, growing upright. Steins have a stalky tendency and produce numerous wide leaves; they do not harden as do many other Sorghums, but keep

harden as do many other Sorghums, but keep green, brittle and Juicy, making the best sliage or forage, either green or dry, of any of the grain Sorghums, and are highly relished by all stock.

Early Kuffir is grown more extensively than any other grain Sorghum, and it usually outlyields all form the grain sorghum, and it usually outlyields all form the grain sorghum, and the grain of the grain sorghum. FOR sorghum, and it usually outlyields all form the grain of the gr

JERUSALEM CORN

JERUSALEM CORN
Belongs to the non-saccharine Sorghums, and was brought a few years ago from the arid plains of Palestine. It is pronounced the surest grain crop for dry countries and seasons—better adapted for the sections with very low rainfall than Kaffir Corn or Milo Maize. It grows one large head of main stalk and several smaller head on side shoots, having often as many as 8 heads on a plant. Very valuable on side shoots, having often as many as 8 heads on a plant. Very valuable for feeding of the state of the sta

FETERITA -The Earliest and Most Drouth Resisting Grain Sorghum,

Introduced by the United States Department of Agriculture from Africa. It produces a stalk 7 to 8 feet high and a large head, well filled with bluish-white seeds. The grain is softer and in the seed of the grain is softer and in section of the seed of the se

# Buck hee's New Honey Syrup Sugar Cane,

Sugar Cane or Sweet Sorghum

Sugar Cane or Sweet Sorghum

Sugar Cane perpoitably grown in all portions of the United States where corn is grown, and it is more drought resistant than corn. It remains fresh and green through periods of drought that ruin corn.

As a soiling crop it has a very high value. Mileton it turnshees an enormous quantity of succulent food, outytelding corn for forage, and it is fed with much less waste. At the Iowa Agricultural College 29 tons were harvested per acro. As a pasture crop it is mostly used for hogs and sheep.

It makes splendid hay which is very palatable, nutritious and much relished by The silinge of Sugar Cane has practically the same feeding value as that of Corn and Kaffir, but Sugar Cane generally produces a much larger crop than most satisfactory results.

cane is normalized executively for slage it may be mixed with ried Corn with as a cafeth crop, Sugar Cane is much used. It could be sown after an early grain crop, or in place of other crops, if they have been destroyed by frost, flood, drought, etc. The plants grow very quickly, reaching maturity in about 10 days. It yields a large quantity of Seed, about 25 to 36 bushels per acre, which can always be saved, no matter for what the seed is nearly ripe. The seed has a high feeding value. It makes a fine feed for all stock if crushed and mixed with oats, peas or soy beans. One of the most common uses of cane seed is as poultry feed, and it is For hay, sow broadcast or in drills at the rate of 50 to 100 bbs; for slage and for syrup, use 6 to 8 lbs, per acre. The seed should be sown about 10 days later than corn.

SHEET SHEET

### BUCKBEE'S NEW HONEY SYRUP CANE

BUCKBEF'S NEW HONEY SYRUP CANE
The Favorite Syrup Producer.
The Favorite Syrup Producer.
This is the earliest Cane, and our seed is grown in the North, is entirely pure,
not mixed with any other sorghum.
As a syrup producer it has no equal, being exceedingly juicy and sweet, making
from 29 to 409 gallons per acre, highly flavored. It grows 10 to 12 feet high, is
from 29 to 409 gallons per acre, highly flavored. It grows 10 to 12 feet high, is
from 29 to 409 gallons per acre, Also
middle of August to October, according to time of planting; will keep green and
stand, if desired, until killed by frost, allowing the farmer to take his own time
to harvest for syrup. In addition to the syrup, a crop of seed could be grown
worth \$25.00 or \$30.00 per acre, Also a splendid forage crop for green feeding,
and will make excellent hay if sown in drills very thick. It may be planted any
time between April and August. Frier, postpaid, pkt, Ite; hay be planted any

BUCKBEE'S IMPROVED EARLY AMBER
Successfully grown even in the extreme northern latitudes. Not only is it
valuable for fodder and pasture purposes, but it makes a high-grade cane syrup
or sorghum. Price, postpaid, pkt. 10c; 10, 30c; 3 lbs, 85c.

### BUCKBEE'S IMPROVED EARLY ORANGE

An exceedingly valuable variety. Very large, of strong and vigorous habit. Frequently produces 240 gallons or over of beautifully colored and highly flavored syrup per acre. About 1 to 3 weeks later than Early Amber, but taller and producing a heavier quantity of forage. Price, postpaid, pkt. 10c; lb. 30c; 3 lbs. 35c.

### Australian Salt Bush

A valuable forage plant for soils containing alkali and for all regions subject to periodical drought; will grow freely on soils that will produce no other vegetation. It seems to take up from the soil the salty substance which is so detrimental to the growth of other plants, and after 3 or 4 crops of it have been grown the soil is capable of producing any other crop. The plant is a perennial in the South, but not hardy in the North, and has to be sown there every year.

sown there every year.

Sow in Spring or Summer, when soil is warm and moist, after a rain; do not cover seed. When once started it will grow strong and vigorously during the driest season. The plants are of spreading habit, branching freely; they make a thick mat of stems and foliage 3 to 4 feet in diameter, yielding about 20 tons of green forage per acre, which makes about 5 tons of hay. This is very nutritious and eagerly eaten by all live stock. When dry the control of seed will seed one acre. Postpaid, pkt. 8c; oz. 15c; ½ lb. 35c; lb. \$1.25.

Thousand-Headed Kale

Similar to and now frequently used in place of rape, as it yields a heavier crop, which is estimated at about 100,000 lbs. per acre in one

Thousand-Headed Kale attains a height Thousand-freaded Rate stream of the rective of cleaves. It frows well on almost any kind of soil and is hardy. All farm animals are fond of it, but it is of especial value for feeding hogs and sheep. Sow same as rape; broadcasting requires 1½ lbs. per acre. Postpaid, pkt. ing requires 11/2 lbs. po 10c; 1/4 lb. 40c; lb. 81.25.

Giant Beggar Weed.

# Giant Beggar Weed or Florida Clover

A Splendld Forage and Soil Renovating Crop for the South
An erect leguminous, annual plant, from 3 to 8 feet high, with abundant follage; excellent as a
pasture crop; makes hay of the finest quality. The feed is much reliebed by stock and is highly
nutritious, comparing favorably with that of red clover and cowpens. It is especially recommended
for thin, sandy soil, and on land too poor to grow any other crop it has produced 3 to 5
tons of cured hay per acre. If cut when about 2 feet high, the plants sagals stool out from the
bottom, yielding successful crops. It is an excellent crop to turn under sagals stool out from the
control of the stool of the same seed 
### BUCKBEE'S WONDERFUL DWARF BONANZA

### BUCKBEE'S DWARF BONANZA RAPE

There is no other forage plant which can be grown so advantageously in the northern part of the United States of t

Rape belongs to the Cabbage family; grows 2 to 3 feet high and is never troubled by insects.

Buckbee's Dwarf Bonanza is undoubtedly the heaviest yielder of all varieties of Rape. Crops of nearly 50 tons of green fodder per acre have been reported of it, while of Dwarf Essex not more than 10 to 20 tons have been harvested.

than 10 to 20 tons have been harvested.

Rape is best adapted to cool and moist climates, but has also successfully been grown in warm and dry sections.

Rape does well on most any kind of soil, especially if rich in vegetable matter, as it is a gross feeder. Land that produces a good crop of corn and wheat is suitable for Rape.

In the northern states Rape is sown from April to August, and in the South from August to Cotber.

and in the South from August to Cotber.

The Total Country of the Coun

TOUNAIVLA RAFE
to allow cultivation. It may be sown alone in Fall after the grain has been harvested, or it may be sown in the Spring in the Winter or Spring grain, when this is 2 to 3 inches high, at the Winter or Spring grain, when this is 2 to 3 inches high, at stubble, sheep can be turned in in about 3 weeks after the stubble, sheep can be turned in in about 3 weeks after the grain is cut. It also is sown in the corn at the last cultivation. When the crop is cut it is best to follow with a cultivator; Kape is usually ready for use in about 2 months from sowing the seed; it is used as a soiling crop in many places, but its chief use is for pasture and especially for hogs and contains the support of the services good as clovet.

There is no danger to hose from biost-

There is no danger to hogs from bloating, but cattle and sheep may suffer seriously if sufficient care is not taken. When on Rape they should at all times have access to salt.

Rape must not be fed any more after it has been frozen. Postpaid, pkt. 10c; lb. 35c; 3 lbs. 95c.

BULK PRICES BY EXPRESS OR FREIGHT SEE ORDER SHEET

**Dwarf Essex Rape** 

A standard variety. Not quite so strong and vigorous a grower as Dwarf Bonanza, but never fails to give the best of satisfaction. Fine imported seed. Price, postpaid, lb. 30c; 3 lbs. 85c. Lentils

This is a comparatively unknown but really valuable addition to our food supplies. The seeds should be sown in Spring in drills and no further attention is required until August or September, when the plants are ready to gather. The seeds keep best in the pods and should only be removed as occasion requires. They are cooked after the manner of beans; they also make excellent soup. Pkt. 10c; ½, b. 25c; ib. 75c.

Field Lupines

An annual leguminous plant, very valuable for plowing under to rectaim poor soil, particularly sandy and old, wornout land. It makes also good fodder in either the green state or as hay. The seeds are very fattening when used with hay. Sow in the early Spring at the rate of 60 to 90 lbs. per acre. Postpaid, pkt. 10c; ½ lb. 25c;

Giant Spurry

An annual fodder plant. It flourishes on sandy, wornout soils where no other plant will grow; it grows from 1 to 3 feet high. Can be sown any time from April to the used for pasture 4 to 6 weeks after sowing. So, the of very rapid growth and can per acre if wanted for hay; or 20 lbs. If needed for fertilizer, and cover lightly by harrowing. For fertilizer plow under when from 15 to 20 inches high. Two crops can be plowed under in one year on account of its quick growth. It is readily eaten by cows. Postpaid, oz. 10e; ¼ lb. 30e; lb. 30e.

### Sunflower

Sunflower seed makes a splendid food for all farm animals; it is reliabled by horses and deather fattens sheep and swine, but it is especially valuable as a food for fowl and is the best egg producing food known. It also keeps the fowl in strong, healthy condition; gives it a bright, lustrous plumage and is said to prevent roup. The strong, thick stalks can also be used as fuel. Sunflower is one of the cheapest foods known. Can be raised cheaper than corn. The variety we offer is an immense yielder and often produces crops

can also be used as fuel. Sunfower is one of the cheapest foods known. Can we cheaper than corn. The variety we offer is an immense yielder and often produces crops of 100 to 125 bishels per acre.

Sunfowers are planted in rows or hills and cultivated the same as corn. If you cannot sunfowers are planted in rows or hills and cultivated the same as corn. If you cannot from the stalks before they are fully ripe, as they are apt to mould on the stalks; spread heads out thinly on the barn floor or cornerly, and as soon as dry enough remove the seeds from the heads; this is done the easiest way by rubbing the inverted head over a constant of the seeds from the heads; this is done the easiest way by rubbing the inverted head over a constant of the seeds from the heads; this is done the easiest way by rubbing the inverted head over a constant of the seeds from the heads; this is done the easiest way by rubbing the inverted head over a constant of the sunfowers. There is no variety which produces larger seeds or beads than this one. Single heads measure 15 to 22 inches in diameter and contain an immense amount of seed. It is very productive. Postpaid, oz. 5c; ½ lb. 15c; lb. 25c; 3 lbs. 70c.

**BUCKBEE'S HARDY NORTHERN** AMERICAN ALFALFA

There is no State in the Union Where It Cannot Be Successfully Grown.

### FACTS ABOUT ALFALFA

One acre of Alfalfa yields as much protein (the milk and meat producer) as three acres of common Clover or nine of Timothy or twelve of Bromus Grass.

It does not exhaust the soil; it

enriches the soil

### CULTURE OF ALFALFA

SOIL—The soil must be well drained and freed of weeds. Algala does not thrive where water is within 6 feet of the surface.

LIME—Where lime is not present in the soil it must be supplied or the plants will fail.

INOCULATION-Soil is the best

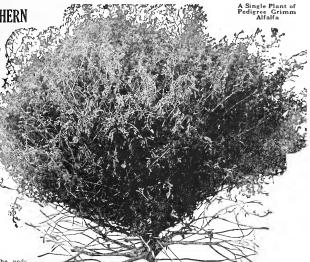

INOCULATION—Soil is the best source of inoculation, see below. We can also furnish bacteria inoculation for Alfalfa, See page \$6.

SOWING THE SEED—Seeding can be done in Spring or Fall. In the Northern states seeding must be done before Aug. 15. Use 10 to 15 pounds of seed on a well-prepared seed control States and 20 to 25 pounds in the Eastern and Southern States.

CITTING FOR HAY—Alfalfa should.

CUTTING FOR HAY—Alfalfa should be cut when about one-tenth in bloom, but in the North never later than but in the Sept. 1.

CUTTING FOR SEED-Cut when the pods are dark brown.

### BUCKBEE'S HARDY NORTHERN ALFALFA

We have handled this strain for many years and the best results have been obtained with it everywhere, only in exceptionally severe winters did it freeze out in some Northeat has been been sown with it; some of them as feel in the some both the seven the seven with it; some of them as feel in the seven with it; some of them as feel in the seven with it; some of them as feel in the seven with it; some of them as feel in the seven with it; some of them as feel in the seven with it; some of the seven with it; some of the seven with it is seven in the seven with it is seven in the seven with it in the North and South prove it an extremely hardy frost and drought-resistant and almost everlasting strain of injury and stood as much cold as any other Alfalfa seed raised in Montan and Dakota, except the hybrid varieties like Grimm, etc. Besides being very hardy, our strain grows very tail and Buckbee's liardy Northern Alfalfa, "FELL OF LIFE," Price, Postpaid, Pkt. 10c; lb. 50c; 3 lbs. \$1.40.

### SIBERIAN ALFALFA

The following varieties are the best of the new kinds of Alfaifa brought by Prof. N. E. Henson, of the South Dakota Experiment Station, from Siberia, where they were growing in localities having a short and hot summer and a long, bitterly cold winter.

cold winter.

These warmed have made good in they grown hautinarily on the Mrsew warmed have made good in they grown hautinarily on the dry uplands west of the Missouri and as far north as Alaska, standing adverse conditions of drought and cold in which no other forage plant will survive. They never winter kill.

The seed we offer is grown in South Dakota and is true stock. We recommend to sow these high-priced soits with a garden-commend to sow these high-priced soits with a garden-commend to the stock of the south of

seed drill in fows 3½ feet apart, using 2 pounds to one acre.

COSSACK—A Hybrid of purple-flowered and hardy yellow-flowered Alfalfa. It resembles Grimm, but is a larger proflowers, often both on the same stem and many intermediate shades. It can readily be distinguished by its flowers from common Alfalfa which makes it very valuable. Of tall, upright growth, recovers quickly after cutting. Price, posphid, pkt. 10c; oz. 15e; tb. \$1.00.

ORENBURG—A pure, hardy, yellow-flowered variety. Probably the most valuable of all Alfalfas and entirely different from all other kinds known now. Its root-system is entirely different from those of others, baving reases and the state of the state of the system is entirely different and for great distances, making it impossible for the plaint to grow where water is

for great distances, making it impossible for the plant to grow where water is near the surface. The crowns are 4 inches below the surface and of mature plants send up hundreds of stems which are finer than those of common alfalfa and much more leafy. Orenburg makes the best forage of all Alfalfas, but it does not grow quite as tall as others. Price, postpali, plat, top: oz. Zec; bb. \$2.00.

BULK PRICES BY EXPRESS OR FREIGHT SEE ORDER SHEET

### PEDIGREED GRIMM ALFALFA SEED Montana Grown on Dry Land

No other Alfalfa has a record of hardiness, drought-resistance and productiveness like Grimm. Two years ago all Alfalfa and Clover fields in a large part of the Northwest froze out-only the fields of Grimm survived. It proved then again the most hardy and dependable forage plant we have.

The characteristics of the Grimm in which it differs from common Alfalfa are:

The branching root stock, which enables the plant to live above hard-pan, on poorly drained soil and so withstand heaving. The sunken crown, that is a crown below the surface and protected by soil from whiter freezing and drying out. It also generally has variegated flowers, mostly blue shades, but occasionally yellow blossoms.

Our Grimm Alfalfa seed has been grown in Montana on dry land. We recommend it to be genuine, straight stock, free from noxious weeds. It has a vitality of not less than 95 per cent and a purity of 99 per cent.

Sow two pounds of seed per acre when drilling in rows 24 to 2 inches apart. Use five pounds when broadcast on well-32 inches apart. Uprepared fertile soil.

Price, Postpaid, pkt. 10c; \$1.00 per pound. By express or freight, not prepaid, 50 lbs. for \$30.00.

### PEDIGREED GRIMM ALFALFA PLANTS

By setting plants a full stand is assured and a gain of one ear is made; the plants grow quickly after being set out and ceure a foothold in the soil which dry weather cannot overcome, by root planting Alfalfa bacteria are easily established in the old as they cling to the roots when planted and save the exsoil as pense of inoculation.

pense of inocutation.

To secure best results, set the plants in rows two to three feet apart and 18 inches apart in the row. They may be plowed in by setting against a furrow and plowing against them. The crown should be set four inches beneath the surface. Jultivate to keep down the weeds. When planted as suggested about 5,000 to 15,000 plants are required of the We ship Alfalfa Plants during the months of April, May and

October.

Prices: Strong Two-Year-Old Plants, by mail, postpald, per 100, \$1.00; by express, not prepaid, per 500, \$3.00; per 1,000, \$5.00.

### INOCULATED ALFALFA SOIL

The best and surest way to inoculate a field with Alfalfa bacteria is by applying soil of an old Alfalfa or Sweet Clover field at the rate of 160 pounds per acre; scatter the soil over the field in the atternoon and harrow it in immediately; do not allow the sun to strike it.

We can furnish Alfalfa soil free of weeds at the following prices: By Express or Freight at buyer's expense, sacks in-cluded, 100-tb, sack, \$2.00: 500 bbs, \$8.75: 1,000 bbs, for \$15.00.

# BUCKBEE'S "FULL OF BUCKBEE'S "FULL OF LIFE" CLOVERS ARE THE HIGHEST GRADE OBTAINABLE

BULK PRICES BY EXPRESS OR FREIGHT

Alsike Clover.

These seeds are carefully tested and are of the highest vitality and purity; they are free of noxious weeds and other foreign seeds; in fact, we aim to have every bushel of Buckbee's Famous "FULL OF LIFE" Clover seeds that we send out test 98 per cent or better for purity and 95 per cent or better for germination. These seeds are also very plump, heavy, being well ripened, so as to insure a good stand and big crop.

### Alsike or Swedish Clover

Alsike seems to be especially adapted for the Northern States; it is a perennial clover and lives longer than Medium Red; it is also more hardy, in fact, it is the hardlest of all clovers; it does not heave out of the ground in Winter and the severest cold does not injure it and it resists the extremes of drought and wet. It is the only clover that will thrive on moist soil, but it will also grow fairly well on stiff clays. It is mostly grown in bottom lands and quite often mixed with Timothy; these varieties seem to be well adapted for this soil and ripen at the same time

Alsike is a hybrid of the Red and White Clover. It grows 2 to 3 feet high. The stems are thinner than those of Red Clover, and the leaves are more numerous, making a hay of finest texture, which is eaten without waste by stock; the feeding value of the hay equals that of Alfalfa. The yield of Alsike hay is fully as large as that of Medium Red Clover.

For hay, cut when in full bloom; it can be cured easier than other clover, the stems being less coarse.

For seed, cut when 2/3 of the heads are ripe; an average crop is about 4 bushels of seed per acre.

For pasture, Alsike is preferred to Medium Red, it being more permanent. Isike is one of the best honey producing plants that can be grown.

Sow at the rate of 5 to 7 pounds per acre in Fall or Spring. It sown alone, but does well if sown under cover of grains. The seed of being smaller, it takes less seed to sow an acre than of Red Clover. It may be

Price, postpaid, Buckbee's Alsike, "Full of Life," pkt. 10c; lb. 75c; 3 lb., \$2.15.

### Alsike and Timothy Mixed

When Alsike and Timothy are grown together it is impossible to make a complete separation of the seeds of these two varieties. We are purchasing this mixture for less money than we could have separated seed and can, therefore, sell it for less those desiring to sow Alsike and Timothy together, therefore, can save money by buying the seed in mixture as originally harvested. This, we believe, is the cheapest Clover and Grass Seed Mixture you can buy, and pasture; they are adapted for the same kinds of soil and mature together; they do well on most any land where other

grasses and clovers grow, but give the best results on moist lands. Both varieties are perennials, are very hardy, do not winter kill and when once established they will live for years. This mixture has given enormous yields on many different kinds of soil and has given better satisfaction than any other grassmixture ever offered, it is of the highest feeding value for stock of all kinds.

Our mixture contains about 1, Alsike, the other part is pure Timothy. Sew at the rate of 10 to 12 lbs. of seed per acre. It can be sown alone or with small grain in the Spring or Fall. Price, postpaid, pkt. 10c; lb. 45c; 3 lbs. 81.25.

### Medium Red or June Clover

SEE ORDER

SHEET

This is the most valuable and most universally grown clover throughout the country. It is a dependable variety for pasture and meadow. It lives 2 years, grows 2 to 4 feet high, makes 2 crops each year. The first one is generally cut when in blossom for hay; the last crop may be harvested for seed, cut for hay or plowed under, to add fertility to the soil.

Medium Red Clover furnishes a splendid pashure; all animals thrive on it, especially cattle,

Medium Red Clover furnishes a splendid pasture; all animais turive on it, especially sheep and pigs.

For soilling crop it is much used, furnishing succulent food all season. It yields about 3 tons of well cured hay per acre, it would not be season and always greedily eaten by this clover, whether used as hay or green fodder, is very nutritious and always greedily eaten by this clover, whether used as hay or green fodder, is very nutritious and always greedily eaten by this clover, whether used as hay or green fodder, is the total to the condition. Clover and the total to the season is negatived where clovers and nitrogen to the soil on which they grow, where it can be drawn upon by subsequent crops, and crops following a crop of clover are larger and of better quality than when grown on land not improved by clover. It is estimated that a full crop of Medium Red Clover turned unded si31.30 worth of nitrogen alone to the soil per acre. It would pay, herefore, to grow clover if for no other use than green fertilizer; and it would save the cost of fertilizers and the expenses of using farm manute.

of using farm manure.

Medium Red Clover does well on a great variety of soils, and it thrives most luxuriantly on

Medium Red Clover does wen on a great valuely of the Archive land of the String, well-drained loads from the Spring or Fall, and it sown alone, 8 to 12 lbs, are used per acre. It may be sown in the Spring or Fall, and it sown alone, 8 to 12 lbs, are used per acre. It may be sown in the Spring or Fall and it sown alone is the sown of the spring orders from the most distant parts of the United States. It pays to have the best. Buckbee's "FULL OF LIFE" Medium Red Clover—the plumpest, purest, cleanest seed of the highest vitality. Price, postpaid, pkt. 10c; lb. 75c; 3 lbs. \$2.15.

Mammoth Red Clover.

### Mammoth Red or Sapling Clover

Mammoth Red Clover is quite distinct from Medium, being larger, of coarser and more robust growth, and two to three weeks later. It is also more hardy, stands frost better and is more permanent, but makes only one crop, and pasture after that. On rich, loamy solls it attains an immense growth; yielding much more bulk than Medium Clover. It grows well on land too poor and on soil too low for Medium Rcd, and is therefore largely used to restore fertility to wornout soil. Mammoth Red Clover should be in every permanent pasture, as it retains its greenness throughout the Summer and furnishes a larger amount of forage than Medium Clover; it is especially used for permanent hog pastures. As a fertilizer for green manuring it also surpasses Medium Clover, growing more rank and making more bulk to plow under. Sow 8 to 12 pounds of seed per acre.

Buckbee's "Full of Life" Mammoth Clover, price, postpaid, pkt, 10c;

### White Clover for Lawns

A low growing clover, spreads rapidly and is very hardy; valuable for permanent pastures, being sweet and nutritious. For lawns it is also much used. Round, white, fragrant heads, which make excellent pasturage for bees. It grows on most any kind of soil, but succeeds best on moist ones. Postpaid, pkt. 10e; lb. 85c; 3 for \$2.50.

White Clover,

# BUCKBEE'S "FULL OF LIFE" GRASS SEEDS

Are of the HIGHEST GRADE obtainable, both as respects purity and high germination; they are pure and clean, free from noxious weeds and foreign seeds and are plump, heavy and well ripened, so as to insure a good stand and a big crop.

### Timothy

Timothy is the most popular and most important of all hay grasses and is adapted to a wider range of conditions than any other variety of grass. It is one of the most certain grasses grow, and without doubt is the hardiest of all our grasses; no other kind will stand the extremes of heat and cold better than this one; no other variety equals it in average yields, excels it in feeding value.

It luxuriates on clay and moist soil and is unsurpassed on peat, but it does not root as deeply and is not considered, therefore, as much an improver of soils as many other grasses; consequently it should not be sown on land deficient in humus or on soils of light, sandy nature. It flowers in July and should be cut when in full bloom, as if left until later the have becomes hard and coarse. The hay is very nourishing and can be preserved for a long time; it is greedily atten with manmont. Clover, and on lower soils generally with Alsike; these two clovers mature with the Timothy. The practice of sowing the common Red Clover with Timothy is not advabable, as they do not ripen together and either one or the other must be cut at a stage which will not give be set results. For pasture, Timothy cannot be well recommended. If sown alone its growth is not thrifty enough and close pasturing is very injurious to it. For pasturing, therefore, it should be sown along with the same time as Timothy. We have also added Timothy to most of understanding the same time as Timothy. We have also added Timothy to most of clover grass mixtures wherever good results could be expected (see page 11). Timothy attains the height of its productiveness in the first year after being sown. It has proven itself especially well adapted to the Northwest and seldom fails to make a good stand on prairies of specially well adapted to the Northwest and seldom fails to make a good stand on prairies of specially well adapted to the Northwest and seldom fails to make a good stand on prairies of per acree to sow with clover, use 9 pounds Timothy and 3 pounds of Alsike, or 5 pounds of Mammoth Clover. Buckbee' "FULL OF LIFE" brand will stand the test of all Pure Seed Laws and has a productive

Buckbee' "FULL OF LIFE" brand will stand the test of all Pure Seed Laws and has a purity higher than 98 per cent and a vitality of more than 95 per cent. It is pure, bright seed, very little hulled. Our prices, postpaid, pkt. 10e; lb. 35e; 3 lbs. \$1.50.

### TALL MEADOW OAT GRASS

A hardy grass of rapid growth, luxuriant, and reaching a height of 4½ feet on rich soil by June 15th. Makes excellent hay on sandy loams, but is particularly suited to rich soils and clay formations. It has a wonderful capacity for enduring severe heat, drought and cold. It can be cut usually twice a year; in the South it does much better than Timothy. To make good hay it should be cut immediately when it blooms. It frequently produces twice as much hay as Timothy. It possesses the advantage of early, quick and late growth, tills well and is admirably suited for a pasture grass. When kept in a close state of feeding it has been found most beneficial. It is offended to good the same time. Sow 25 to 35 pounds per acceptable with Medium Red Clover, which a Varieties ripen at the same time. Sow 25 to 35 pounds per acceptable produces the suite of the same time. Sow 25 to 35 pounds per acceptable produces the suite of the same time. Sow 25 to 35 pounds per acceptable produces the suite of the same time.

### CANADA BLUE GRASS

A very hardy perennial grass with creeping root stocks. It grows on the poorest and driest soils—sandy, gravelly or clayey, standing extremes of wetness or drought, and keeping green until the severe frosts of Winter. It is especially valuable for dairy pastures. It is distinguished from the Kentucky Blue Grass by its flattened, wiry stems and by its decidedly bluer color. Sow 20 to 25 pounds per acre. Prices, postpaid, pkt. loc; lb, 35s; 3 lbs. \$1.00.

Tall Meadow Oat Grass.

### ENGLISH OR PERENNIAL RYE GRASS

Invaluable for permanent pastures. It produces an abundance of remarkably fine foliage, tillers out close to and the ground and soon forms a compact sward. After being cut it grows up in a very short time and remains bright and green throughout the seabright and green throughout the sea-son; it consequently is well adapted for lawn mixtures. It is also a good variety for hay if cut when in blos-som, as it is then most nutritious; if cut much later it becomes woody. It adapts itself to a great diversity of solls, but flourishes best on rich soils in moist situations.

It will last three to four years. Sow 25 to 30 pounds per acre. Buck-bee's "FULL OF LIFE" English Rye, price, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

English Rye Grass. Italian Rye Grass.

### ITALIAN RYE GRASS

A remarkably rapid grower: stands extremes of temperature, remaining green until late in Fall and retaining its freshness in the hottest Summer. its freshness in the hottest Summer. When sown very thick or in mixture with other sorts it makes a good, dense turf, and it is used with much satisfaction on lawns. On rich, moist covered light productive and may be considered to the satisfaction of the satisfactio most valuable grass. Not perennial, but lasts two to three years. Sow 25

to 30 pounds per acre.

Buckbee's "FULL OF LIFE" Italian Rye, price, postpaid, pkt. 10e; lb. 35c: 3 lbs. \$1.00.

A most valuable grass for our Southern States but for pasture and lawns. It is of dwarf habit with long, erece Southern States, but for pasture and lawns. It is of dwarf habit with long, erece habit at the Joints and covering the ground with a matting of fine turf which no amount of trampling will impair. It is also useful for binding drifting sand and for steep embankments subject to wash. It requires heat and moisture to start it. As it cannot endure frost, it is of no value drought and intense tropical heat. Sow at the rate of 5 pounds to the area. Postpaid, pkt. 10e; lb. 90e; 3 lbs. \$2.65.

### JOHNSON GRASS

(Sorghum Halapense.)

When carefully handled, one of the most satisfactory hay crops for the Southern farmer, yielding even during hot and dry seasons three to four cuttings of one and a sound that the state of the seasons three to four cuttings of one and a sound never hors each per three of the seasons three to four cuttings of one and a sound never horse can be read to the seasons three the seasons three the seasons three the seasons three the seasons that the seasons the seasons that the seasons that the seasons the seasons three the seasons that the seasons three to four cuttings of the seasons three to four cutti

### TEOSINTE

Here is a truly wonderful forage plant worthy of general cultivation. Give it a rich, warm, balmy soil and it will yield from 20 to 30 tons of green fodder per acre. It is simply marvelous. Down in Georgia, in Florida and Louislana its yields are all in those states, while a single kernel will produce from 60 to 100 statks of the most nourishing green fodder imaginable. On our Rockford Seed Farms, where the soil is sandy and warm, it always yields a much greater amount of green feed than corn, cane or any other forage plant, and when the season was favorable we cut two crops. About two pounds of seed are required per acre. Price of Seed, postpaid, 02, 15c; ½, 1b. 30c; 1b. 90c.

# SUDAN GRASS

Sudan Grass is introduced by the United States Department of Agriculture and is the most important forage plant ever introduced by forage plant et this Department. forage plant ever introduced by this Department. It has now been thoroughly tested, has given most of the Union, and is destined to become one of the standard Sum-mer grass and forage crops multiple of the standard sum-mer grass and forage crops multiple of the standard sum-mer grass and forage crops multiple of the standard sum-mer grass and forage crops multiple of the standard sum-fers from it in that it is entirely ground root system, which makes a ground root system, which makes a introduced t has now

free from the persistent under-ground root system, which makes a Johnson Grass sod so difficult to annual and having fibrous roots similar to Millet or Oats, is as easily controlled and eradicated at the close of the growing season as those varieties, and will never be-

the close of the growing season as those varieties, and will never be-come a weed.

It is a tall growing annual grass which when planted in rows and cultivated on fairly rich soil attains

which when planted in rows and cultivated on fairly rich soil attains a height of 8 to 10 feet, and sown broadcast or drilled in thickly the stems are erect, unbranched and very fine, the largest stalks not more than & inch thick and are leaves. Where the plants are scattered, they stool abundantly, as many as 100 stalks coming from a single root.

Sudan Grass is not particular abundantly, as many as 100 stalks coming from a single root.

Sudan Grass is not particular abundantly, as many as 100 stalks coming from a single root.

Sudan Grass is not particular abundantly, as many as 100 stalks coming from a single root.

Sudan Grass is not particular abundantly, as many as 100 stalks coming from a single root.

Sudan Grass is not particular abundantly, as many as 100 stalks coming from a single root.

Sudan Grass will state, and especially to parts of Texas, Kansas, Oklahoma and Colorado, which are deficient in rainfail. The dry therefore be of immense value ther. It is fully as drought-resisting as any other Sorghum plant, and can be relied upon to a 75 days, and matures seed in 100 days from planting.

Sudan Grass will stand light frosts, but like all other Sorghums it has a preference for a warm growing season, and for best results should not be planted until the soll has become of the farm of the planted until the soll has become the state of the farm of the planted until the soll has become the state of the farm of the planted until the soll has become seed are required per acree. On good soil, where there is plenty of moisture, it is seed are required per acree. Sudan Grass is easy to cut with a mower and cures readily, when wanted for seed it is harvested with an ordinary grain binder. Used for hay, it is cut when fully headed out. An

early cutting is especially advisable when more cuttings per season are expected. After cutting it resumes its growth promptly, and in about 40 to 45 days another cutting is ready. In Texas it has been cut four times, but farther North only two or three cuttings may be expected.

Sudan makes a very nutritious and palatable hay which is relished by cattle, horses and other farm stock. In feeding value the hay is second only to Alfalfa and far better than Millet. The yields vary a great deal, but from five to eight tons of cured hay have been harvested per acre on dry land and a good deal more under irrigation. The yield of seed is, on dry land, from 500 to 1,400 pounds, but on irrigated land as much as 2,500 pounds have been grown per acre.

have been grown per acre,
Sudain Grass crosses quite easily with
other cultivated Sorghums and Johnson
Grass; we therefore had our seed grown
in the North, where no Johnson Grass ig
grown, and our fields have been kept far
apart from any other Sorghums. Eucletics the fuest and nurses in the market

GRASS AND CLOVER SEED MIXTURE (Sow One to Two Bushels per Acre.)

All authorities agree that for PASTURE and HAY best results are obtained from the use of grass seed IN MIXTURE. The reasons are obvious: First—A NUMBER OF SPECIES will insure a much DENSER GROWTH than the same number of seeds of one or two species, and prove less exhausing to the soil, since they live to a great extent on different constituents, Second—Seasons that affect some grasses adversely are FAVORABLE to other sorts. So that with mixtures failure is PRACTICALLY DIFOSSIBLE. The seed used in these mixtures is of the figure quality obtainable.

### BUCKBEE'S CALIFORNIA BEAUTY MILLET The Best Hog and Stock Millet

The most remarkable leafy, bushy, vigorous growing Millet in the world. Yelde as high as afteen the bush of the control of the state of the control of the state of the control of the con

Grows very rank, 4 to 5 fost high, and is one of the best varieties for hay, being sweet, matatable and milk producing. On good rich soil it yields 5 tons of hay and more per acre. The hay seems coarse, but is very tender, and cows, horses and all other farm stock are exceedingly fond of Rhould be cut when in full bloom. Sow 3 pecks (35 to 40 lbs.) per acre. Postpiaid, pit. 8c; lb. 25c; 3 lbs. 70c. HUNGARIAN MILLET

A luxuriant, vigorous growing and very leafy Millet which is reliabed by all farm stock; the hay is not so course as that of the Liberty Millet, but the yield is nevertheless quite large, averaging 3 to 4 tons an acre. It is earlier than Liberty Millet and is often used as a second crop to follow Barley and early Potatoes, etc. It is claimed this hay to be less dusty than that of other Millets. Sow 3 pecks (5 to 40 lbs.) per acre. Postpaid, plt. 8; lb. 35e; 3 lbs. 30e.

### NEW WHITE WONDER

The most striking feature of White Wonder Millet is the size of the heads which will run from eight up to eighteen inches, and a single head will have so that the size of the heads which will run from eight up to eighteen inches, and a single head will have so that of the size of t

### HOG OR BROOM-CORN MILLET

It is a very sardy varry tipoling in 50 to 6 does from time of sowing. The seed ripons while no folder is, yet green, bence it can be cut and used for both hay and seed with best success; it yields from 60 to 70 bushels of seed per acre besides the fodder hay. The seed is very large, 2 or 3 times the size of Liberty Millet and is yellowish-white. This Millet does not grow very tail and is therefore not much planted for hay. Postpaid, pkt. 8c; lb. 25c;

California Beauty Millet KURSK-SIBERIAN MILLET

Resembles Liberty Millet in manner of growth and productiveness but is about 2 weeks arlier and the seed is orange-red. It stools quite heavily, is very leafy and busby and heavy yielder of both hay and seed, producing 50 to 70 bushels of seed and 4 to 5 tons

hay per acre. It will ripen of this preference in 60 to 70 days from sowing and makes a good crop of hay if sown immediately after the early grain is harvested. This Millet is especially adapted for the Northwestern States, being very early and very hardy it will prosper under conditions when other varieties fail. Postpaid, pkt. 8c; 1b, 25c; 3 lbs. 70c.

### JAPANESE MILLET

JAPANESE MILLET

Also Called Billion Dollar Grass,
Entirely distinct from any other Millet, grows 6 to 8 feet high and produces an enormous crop, often yielding 15 to 20 tons of green fodder or 6 to 8 tens of cured hay per acre. The feeding value of this Millet is much superior to that of corn fodder and the Millet is much more relished by all kinds of stock. Japanes dullity of foreign, it is also most excellent for silo use and frequently a good crop of this Millet can be raised under conditions which would not admit the growing of corn for ensliger. An ideal ensilage mixture may be composed of two parts of Sola Beaus, millet to one part of sola Beaus, without the addition for milch cows, without the addition for grain.

of grain.
The seed of this millet makes The seed of this millet makes good food for poultry and hogs, as it contains almost as much fat and extract matter as shelled corn and a little more pretein. Sow the seed at the rate of 12 to 15 lbs. per acre. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 70c.

BY EXPRESS OR FREIGHT SEE ORDER

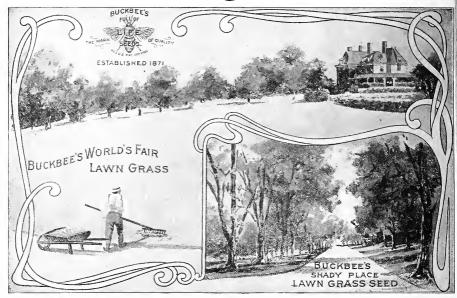

This quick-growing forage plant has been long known under the name East India or "Cat-tail" Millet. Sown in drills 4 feet apart and cultivated like corn, the plants attain a height of 8 to 10 feet, with sender, long-bladed leaves. These stalks can be cured typ food. But the best use of the plant is to cut the stalk for green forage when about 3 feet high and allow the plants to make a second growth for Fall feeding or ensitace. On richly manured land these plants grow with tropical usurlance and no other exceptional value for sections subject to mortage of the complex of the plant is to make a second growth for Eal feeding or ensitace. On richly manured land these plants grow with tropical usurlance and no other exceptional value for sections subject to mortage of and allow the plants to make a second growth for Pall feeding or ensilage. On richly manured land thesplants grow with tropical luxuriance and no other crop will yield as much forage. Pearl Millet is of exceptional value for sections subject to protracter drouth where natural grasses dry up, as it will keep on growing and furnish a good crop in the driest season. Eight pounds of seed are required per acre if sown broadcast, and 5 to 6 pounds if sown in drills Tostpaid, pkt. 10c; ib. 40c; 3 lbs. \$1,5. nd no other Millet is of o protracted will keep

Pearl Millet.

# Buckbee's Famous "Full of Life" Lawn Grass Seed HARDY, LUXURIANT, ALWAYS GROWS, ALWAYS THRIVES

### Our Lawn Grass Seed

Produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, and is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the conditions that a deep green, smooth and volvety sward deep from clumps that a deep green, smooth and volvety sward deep from clumps that a months of summer.

is maintained from show to show without burning grown in the hot months of summon.

The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with the appearance and the permanency of the Lawn.

Very beautiful varieties smaller in growth, leaf and flower than the other dwarf sorts, forming dwarf compact bushes, 8 to 10 inches high, fairly hidden throughout the season by flowers of a great variety of brilliant colors. Pat. 5c: oz. 25c.

Dwarf Giant Flowering, Nasturtium,

Pansies are a universal favorite with young and old and, aside from their great beauty, we all treasure them as the symbol of modest worth and true affection. The smallest yard must have its Pansies. Not poor, forlorn plants, struggling with heat and drouth and hard baked ground, though even there, yielding us handfuls of cheery bloom; but, rather, strong, vigorous plants, riotous in the cool, deep, mellow beds they love, made rich with fertilizers, kept free from weeds, and shaded from the het afternoon sun. In such a bed one may gather great, velvety Pansles by the handfuls-flowers so radiantly beautiful that they scarcely seem of the earth. Pansies are now produced in an almost infinite variety of colors and markings. Their brilliancy of shading, extended season of blooming and longkeeping characteristics make them general favorites. We have been interested in the bringing forward of advanced types of large varieties in this country as well as in Europe, and our stocks are the very best obtainable. We spare neither pains nor expense to satisfy the most critical trade. Poor Pansy seed is dear at any price. Ours is saved with great care and is the best.

### Buckbee's Mammoth Sunrise Mixture

This splendid mixture is a blended combination of mammoth flowering Pansies. It contains all colors and will prove a delightful surprise in regard to the great size and rich and varied colorings of its flowers. Very popular, Pkt. 10c; 1/8 oz. 75c.

# Buckbee' Sweet Scented

The Perfume of the Violet. The Beauty of the Pansy.

This new class is the result of crossing the Pansy with the Sweet Violet; the resulting hybrids, in addition to retain-ing the delightful Violet perfume, produce the most beautiful Pansy-like blossoms, 2 to 2½ inches across, of great substance and of an endless variety of colors. Mixed. Pkt. 8c; ½ oz. 60c.

### Orchid-Flowered

All the delicate shades and tints of the orchids may be found in these charmingly found in these charmingly pretty favorites. Rose, orange, pink, lilac, terra cotta, chamols and other exquisite shades, ors and other exquisite shades, Orchid-flowered Pansies are not as large as some of our giant strains, but they will appeal by their exquisite coloring and the elegant shape of their flowers. Pkt. 8c; 36 oz.

# Giant Flowering Pansies in Separate Colors

They Are the Largest and Most Beautiful Pansies in Cultivation GIANT YELLOW PRINCE—Pure golden yellow, sometimes with the three lower petals marked with purplish or red blotches and hair lines. Pkt. 8c.

Hardy perennials with enormous gorgeous flowers. Mixed Colors. Pkt. 8c; 1/2 oz. 30c.

Buckbee's Giant Double Poppies.

OUALITY

### Pyrethrum

HYBRIDUM GRANDIFLORUM, Single—Large, bright and showy, dalsy-like flowers ranging in colors from white, light pink, to deep red, with bright yellow centers, bloom in spring and again in fail. The flowers are invaluable for cut flowers, being borne on long stems and lasting a long time. The foliage is most elegant in its finely cut, fern-like form and fresh deep green color and is attractive at all times. Nothing surpasses these Pyrethrum for profusion of flowers during the season, and being so simply and easily cultivated, they ought to have a place in every garden whether large or small; height 2 feet. Hardy perennial. Mixed.

HYBRIDUM DOUBLE—Hardy perennial; large double, beautiful flowers, resembling a refined China Aster. Height 1½ feet. Pkt. 20c.

Primula Sinensis or Chinese Primrose.

Pyrethrum Hybridum, Single and Double.

### Penstemon

A most showy perennial; as a bedding plant takes rank with the Petunia, Phlox, etc. Colors, rose, red, carmine, very branch is a spike of large flowers, gloximia-like in size and shape. Not quite hardy and is best treated like an annual, sown early indoor and set out as soon as the weather permits; it will bloom from July till frost. Choicest Mixed. Pkt. 5c; ½ oz. 25e.

### Ricinus

### (Castor Oil Bean)

ZANZIBARIENSIS GIANT MIXED-From seeds sown in the open ground in May the plants are in full foliage early in July, and attain a height of 12 to 14 feet. The enormous leaves, beautifully lobed, measure 2½ to nearly 4 feet across. Pkt. 5c; oz. 15c.

GOOD MIXED-Many choice varieties. Pkt. 5c; oz. 10c.

# Primula Sinensis or Chinese Primrose

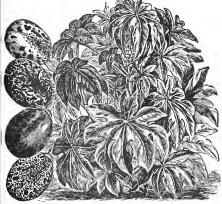

One of our most beautiful and indispensable plants for Winter or Spring blooming in the house or conservatory. Unequaled as Winter bloomers—easily grown.

CHINESE PRIMROSE, Buckbee's Superb Mixed—An elegant mix-ture embracing all the best large-flowering varieties, and also including the fringed sorts. Pkt. 10c.

CHINESE PRIMROSE, Finest Double Mixed—A splendid strain of the finest large-flowering fringed varieties, Our mixture in-cludes the most brilliant colors. Pkt. 18c.

BABY PRIMROSE-Primula Obconica is as near an everblooming plant as is possible to obtain. It has been known to flower for over twelve months without a break. Pkt. 10c,

Ricinus Zanzibariensis or Giant Castor Oil Bean.

### Rudbeckia

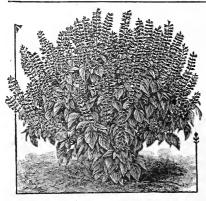

### (Speciosa Bicolor)

Showy Annual of Easy Culture. Eighteen Inches in height. Showy Annual of Easy Culture. Eighten inches in leight. In lowers are produced singly on long, stiff stems and have a diameter of 2 to 3 inches. Large rounded purplish cone in center, with narrow petals around the base of cone. Petals are a deep orange-yellow, heavily marked with brownish red on inner portion. Pkt. 5c; % oz. 15c.

Rudbeckia.

### 134 ROCKFORD SEED FARMS H.W. BUCKBEE ROCKFORD. ILLINOIS. FOREST CITY GREENHOUSES.

Salvia-Scarlet Dragon SALPIGLOSSIS

### SALVIA OR SCARLET SAGE

SPLENDENS-The original Scarlet Sage with beautiful long spikes of bright scarlet color. It is a standard bedding plant and keeps the garden bright with color until frost. Pkt. 5c; 1/8 oz. 35c.

SCARLET DRAGON-CARLET DRAGON—The Most Magnificent Summer and Autumn Flow-ering Bedding Plants—The old Salvia Splendens or Scarlet Sage has long been a favorite, and our essumers can partially appreciate

the superiority of this new variety when we state that the flowers are nearly double the size, closely crowding the immense long spikes that often measure 6 inches across. Fu'llgrown plants in bloom form compact bushes 3 feet high, and bloom from ground to summit. We know of nothing that can equal the gorgeous effect of a row or bed of these fine Salvias when in full bloom; the waving masses of glistening scarlet against green surroundings of against green surroundings of lawn or follage is matchless. Grows very easily from the seed. Pkt. 8c; or 3 pkts. 20c; 1/8 oz. 45c.

SALVIA PLANTS-10c each; 3 for 25c, postpaid. By express at buyer's expense, \$7.00 per 100.

Salpiglossis-New Emperor. SMILAX

### 1/2 oz. 25c. LARGE FLOWERING MIXED—Pkt. 5c; ½ oz. 15c. SENECIO ELEGANS

New Hardy Climbing Baby Rambler.

#### FLOWER OF FAIRFIELD

The Ever Blooming Crimson Rambler The Most Wonderful Garden Rose Introduced for Years

For many years past it has been the endeavor of every Rose grower to produce a climbing variety that would be of perpetual flowering habit. The many beautiful varieties of Rembler Roses were valuable acquisitions, but none of them could be called perpetual or ever-blooming, they producing only one crop of flowers during the season. The Flower of Fairfield, however, is correctly termed a perpetual blooming variety. It commences thouring in the Spring or early Summer and produces repeated crops of bloom until late in the Autumn. Flower of Fairfield Summer and produces repeated crops of bloom until late in the Autumn. Flower of Fairfield summer and produces and so early after planting. It is very effective for covering walls, trellies of order access and so early a strength of the Rose and Spring Plants.

#### THE BLUE ROSE

Veilchenblau or Violet Blue-Newest Climbing Rose "The Sensation of the Century"

After years of effort resarians have been rewarded by the production of a Blue Rose, which After years of effort rosarians have been rewarded by the production of a Blue Rose, which will be welcomed with the greatest interest by all lovers of the garden. This new climbing Rose surpasses all others of recent introduction in having a pure blue color. The flowers appear in large clusters after the manner of the Crimson Rambher, and are semi-double and of medium size. Upon first opening the color is partly bright red and partly bright rose, turning soon to a steel blue. The color is best described by saying that it resembles that of carly violets. This variety is a strong grower, has shunng green foliage and few thorus. Strong plauts, 20e each, 3 for 70e, postpaid. Large 2-jear-old plants, 30e cach.

The Grand New Blue Rose,

# Butterfly Bush

## CHOICE HARDY ORNAMENTAL SHRUBS

## BUCKBEE'S CHOICE HARDY PERENNIAL PLANTS "FULL OF LIFE"

The old-fashioned hardy garden flowers are very popular, and deservedly so. No feature of the garden can be more satisfactory than a good assortment of these hardy plants, producing from early Spring to late in the Fall a continuous succession of charming flowers, which are equally valuable for garden ornamentation and cutting purposes. No class of plants will yield better or more pleasing results for the money invested. They require very little care or attention, are perfectly hardy and yield a rich harvest

LADY IN WHITE (The Famous Cemetery Plant)—One of the very best white flowered plants for the border. The flowers are borne in the greatest profusion the entire Summer on strong, erect stems, pure white in color. Select plants, postpaid, 20e each; 3 for 30c; \$1.55 per doz.

AQUILEGIA (Columbine)—Long-spurred varieties of many rich and varied colors and with broad petals. Two feet high Columbines are a most important part of the hardy garden and should be grown in quantity. With their airy grace they will serve to lighten up a too stiff and formal planting. Their lastling flowers and long stems are also splendid for cutting. Prices, postpaid, 20c; 3 for 50c; \$1.95 per dog.

ARMERIA (Thrift)—Attractive, dwarf plants for low edgings, forming rosettes of narrow evergreen leaves on the ground, from which they send up stiff, wiry stems with dense heads of flowers; bloom all season. Pink and white flowers. Prices, postpaid, 25c; 3 for 70c; \$2.50 per doz.

BABY'S BREATH (Gypsophila Paniculata)—A beautiful old-fashioned plant possessing a grace not found in any other perennial. Beautiful pure white flowers. Plants grow 2 to 3 feet in height and about the same in dlameter. Each 20c; row 2 to 3 Each 20c: 3 for 50c; doz. \$1.95, postpaid.

BLEEDING HEART (Dielytra, or Dicentra)—An old-fashioned favorite; its long and graceful heart-shaped pink flowers are always attractive. Prices, postpaid, 25c each; 3 for 70c; \$2.75 per doz.

CANTERWIRY BELLS (Campanula Medium)—Beautiful large bell-shaped flowers in blue, rose and white colors. The Medium bell-shaped flowers in blue, rose and white colors. The Medium bell in the most satisfactory of the Campanulas. It grows 3 feet high on good soil and blooms for a long time, if flowers are cut immediately upon fading and if planted in a half-shady place. Mixed colors. Each 20e; 3 for 50e; doz. \$1.95, postpaid.

CHIMNEY BELL-FLOWER (Campanula Pyramidalis)-The most conspicuous of the Campanulas, producing spikes 4 to 6 feet high, crowded with salver-shaped flowers July till frost. Colors: blue and white. Each 25c; 3 for 70c; doz. \$2.50.

COREOPSIS (Lanceolata Grandiflora)—One of the most popular hardy plants. The flowers are of a rich golden yellow and invaluable for cutting: continues in bloom the entire Summer and Fall. Each 15c; 3 for 40c; doz. \$1.50, postpaid.

CORN FLOWER ASTER (Stokesin)—A most charming and beautiful native plant. Grows from 18 to 24 inches high bearing freely from early in July until October its handsome Corn Flower-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, and not only is it desirable as a single plant in the hardy border, but it can also be used with fine effect in the control of the contro naid.

DAISY SHASTA (Alaska)—The very best daisy. These new Hybrids of Shasta Daisy give us flowers of different forms and a large range in shape from fully double to single; and in color from pure white to pale lemon yellow—some solid color, some prettily variegated with yellow discs. The plants are very free flowering and in bloom throughout a long season, making as effective a field show and as profitable a cut flower supply as any hardy perennial grown. Each 20c; 3 for 50c; doz. \$1.53, postpaid,

DAY LILY, HEMEROCALLIS-Popular beautiful plants belonging to the Lily Family; succeed everywhere. Flowers close at night, very fragrant. Three feet high; flowers in June and July. We offer the following distinct varieties:

White-Pure glistening, snow white. Each 25c; 3 for 70c; doz, \$2.50.

Variegated-Variegated foliage. White flowers. Each 25c; 3 for 70c; doz. \$2.50.

Buttercup-The best yellow. Each 25c; 3 for 70c; doz. \$2.50. Japanese Double-Large orange flowers with darker shadings. Each 25c; 3 for 70c; doz. \$2.75.

DELPHINIUM OR LARKSPUR (Gold Medal Hybrids) flowers are being used with telling effect in our parks and public grounds. They are one of the few hardy blue flowers of any note. By cutting off the flowers as soon as faded, a second and third crop will succeed. Each 20c; 3 for 50c;

FOX GLOVE (Digitalis)--Another good old-fashioned but dignified and stately perennial. The strong flower stalks—often 4 to 6 feet high—always give an appearance of strength wherever planted Mixed colors, Each 20c; 3 for 50c; doz. \$1.95, postpaid.

judgment.

My plants are suited to all soils and climates. 100 Plants will

All varietles marked (S) are Staminate Perfect Flowering and Sexual varieties.

By

All varieties mark-ed (P) are Pistillate and destitute of Stamens, Therefore when planting varieties marked (P) it will be

varieties marked (P) it will be necessary to have every third bed; much finer fruit will be obtained by so doing.

For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the bed. Plant (S) and so on: or you can use any other (P) and (S) varieties in the same manner.

#### MONEY IN STRAWBERRIES.

A Strawberry Bed is a safe and sure investment. Greatest of all Money Makers. \$500.00 profit per acre. Only one expense—the Cost of Plants, which is merely nominal—lasts for years.

We Warrant all shipments of Strawberry Plants to reach purchaser's hands in good growing condition and when so accepted, no orders will be duplicated or replaced for any cause.

EVERBEARING OR FALL-BEARING STRAWBERRY

A dish of luscious strawberries in Fall is a luxury which everyone who owns a garden could enjoy. Plant at least a dozen plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in Spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the Fall crop.

BURBANK'S NEW THRNLESS

The Finest Flavored, Heaviest Cropping, Best Appearing Berry
Every Commenced of the Medical Commence o

#### MAMMOTH-The Giant of All

Perfection

Currents.

The berries are enormously large; in fact, the largest Black-Mammoth Blackberry, berries in the world. They measure from 2 to 2½ inches long, thus eclipsing any other sort. For cooking purposes thifflis all the desired qualities of other Blackberries, and as a fresh fruit is generally preferable, owing to large size and having more pulp and less core. Price, strong plants, each 15c; doz. \$1.50, postpaid.

**ELDORADO** 

A very vigorous growing, perfectly hardy variety. Fruit very large, borne in clusters which ripen very evenly; quality unsurpassed and an excellent shipper. Price, 10e each, or 95e doz., postpaid.

## CURRANTS

CURRANTS

PERFECTION—The latest introduction, created by crossing Fay's Proline with White Grape. The statest introduction of the process of the process of the state of the latest and the size of the berries is maintained to the end of the burnch. It is one off it is superior to anything in the market today, being of a rich, mild, sub-acid flavor and having plenty of pulp with few seeds. Price, 25c each, or \$8.20 doz, postpaid.

Usually hardy in habit of growth and bears profusely. The berries are beautiful light red and grow in immense clusters, more resembling bunches of red Grapes than Currants. The state of the process of the state of the stat

madie and northern states. It bears great bunches of pearly white Currants of the most delicious flavor. Vigorous grower, very pro-ductive. The sweetest and richest white Cur-rant extant. Fruit larger and stems longer than White Grapes. In the fruit sugar and acid are blended without excess of either. The best of all for a dessert fruit. Friec, 35c each, or \$2.50 doz., postpaid. Special Offer E4 The set of 3 Cur-variety, by mail, postpaid. Only 60c

## GRAPES

CAMPLELL'S EARLY—The perries are large, often an lacto or more in diameters glossy black with a purple of the second section of the section of the second section of the section of the second section of the secti

WHITE DIAMOND—Valuable for all sections of the United States. Best white, healthy and per-fectly hardy. Prices same as Campbell's Early. MOORE'S EARLY-One of the best early ripening NAMES EARLY—One of the best early ripening varieties. The bunch is large, round and with a black-blue cloom. In quality surpassing the Concord. Price, 2-year-old strong plants, 20c each, or \$2.00 doz., postpaid.

CONCORD—The well-known standard black-blue variety. It succeeds wherever Grapes are grown. Prices same as Moore's Early.

WORDEN-A large black Grape of the Concord type, but 5 to 10 days earlier. Price same as Moore's.

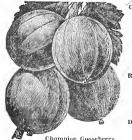

Special Offer E3 The set of 5 only 90c one of each variety, by mail, postpaid,

Owing to the embedding of the dependent we cannot hip our mind and Gooseberries into any states west of the Mississippi River nor in Illinois. Customers llying in these Western States will please not order them and so save unnecessary correspondence.

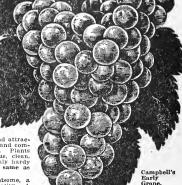

GOOSEBERRIES

CHAMPION-An excellent new variety originated in Minnesota, A vigorous grower, very hardy, free from mildew and rust and free from mildew and rust and very productive. The fruit ripens early, is of large size, round, smooth, of greenish white color with thin transparent skin and of most excellent quality. The

with thin transparent skin and of most excellent quality. The very best Gooseberry known today. Price, Strong Plants, 30e each, or \$2.75 doz., postpaid. ED JACKET—Fruit large, a bright shiny red, a most beautiful and attractive berry. Flavor is most delicoits and commands the very best market price. Plants and foliage are at all times vigorous, clean, healthy and mildew proof. Thoroughly hardy and enormously productive. Prices same as and enormously productive. Prices same Champion.

DOWNING-The berry is large, handsome, a pale green in color, of excellent quality. A favorite for home and market. Price same as Champion.

# RASPBERRIES

ST. REGIS EVERBEARING. Bears Fruit Perpetually for Four Months-It is the first Red Raspberry to give ripe fruit, and continues to produce berries without intermis-nation until October. The berries are surpassing in quality—rich, sugary, with full Raspberry flavor. They are of exceedingly meaty, firm texture, and keep in good condition for a very long time after being gathered. St. Regis is very hardy, an excellent shipper and wonderfully profife. Fine, strong, selected plants, 20e each; \$1.75 per doz., postpaid.

HERBERT—The hardiest Raspberry; a strong, vigorous grower; fruit bright red, very sweet and juicy. Earlier and with larger berries than most others. Price, 15c each; \$1.25 doz., postpaid,

#### BLACK RASPBERRIES

CUMBERLAND-New. The largest Black Raspberry known, averaging % inch in diameter. Good and firm as the Gregg, but the bush is hardier. A strong, vig. and wonderfully productive. Mid-season. 15c each; \$1.25 doz. Postpaid. A strong, vigorous grower COLUMBIAN—Purple or dark blue color, rich flavor, very large size. An excellent shipper, and the best for canning and drying. Late. 15c each; \$1.25 doz. Postpaid.
